## **Education For Action 4e:**

**Educational Curricula** Jennifer N. Casey, 2008 In formal education a curriculum plural curricula is the set of courses and their content offered at a school or university As an idea curriculum stems from the Latin word for race course referring to the course of deeds and experiences through which children grow and mature in becoming adults Crucial to the curriculum is the definition of the course objectives that usually are expressed as learning outcomes and normally include the program s assessment strategy These outcomes and assessments are grouped as units or modules and therefore the curriculum comprises a collection of such units each in turn comprising a specialised specific part of the curriculum So a typical curriculum includes communications numeracy information technology and social skills units with specific specialised teaching of each This book presents research on educational curricula from around the world The Wiley Handbook of Action Research in Education Craig A. Mertler, 2019-02-06 Comprehensive overview of the theoretical conceptual and applied practical presentations of action research as it is found and conducted solely in educational settings The Wiley Handbook of Action Research in Education is the first book to offer theoretical conceptual and applied practical presentations of action research as it is found and conducted solely in educational settings Covering primarily PK 12 educational settings the book utilizes a cross section of international authors and presentations to provide global perspectives on action research in education Part I of The Wiley Handbook of Action Research in Education focuses on various foundational aspects and issues related to action research Part II is centered on chapters that present theories and principles that help to guide the use of action research in educational contexts Part III focuses on specific applications of educational action research in practice Part IV provides an outlet for seven educational practitioners to share their experiences in conducting action research Each of these authors also discusses the importance and value that action research has had on him or her both professionally and personally Discuss action research in PK 12 as well as in higher education settings The first book to focus on the importance and application of action research exclusively in educational settings Offers world perspectives on action research in education Written by a team of international scholars The Wiley Handbook of Action Research in Education is an excellent book for advanced undergraduate students graduate students and scholars studying and or researching educational action research **Fanon, Education, Action** Erica Burman, 2018-07-23 Bridging childhood studies pedagogy and educational theory critical psychology and postcolonial studies this unique book reads the role and functions of the child and childhood as both cultural motif and as embodied life condition through the work of Frantz Fanon Based on innovative readings of Fanon and postcolonial cultural studies the book offers new insights for critical pedagogical and transformative practice in forging crucial links not only between the political and the psychological but between distress therapy and personal and political learning and transformation Structured around four indicative and distinct forms of child read from Fanon s texts Idiotic Traumatogenic Therapeutic Extemic the author discusses both educational and therapeutic practices The pedagogical links

the political with the personal and Fanon's revolutionary psychoaffective account offers vital resources to inform these. Finally the book presents child as method as a new analytical approach by which to read the geopolitical which shows childhood education and critical psychological studies to be key to these at the level of theory method and practice. By interrogating contemporary modalities of childhood as modern economic and political tropes the author offers conceptual and methodological resources for practically engaging with and transforming these. This book will be vital and fascinating reading for students and scholars in psychology psychoanalysis education and childhood studies gender studies postcolonial studies and mental health.

Values and Virtues in Higher Education Research. Jean McNiff, 2016-06-10. Values and Virtues in Higher Education Research centres on practitioners studying and researching their practices in higher education settings in order to improve those practices for the benefit of others and themselves. Making research public is a key aspect of ensuring the quality of educational research and educational practices. Values and Virtues in Higher Education Research raises questions and develops conversations about why higher education practitioners should study and improve their work how this may be done and what might be some of the benefits of doing so. What we do as practitioners is influenced by and linked with what we value what we believe is good. Improving practices therefore involves becoming aware of and interrogating the values that enter into and inform those practices. A study of practices becomes a study of the relationships between the practices in question and their values base. From an international group of contributors in this growing field this book provides strong theoretical resources and case study material that shows how this transformation may be achieved including topics such as Theorising practices to show personal and organisational accountability. Developing inter professional and inter disciplinary dialogues for social transformation. Establishing communities of inquiry in higher education and other workplace settings. Reconceptualising professional education as research informed practice. Locating educational theory in the real world for human and environmental wellbeing. Showing the evolution of theory through critical engagement this text will be a valuable companion for lecturers students and professional developers in higher education. This book will form core reading for those

who are interested in engaging in practice based research and as additional reading for those whose aim is to broaden their thinking in relation to the role of values and virtues in educational research Jean McNiff is an independent researcher and writer Professor of Educational Research at York St John University and Visiting Professor at Oslo and Akershus University College Beijing Normal University and Ningxia Teachers University She is also the author of key texts *Action Research Principles and Practice* *You and Your Action Research Project* and *Writing Up Your Action Research Project* **Action Research for Inclusive Education** Felicity Armstrong, Diana Tsokova, 2019-04-24 Exploring practitioner research and the possibilities it creates for increasing student participation and developing inclusive practices in educational contexts this insightful text presents a range of original and innovative approaches to Action Research and highlights the critical relationship between educational theory research and practice in transformative action Focussing on social constructivist approaches to teaching and learning Action Research for Inclusive Education offers first hand insights from researcher practitioners from international settings including Denmark Germany Ireland Saudi Arabia Granada Greece Singapore and England Chapters explore diverse participatory and collaborative research practices which draw on the strengths and contributions of teachers and support staff pupils and families to foster inclusive practices across the school community and strengthen the participation and independence of all students Topics considered include collaboration in Participatory Action Research friendships and the development of students social skills student voice and the role of pupils as co researchers and peer mentors Making an important contribution to debates on inclusive education and the role of practitioners and students in bringing about change this text will be key reading for students teachers and educational researchers **Recent Advances in Science and Technology Education, Ranging from Modern Pedagogies to Neuroeducation and Assessment** Zacharoula Smyrniou, 2016-03-08 Science and technology education research influenced by inquiry based thinking not only concentrates on the teaching of scientific concepts and addressing any misconceptions that learners may hold but also emphasizes the ways in which students learn and seeks avenues to achieve better learning through creativity New developments in science and technology education rely on a wide variety of methods borrowed from various fields of science such as computer science cognitive science sociology and neurosciences This book presents papers from the first international conference on New Developments in Science and Technology Education that was structured around seven main thematic axes namely modern pedagogies in science and technology education new technologies in science and technology education assessment in science and technology education teaching and learning in the light of inquiry learning methods neuroscience and science education conceptual understanding and conceptual change in science and interest attitude and motivation in science It explores the beneficial impact of pedagogically updated practices and approaches in the teaching of science concepts and elaborates on future challenges and emerging issues that concern science and technology education By pointing out new research directions the volume will inform educational practices and bridge the gap between research and
