health and an extensively updated chapter on the importance of bioengineering

**FEATURES INCLUDE**

- The Science of Life To help show the interdisciplinary nature of the many concepts introduced in the text
- Sections on living things are included in most chapters
- The chapters that emphasize principles specifically related to life are at the end of the book but the biological examples appear throughout
- The Ongoing Process of Science Science is a never ending process of asking questions and seeking answers
- In these features some of the most exciting questions currently being addressed by scientists are examined
- Mathematical Equations and Worked Examples Whenever an equation is introduced it is presented in three steps first as a sentence second as a word equation and finally in its traditional symbolic form
- In this way students can focus on the meaning rather than the abstraction of the mathematics
- An appendix on English and SI units is also included
- Science by the Numbers To help students understand the importance of simple mathematical calculations in areas of magnitude several nontraditional calculations have been incorporated
- For example how much solid waste is generated in the United States how long it would take to erode a mountain and how many people were required to build Stonehenge
- Great Ideas and Great Ideas Concept Each chapter begins with a statement of a great unifying idea or theme in science and a concept map so that students immediately grasp the chief concept of the chapter and how the idea relates to the different branches of science
- These statements are intended to provide a framework for placing everyday experiences into a broad context
- Stop and Think Questions challenge students to think critically about the implications of a scientific discovery or principle
- Resources for Instructors and Students including practice quizzes flashcards lecture slides an instructor's manual images and tables from the book a test bank and much more

[The Edge of Science](#) Alan Baker, 2013-01-17 How did the universe begin and how will it end What happens to us when we die Do intelligent beings exist elsewhere in our galaxy and beyond

[The Edge of Science](#) addresses these and many other questions that have bewildered and perplexed humanity for centuries Some of these enigmas have been solved through the ingenuity of their investigators others remain a mystery and have given rise to equally bizarre speculations

From the Tunguska explosion of 1908 to the enigma of the Moon's origin from the possibility of time travel to the search for zero point energy author Alan Baker examines the many theories that have been presented to account for the world's most enduring mysteries

Each chapter deals with an enigma that has caused wonder excitement or fear to all who have pondered it including the discovery of strange fossils that hint at an unknown early history of humanity anomalous structures photographed on the Moon and Mars the mystery of dark matter and dark energy and strange disappearances of people and objects
