The SAGE Handbook of Comparative Studies in Education Larry E. Suter, Emma Smith, Brian D. Denman, 2019-05-27 Educational practices have rapidly changed in the last few decades especially in how exchanges of information and learning are delivered and processed Yet while the field of international comparative studies has grown there has not been an extensive study on the relationship between educational practices students and how practitioners are prepared and trained This handbook explores international educational practices and behaviours through new research and a review of existing research with chapters spread across six parts Part I Introduction to Research Practices in Comparative Studies of Education Part II Research Methods Part III Policy Transfer Research through International Comparisons Part IV Use of Student time in Formal and Informal Settings Part V School Practices from Early Childhood through Secondary School Part VI Conclusion Lessons from Large Scale Studies

The Right to Resist Mario Wenning, Thomas Byrne, 2023-01-12 While the idea of total revolution seems anachronistic today there is increasing consensus about the importance of new forms of political ethical and aesthetic resistance In the past resistance was often motivated as a form of protest against specific institutions Increasingly dissent has become integrated into the fabric of modern life This volume addresses new forms of resistance at a level that combines a rootedness in the philosophical tradition and a sensitivity to rethinking the possibility of emancipation in today's age The work focuses on contemporary social and political philosophy from a perspective informed by critical theory The text specifically addresses three challenges 1 Critical theorists need to investigate in which ways resistance conformism and oppression oppose and constitute each other 2 The relationship between the theory and the practice of resistance needs to be posed anew given recent protest movements and media of protest 3 It needs to be shown in which ways different areas of society such as the arts religion and social media establish divergent practices of resistance The chapters are written by scholars from Asia Europe and North America These experts in resistance discourse focus on practices of dissent ranging from traditional forms of civil disobedience to more recent practices such as guerrilla protest art and resistance in digital networks including social media What unites them is a shared concern for the dimensions of political acts of resistance in an age that is characterized by a tendency to integrate and thereby neutralize those very acts

IJER Vol 11-N2 International Journal of Educational Reform, 2002-07-02

The mission of the International Journal of Educational Reform IJER is to keep readers up to date with worldwide developments in education reform by providing scholarly information and practical analysis from recognized international authorities. As the only peer reviewed scholarly publication that combines authors' voices without regard for the political affiliations, perspectives, or research methodologies, IJER provides readers with a balanced view of all sides of the political and educational mainstream. To this end, IJER includes but is not limited to inquiry based and opinion pieces on developments in such areas as policy administration, curriculum, instruction, law, and research. IJER should thus be of interest to professional educators with decision making roles and policymakers at all levels, turn since it provides a broad based conversation between and among policymakers, practitioners, and academicians about reform goals, objectives, and methods for success throughout the world. Readers can call on IJER to learn from an international group of reform implementers by discovering what they can do that has actually worked. IJER can also help readers to understand the pitfalls of current reforms in order to avoid making similar mistakes. Finally, it is the mission of IJER to help readers to learn about key issues in school reform from movers and shakers who help to study and shape the power base directing educational reform in the U.S. and the world.

The Changing Role of Schools in Asian Societies John Chi-Kin Lee, 2007-12-05

Walk into a classroom in Tokyo, New York, London, or Rotterdam, and the similarities in structure, activity, purpose, and style will outweigh differences in language, dress, and ethnic characteristics. Learning is regulated and rationed; teaching is a process or one way transmission of knowledge; students need to be docile and conformist; assessment needs to sift and sort the bright from the not so bright; and rewards will be given to those who successfully negotiate this regime. But are these the kinds of places that can meet the needs of the net generation? *The Changing Role of Schools in Asian Societies* is concerned with the debate about the nature of modern schooling in Asia. Traditionally, schools are historical constructions reflecting the social, economic, and political needs of the societies that invest in them. As Asia faces the challenges posed by the knowledge economy, its schools have taken on a new and quite different importance. This informative book outlines the broad policy contexts in which these transformations are taking place and the practical strategies that are needed to meet this objective. The authors argue that the future of Asian societies depends on a transformation that requires a fundamental restructuring of schools as we know them while maintaining their long held cultural values. This valuable insight provides an overview of educational issues in Asian societies, establishes a broad theoretical framework in which these issues can be understood, contextualizes issues by providing country case studies, acknowledges the important role of culture influencing educational priorities. It should be of interest to all those working in education policy and comparative education.
