Annual Report Federal Reserve Bank of Chicago,2007 Knowledge and Technology Management in Virtual Organizations: Issues, Trends, Opportunities and Solutions Putnik, Goran D.,Cruz-Cunha, Maria Manuela,2006-12-31 Knowledge and Technology Management in Virtual Organizations Issues Trends Opportunities and Solutions presents a collection of the most recent contributions in the areas of organization knowledge and technology management in the context of virtual enterprises This book contains important and in depth information on four dimensions semantic managerial technological and social The semantic dimensions covered in this book are ontological and organizational approaches concepts organizational models and knowledge management models In respect to managerial dimensions this book covers process management integration management relationship management process integration knowledge management technology integration management and information integration Knowledge and Technology Management in Virtual Organizations Issues Trends Opportunities and Solutions presents the technological dimension by explaining the infrastructures and technologies to support technology and information integration standards and protocols Lastly this title highlights the social dimension including human resources management human resources integration social issues social impact social requirements and communities of knowledge Constructing Ambient Intelligence Max Mühlhäuser,Alois Ferscha,Erwin Aitenbichler,2008-08-17 A foreword for the present workshop proceedings cannot be provided without first looking at the larger context of the AMI conference in which the workshops were organized The AMI 2007 conference has roots in preceding events but in many respects AMI can be called a novel conference format and hence a premiere Among the several aims that inspired and shaped this new conference format the following two are particularly worth considering 1 to provide a forum for the ambient intel gence flavor of research on the Post PC era of computer science complementing the ubiquitous computing and pervasive computing flavors emphasized by alrea existing conferences 2 to offer an event that

attracts contributions from all over the globe yet emphasizes European strengths with particular reference to the Information Society Technologies IST branch of the EU research framework programs FPs which carry the same label as the conference. The workshop organization chairs reflected these unique characteristics of the new AMI conference series in the call for workshop proposals using two corresponding measures: 1) by particularly soliciting workshops on in-depth topics corresponding to the above-mentioned ambient intelligence flavor of Post-PC research; 2) by offering two different workshop threads: one usual thread for advanced topics called SW workshops and one thread for workshops related to concrete EU FP6 and FP7 projects called EU workshops.
