we need to reclaim finance for the common good The reputation of the financial industry could hardly be worse than it is today in the painful aftermath of the 2008 financial crisis New York Times best selling economist Robert Shiller is no apologist for the sins of finance he is probably the only person to have predicted both the stock market bubble of 2000 and the real estate bubble that led up to the subprime mortgage meltdown But in this important and timely book Shiller argues that rather than condemning finance we need to reclaim it for the common good He makes a powerful case for recognizing that finance far from being a parasite on society is one of the most powerful tools we have for solving our common problems and increasing the general well being We need more financial innovation not less and finance should play a larger role in helping society achieve its goals Challenging the public and its leaders to rethink finance and its role in society Shiller argues that finance should be defined not merely as the manipulation of money or the management of risk but as the stewardship of society's assets He explains how people in financial careers from CEO investment manager and banker to insurer lawyer and regulator can and do manage protect and increase these assets He describes how finance has historically contributed to the good of society through inventions such as insurance mortgages savings accounts and pensions and argues that we need to envision new ways to rechannel financial creativity to benefit society as a whole Ultimately Shiller shows how society can once again harness the power of finance for the greater good
