Mechanical Fatigue of Metals José A.F.O. Correia, Abílio M.P. De Jesus, António Augusto Fernandes, Rui Calçada, 2019-05-07 This volume contains the proceedings of the XIX International Colloquium on Mechanical Fatigue of Metals held at the Faculty of Engineering of the University of Porto Portugal 5 7 September 2018 This International Colloquium facilitated and encouraged the exchange of knowledge and experiences among the different communities involved in both basic and applied research in the field of the fatigue of metals looking at the problem of fatigue exploring analytical and numerical simulative approaches Fatigue damage represents one of the most important types of damage to which structural materials are subjected in normal industrial services that can finally result in a sudden and unexpected abrupt fracture Since metal alloys are still today the most used materials in designing the majority of components and structures able to carry the highest service loads the study of the different aspects of metals fatigue attracts permanent attention of scientists engineers and designers

**Corrosion Fatigue Mechanics, Metallurgy, Electrochemistry and Engineering , Probabilistic fracture mechanics and reliability** J.W. Provan, 2013-04-17 With the advent of the 80 s there has been an increasing need for analytic and numerical techniques based on a thorough understanding of microstructural processes that express in a manner suitable for practicing engineers the reliability of components and structures that are being subjected to degradation situations Such situations fall within the framework of fracture mechanics fatigue corrosion fatigue and pitting corrosion Luckily such techniques are now being developed and it was felt timely to combine in one volume reports by the leaders in this field who are currently making great strides towards solving these problems Hence the idea of this monograph was born and I am pleased to be associated both with it and the contributors whose chapters are included in this volume A very large part of the credit for this monograph must go to the authors who have taken time out from their busy schedules to prepare their submissions They have all worked diligently over the last few months in order to get their manuscripts to me on time and I sincerely thank them for their help throughout the preparation of this volume
