these do not operate in the same way in all nation states They examine the transformative effects of globalization on the discursive terrain within which educational policies are developed and enacted arguing that this terrain is increasingly informed by a range of neo liberal precepts which have fundamentally changed the ways in which we think about educational governance They also suggest that whilst in some countries these precepts are resisted to some extent they have nonetheless become hegemonic and provide an overview of some critical issues in educational policy to which this hegemonic view of globalization has given rise including devolution and decentralization new forms of governance the balance between public and private funding of education access and equity and the education of girls curriculum particularly with respect to the teaching of English language and technology pedagogies and high stakes testing and the global trade in education These issues are explored within the context of major shifts in global processes and ideological discourses currently being experienced and negotiated by all countries The book also provides an approach to education policy analysis in an age of globalization and will be of interest to those studying globalization and education policy across the social sciences

Martell,2017-10-01 Over the past decade the world has experienced a major economic collapse the increasing racial inequity and high profile police killings of unarmed Black and Brown people the persistence of global terrorism a large scale refugee crisis and the negative impacts of global warming In reaction to social instability there are growing populist movements in the United States and across the world which present major challenges for democracy Concurrently there has been a rise of grassroots political movements focused on increasing equity in relation to race gender class sexual orientation and religion The role of social studies teachers in preparing the next generation of democratic citizens has never been more important and the call for more social studies teacher educators to help teachers address these critical issues only gets louder This volume examines how teacher educators are or are not supporting beginning and experienced social studies teachers in such turbulent times and it offers suggestions for moving the field forward by better educating teachers to address growing local national and global

concerns In their chapters authors in social studies education present research with implications for practice related to the following topics race gender sexual orientation immigration religion disciplinary literacy global civics and social justice This book is guided by the following overarching questions What can the research tell us about preparing and developing social studies teachers for an increasingly complex interconnected and rapidly changing world How can we educate social studies teachers to teach against the grain Cochran Smith 1991 2001b centering their work on social justice social change and social responsibility

Monsters in the Classroom: Noam Chomsky, Human Nature, and Education Philip G. Hill, 2023 In this lucid original and comprehensive work the articulated approaches to pedagogy are based on specific conceptions of human nature Drawing on a vast range of Chomsky's prodigious output in linguistics politics biology cognitive science and education Hill highlights two fundamental elements of Chomsky's understanding of human nature and uses these elements as the foundation of a highly creative approach to pedagogy The originality of the work is apparent in the way the author identifies how key ideas in Chomsky's linguistics and political discourse are rooted in a liberatory approach to education The value of the work lies in its practical nature Even though it makes reference to ideas in various academic disciplines the work's overall value is reflected in the way ideas relate to Hill's personal teaching experiences and how they apply in a concrete classroom setting The reader is offered a practical and highly creative way to apply Chomsky's understanding of human nature in a classroom setting

Education, Privatisation and Social Justice Ian Macpherson, Susan Robertson, Geoffrey Walford, 2014-05-12 The involvement of private actors in education is not new yet in the last decade critical issues have arisen that demand close scrutiny This volume explores emerging forms of the private through case studies from Africa South Asia and South East Asia and makes three related observations First what is new about these manifestations is their scale scope and penetration into almost all aspects of the education endeavour from the administrative apparatus to policymaking and from formal provision in education settings to out of school activities such as private tutoring Second what is particularly controversial about these developments is how education itself is being recast as a sector it is increasingly being opened up to profit making and trade and to agenda setting by private commercial interests Third the learner is increasingly conceptualised as a consumer and education a consumer good The case studies therefore enable us to see more clearly how different forms of the private in education alter what is at stake for whom and with what outcomes and the consequences for individuals and societies In turn these raise the very important question about what they mean for our conceptualisations of education learning and teaching

on the one hand and for education as a site and means for emancipation on the other These are profound social justice concerns and ones that make this volume distinctive This book sets out to address these hard but urgent questions and will be of interest to academics and students of education education researchers government personnel and policymakers
