EDI and Data Networking in the Public Sector Kim Viborg Andersen, 2012-12-06 When researching teaching or working with information systems in the public sector one is left with few or often no textbooks that provide useful case studies or surveys on the implementation and effects of integrating information technologies in the organizations operations This is surprising since in most first world countries the public sector consumes a substantial part of the gross national product Even more astonishing is the vast amount of financial and organizational resources that are spent developing and implementing various information systems We decided to write this book to provide information for those studying information systems at business schools information and computer departments at colleges universities and for those working hands on with EDI and data networking in public administration Thus our primary target groups for this book are professionals training MA courses computer science MBA MP A and political science EDI has been seen as a means to wire the various policy areas in the public sector Those included are not limited strictly to the public organizations but extend to their trade partners Also government has sought ways to stimulate the usage of EDI in the private sector beyond those transactions involving direct communication with the public sector In this book we have contributors from eight countries and a total of 14 chapters reporting on issues of importance when developing and implementing EDI when government wants to stimulate the diffusion of EDI in society and when organizations want to address the impact of their investments in ED

Networks and Practices of Connoisseurship in the Global Eighteenth

Century Valérie Kobi, Kristel Smentek, Chonja Lee, 2023-12-31 The 18th century was the age of the connoisseur. It was also an era of an expanding global consciousness born of accelerating trade and imperial conquest. This volume puts into dialogue the consolidation of connoisseurship as an empirical mode of artistic analysis in Europe and Asia and the increasing exposure to different modes of artmaking facilitated by local and global networks over the course of the long 18th century. Focusing on exchanges between India, Japan, China, and Europe, the contributors to this volume examine the complex and nuanced impacts on connoisseurial practice of encounters with artworks from different regions of the globe, the international networks that made those encounters possible, and the intricate transactions through which connoisseurial knowledge of art was generated. Expansive focus on practices and networks in India, Japan, and Europe in the 18th century. Complexities and asymmetries of connoisseurship in an expanding world. **The Routledge International Handbook of Digital Social Work** Antonio López Peláez, Gloria Kirwan, 2023-06-13 This handbook provides an authoritative and cutting edge overview of current research and trends related to the emerging field of digital technology and social work.
