the Future of EU Investment Policy in the Global Context Pamela Finckenberg-Broman, 2022-09-28 This book provides a comprehensive analysis of how EU state aid law is shaping the future of EU investment policy in a global context. It examines in detail how EU state aid policy and practice interact with the EU investment regime on the internal market and affect the external trade relations of the Member States and the EU alike. The debate this book engages in concerns competence, i.e. which body delineates the scope of state aid law and policy now and in the future when and where it intersects and collides with another distinct legal field, investment protection. Pursuing a doctrinal approach to the topic in the light of EU law and international law, the book analyses the interaction of the EU's trade, state aid and investment policy. This is done by posing the following research question: How is EU state aid law shaping the future of EU investment policy in a global context? Further, the book puts forward three corresponding arguments. First, this influence can be seen in the EU's incorporation of clauses promoting fair competition and state aid policy in international trade agreements. Second, EU state aid law and policy contributed to recent internal developments which led the Member States to terminate their bilateral agreements with each other, intra-EU BITs, by the end of 2019. Third, the EU has been working to replace the BITs between its Member States and third countries, extra-EU BITs, with its own trade agreements which are aligned with EU legislation. This combined analysis of EU law and international law yields a number of interesting conclusions. The book addresses a highly topical and rapidly evolving area of EU law and international investment law. It is also the first book to provide a comprehensive approach to the interplay of state aid rules and EU investment policy internally and externally, i.e. within the EU and on a global scale. As such, it closes an important gap in the extant literature on international and EU law. *Bargaining with Multinationals* H.

Loewendahl, 2001-07-19 In *Bargaining with Multinationals*, Loewendahl scrutinises the relationship between multinational companies, regional development and governments using an international political economy framework of bargaining between government and multinationals. He critically analyses the role of foreign investment in economic development and examines how governments can link inward investment to regional economic development. Based on extensive use of data, interviews and case studies of Siemens and Nissan's UK investment, the book shows why MNCs have invested in the UK in the past, how they bargained with the government and what the impact was on the national and regional economies. In particular, through linking the strategy of multinationals to the location advantages of the UK, it is argued that labour flexibility and incentives were crucial to investment decisions. Loewendahl recommends a framework to integrate endogenous and exogenous approaches to developments and proposes a greater role for the region and the EU to control incentives and monitor multinationals. The European Automobile Industry William A. Maloney, Andrew McLaughlin, 2005-07-08 This book presents an analysis of some of the changes that have transformed the automobile industry in the last thirty years, illustrating some of the most significant consequences of globalization. Focusing on the response of Europe's policy makers, it analyzes government-industry relations at both national and transnational levels, demonstrating how national policy instruments have

been eroded by regional political and economic integration There has been a significant and irreversible shift in the locus of decision making power from nation states to the regional level in the automobile sector

The Concept of State Aid Under EU Law Juan Jorge Piernas López, 2015-08-06 How has the evolution and transformation of the Common Market affected the legal concept of State aid How has State aid adapted to the development of the European Union These questions and more are answered in Juan Jorge Piernas López's examination of the historical political constitutional and economical events that have affected the development of State aid in the EU Examining three key interwoven arguments this book provides a richer understanding of current formulas which depict the concept of aid through the prism of policy and enforcement considerations First the book demonstrates that the concept of aid is a living instrument that has been applied in accordance with the main policy priorities of the European Commission Second contrary to what has been affirmed in other literature the evolution of this concept has been influenced by the broader advancement of the case law of the Court of Justice in different periods of the integration process Third the author contends that the study of the evolution of the concept of aid in light of policy and case law provides a holistic outlook valuable to the decision making process of difficult cases In this regard the book provides criteria to interpret and discuss cases including *Sloman Neptun*

The Modernisation of State Aid for Economic and Social Development Bruno Nascimbene, Alessia Di Pascale, 2018-11-28 This book analyses the recent modernisation of EU State aid law from various perspectives and considers both substantive and procedural aspects It also discusses the reasons for and the goals and future implications of the modernisation programme including the evolution of the concept of State aid The ambitious reform programme was launched in 2012 and has now been almost fully implemented by virtue of the adoption of new rules of procedure in July 2013 and exemption in June 2014 The book highlights the main aspects of this sector reform which include the Commission's change of attitude towards so called positive aid i e those able to promote economic growth and the intention to focus on matters of greater systematic extent These objectives also imply a third aspect increasing the intensity of the control powers conferred on the Commission with regard to that aid that prove to be harmful to competition and the internal market The book also examines the greater responsibility given to States for self assessment of their economic policy measures and explores the resulting impact on and challenges posed to the administrations of the Member States The book's second part is devoted to the application State aid rules in the area of services of general economic interest with a special focus on aid in the field of social health and infrastructure

Towards a New Map of Automobile Manufacturing in Europe? Ray Hudson, Eike W. Schamp, 2012-12-06 This book is the product of four years of collaborative work within the framework of the European Science Foundation's Regional and Urban Restructuring in Europe RURE programme With one exception all of the chapters have been prepared by participants in RURE the exception being that commissioned from Conti and Enrietti on Fiat and Italy to provide a fuller coverage of changes in the main automobile producing companies and countries of Europe A perhaps the central theme around which the RURE programme was conceived is that the restructuring of the production system lies at the heart of the changing map of Europe Equally it continues to be the case that the automobile industry lies at the cutting edge of the search for viable new models of production Some eighty years ago the automobile industry occupied a pivotal position in the transition from craft to mass production indeed Fordism came to denote not just a particular micro economic model of production organisation in the factory but a macro scale model of economic development characterized by a particular pattern of relations between mass production mass consumption and national state regulation From the late 1960s however it became increasingly clear that Fordism as a macro scale model of advanced capitalist development was reaching its limits

State Aid and the European Economic Constitution Francesco de Cecco, 2012-12-14 Recent years have seen the rise of EU State aid law as a crucial component of the European economic constitution To date however the literature has neglected the contribution of this area of EU law to the internal market This book seeks to fill this gap in our understanding of the economic constitution by exploring the significance of State aid law in addressing questions that go to the core of the internal market project It does so by examining the case law relating to three different activities that Member States engage in market participation

market regulation and funding for Services of General Economic Interest Each of these areas offers insights into fundamental questions surrounding the economic constitution such as the separation between the State and the market the scope for Member States to engage in regulatory competition and the tension between market and nonmarket concerns European Community Law and the Automobile Industry Christoforus Swaak,1999-01-21 The question whether the European Community should intervene in the economic process and if so to what extent has been the subject of public debate for many years This study describes and gives an analysis of the manner and extent to which the European Community intervenes in the automobile industry through legal measures The focus is on those provisions of the EC Treaty and the multiple Community legal measures that constitute the Community legal framework within which the automobile industry must operate This study gives an introduction to the automobile industry and the EC Treaty and examines a selection of the multiple Community measures that have significant implications for the automobile industry Important examples of such measures are the rules on type approval registration of automobiles roadworthiness tests internal taxation environment the common rules on imports and exports distribution and servicing state aid measures concentrations and cooperation the various Community measures aimed at strengthening the competitiveness of the Community s automobile industry This study shows that the Community and the Commission in particular is increasingly making use of the various competences provided by the EC Treaty to intervene in the automobile industry This development is further stimulated by the gradual internationalisation or even globalisation of the world economy In addition this study indicates that there is a need for a much more unambiguous coherent and transparent legal framework within which the automobile industry must operate

essays give deeper meaning to many events principles and issues which have had far reaching implications for European integration including the following the crucial principles made clear by the ECJ in Van Gend andamp Loos in 1963 the place of fundamental rights in a supranational legal order tensions to be resolved through political and legal means exclusive shared and supporting competences the gradual rise of principles such as subsidiarity and proportionality the precautionary principle the legitimacy and authority of the ECJ the extent to which fundamental freedoms have become fundamental rights the procedural rules of European competition policy enforcement state aid under EC Treaty Article 87 1 the case for harmonization of private law social policy and equal treatment institutional balance the EU as global actor the evolution of the EU Charter of Fundamental Rights and the Constitutional Treaty The European Union is a dynamic legal order and continues to face myriad challenges and dilemmas as it expands its membership and considers a European constitution This concentrated summary of the most important issues in forty years of legal developments reveals both the lasting triumphs along the way and the gaps that require urgent attention if the legitimacy of the Union is not to be impaired Participants in European law and government from citizens and students to the highest levels of policy making will find here an invaluable resource for the future and much food for thought These articles were first presented at a conference held at the end of 2003 to mark the 40th anniversary of the Common Market Law Review and were originally published in a special issue of the Review
