**Teaching in Alternative and Flexible Education Settings** Aspa Baroutsis,Glenda McGregor,Martin Mills,Kitty te Riele,2019-12-18 Alternative and flexible education settings may come in different forms but they generally have in common a focus on young people who have been disengaged from

conventional schooling One challenge of these settings therefore is to change the way education is offered in order to better engage these students Much of the onus for this changed approach is on the staff teachers youth workers and other support staff Therefore the purpose of this book is to examine different aspects of the work of staff in these settings Several common threads run through the chapters in this book highlighting core aspects of the work of staff in these settings A strong sense of commitment to working with and for young people from marginalised backgrounds Validation of the relational and emotional nature of education as a fundamentally people centred enterprise The importance of explicit attention to critical reflection on staff members own positionality assumptions and identity Collegiality as a crucially affirming part of school culture for staff These elements are pertinent to educational settings everywhere The chapters in this book serve as a reminder of what really counts for our young people and their schooling The chapters in this book were originally published as a special issue of Teaching Education Alternative Educational Futures in the United States and in Europe: Methods, Issues and Policy Relevance Centre for Educational Research and Innovation,1972 Public Policy and Futures Bibliography ,1980 **Alternative Educational Futures** Clive Harber,Roland Meighan,Brian Roberts,1984 *The Great Lockout in America's Citizenship Plants* William Albert Wirt,Don E. Jarl Bengtsson,Albert van den Berg,Alain Gras,B.J. Hake,Ian Lister,Jürgen Zimmer,2012-12-06 This volume has been prepared in the framework of Project 1 Educating Man for the 21st Century of Plan Europe 2000 sponsored by the European Cultural Foundation While most of the studies launched under this Project deal with specific aspects or levels of education the present volume attempts to provide a more global view of educational futures and

their relationships to alternative futures of the overall socio economic system It should not be considered as a general integration or synthesis of the different studies of the Education Project of the European Cultural Foundation although it draws on them as well as other recently published documents Rather it should be regarded as one of several possible approaches analytical tools and incentives to the study and open discussion of educational problems seen in a long term perspective The volume is the result of a collective effort of a multinational team of researchers A colloquium of some sixty participants meeting at the University of York in October 1972 provided critiques and comments to the first version of the report But only the authors themselves claim responsibility for the methodology of the study and the opinions and conclusions expressed therein These do not necessarily reflect those of the sponsors of the volume the European Cultural Foundation and the Scientific Committee of its Education Project Such a synthesis will appear as the concluding report of the Project
