*Understanding PISA's Attractiveness* Florian Waldow, Gita Steiner-Khamsi, 2019-05-02 Understanding PISA's Attractiveness examines how policy makers and the media interpret the results of PISA league leaders losers and slippers in ways that suit their own reform agendas As a result a myriad of explanations exist as to why an educational system is high or low performing The chapters written by leading scholars from Australia Austria Denmark Finland Germany Norway Singapore South Korea Spain Sweden Taiwan the UK and the USA provide a fascinating account of why results from PISA and other international large scale assessments are interpreted and translated differently in the various countries The analyses in this book bring to light the wide array of idiosyncratic projections into these international tests In some countries these tests are also used to scandalise one's own educational system and to generate quasi external reform pressure Compiled by two leading scholars in comparative education Florian Waldow and Gita Steiner Khamsi this book offers a truly global perspective on the uses and abuses of PISA and will be of great interest to students and academics working in educational policy comparative education and political science and those working on large scale data sets

**Integration of Vocational Education and Training Experiences** Sarojni Choy, Gun-Britt Wärvik, Viveca Lindberg, 2018-06-19 This book draws on experiences from a range of vocational education systems in different nation states and re-examines the purpose of providing experiences outside educational institutions the kinds and extent of those experiences and efforts made to ensure the integration of students' experiences across sites Analyses of the various vocational education systems their purposes and practices across nations and challenges

experienced by different stakeholders illustrate different approaches to the integration of learning at different sites. The book includes a consideration of what constitutes the integration and reconciliation of experiences and their attendant educational implications. This extends an appraisal of the concepts of integration, reconciliation, curriculum, and work readiness, each of which has a range of connotations. Integration or reconciliation is differentiated from transfer of learning, which is commonly based on simple assumptions that the educational institutions will provide theory and that the workplaces will provide practice from the workplaces and that the two can be easily linked by students. The contributions from different nation states clearly demonstrate that integration is a collaborative process and requires the agency of stakeholders operating at global, national, and specific learning site levels.

**The Hegemony of Growth** Matthias Schmelzer, 2016-05-17 In modern society, economic growth is considered to be the primary goal pursued through policymaking. But when and how did this perception become widely adopted among social scientists, politicians, and the general public? Focusing on the OECD, one of the least understood international organisations, Schmelzer offers the first transnational study to chart the history of growth discourses. He reveals how the pursuit of GDP growth emerged as a societal goal and the ways in which the methods employed to measure, model, and prescribe growth resulted in statistical standards, international policy frameworks, and widely accepted norms. Setting his analysis within the context of capitalist development, post-war reconstruction, the Cold War, decolonization, and industrial crisis, *The Hegemony of Growth* sheds new light on the continuous reshaping of the growth paradigm up to the neoliberal age and adds historical depth to current debates on climate change, inequality, and the limits to growth.
