**Education in a Federal UK** John

Furlong, Ingrid Lunt, 2019-10-23 Britain's two recent referenda on Brexit 2016 and on Scottish independence 2014 have raised in the public mind fundamental questions about the future of the UK. It seems that for the first time the public, the media and the political elite have woken up to the fact that in different parts of the UK there are different histories, different aspirations and different imagined futures in relation to a whole range of vitally important political issues. But what the public debate often fails to recognise is that in many areas of public life, perhaps especially education, the UK is already a federal state and in key respects has been so for many years. The aim of this volume is therefore to take stock to try and capture what the current state of educational policy and practice is across the whole of the UK. This has been achieved by commissioning two different papers from each of the four countries: Wales, Scotland, Northern Ireland and England. The first is an overview exploring the distinctive history, principles and current policies of each country. The second paper has been specifically chosen as a case study of a key policy that highlights the distinctiveness of each country: the Foundation Phase for Wales, assessment policy in Scotland, shared education initiatives in Northern Ireland and higher education policy in England. Taken together, these eight papers give an important insight into the complexities of educational policy and practice across the whole of the UK today. This volume was originally published as a special issue of *Oxford Review of Education*.

*Bibliographie Internationale de Science Politique*, 2002-12 IBSS is the essential tool for librarians, university departments, research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences.

**Policy-making and Policy Learning in 14-19 Education** David Raffe, Ken Spours, 2007 In recent years 14-19 education has been the subject of numerous reviews, innovations and policy changes. What can be learnt from this experience and do current policies incorporate this learning? In this book leading experts on 14-19 education and training explore the concept of policy learning and examine recent policies and policy making in England and Scotland. They focus on three main types of policy learning: learning from the experience of earlier policies; learning from local innovations; and learning from comparisons with other countries, including home international comparisons within the UK. They suggest that in order to meet current challenges in 14-19 education it is not only the policies that need to change but also the way in which policies are made. The book concludes by arguing that only a participative approach to policy making, bringing together policy makers, practitioners and researchers, can form the basis of a comprehensive strategy for improved policy learning. This book will be of interest to all those involved in or affected by policy making in the increasingly high profile and politically charged field of 14-19 education. This book contains a list of contributors, a preface, a list of acknowledgements and the following essays: 1. Three Models of Policy Learning and Policy making in 14-19 Education David Raffe and Ken Spours; 2. Policy Memory and Policy Amnesia in 14-19 Education: Learning From the Past Jeremy Higham and David Yeomans; 3.
