The FTC Cigarette Test Method for Determining Tar, Nicotine and Carbon Monoxide Yields of U. S. Cigarettes

Donald R. Shopland, 1997-07 A review of the U S Federal Trade Commission FTC method for determining tar nicotine and carbon monoxide levels in U S cigarettes by the National Cancer Institute with contributions from an expert panel of medical legal and tobacco industry personnel Focuses on the health effects of the components of cigarette smoke with discussions on consumer smoking patterns and perceptions of FTC labeling of tar and nicotine ratings Examines the FTC testing parameters with recommendations for changes to those parameters and to labeling Tables graphs and references *The FTC Cigarette Test Method for Determining Tar, Nicotine, and Carbon Monoxide Yields of U. In response to the emerging scientific evidence that cigarette smoking posed a significant health risk to the user in the early 1950 s the major cigarette manufacturers began widespread promotion of filtered cigarettes to reassure smokers that regardless of whatever unhealthy constituents were in cigarette smoke filters were a scientific breakthrough Advertisements for Viceroy s health guard filter stated DENTISTS ADVISE Smoke VICEROYS The Nicotine and Tars Trapped by The Viceroy Filter CAN NEVER STAIN YOUR TEETH and Leading N Y Doctor Tells His Patients What to Smoke Filtered Cigarette Smoke Is Better For Health The Nicotine and Tars Trapped Cannot Reach Mouth Throat Or Lungs Chesterfield was Best for you low in nicotine highest in quality while L M s were Just What the Doctor Ordered Lorillard Tobacco Company stressed its science based Kent micronite filter the original micronite filter was made of asbestos and claimed it removed seven times more tar and nicotine than any other cigarette which put Kent in a class all by itself where health protection is concerned Of course we know today that not only were these claims patently false but the cigarette companies knew it In the early 1950 s the Federal Trade Commission FTC challenged a variety of health claims made for cigarettes in their advertising including claims about tar and nicotine In 1955 FTC published advertising guidelines that among other things prohibited claims by cigarette manufacturers that a particular brand of cigarettes was low in tar and nicotine or lower than other brands when it had not been established by competent scientific proof that the claim was true and the difference was significant Cigarette manufactures however continued to advertise tar numbers In the absence of a standardized test methodology this resulted in what is referred to as a tar derby a multitude of inconsistent noncomparable claims that did not give consumers a meaningful opportunity to assess the relative tar delivery of competing brands The tar derby ended in 1960 when discussions with FTC culminated in an industry agreement to refrain from tar and nicotine advertising In 1966 however the U S Public Health Service PHS prepared a technical report on tar and nicotine that concluded The preponderance of scientific evidence strongly suggests that the lower the tar and nicotine content of cigarette smoke the less harmful would be the effect In reaching this conclusion the report noted the clear relationship between dose of cigarette smoke received by the smoker and disease risk Regardless of how

dose was calculated by number of cigarettes smoked per day age of initiation total number of years one smoked or depth of inhalation mortality rates among smokers increased When smokers quit smoking their risk was reduced in proportion to the length of time off cigarettes

Tobacco or Health? Knut-Olaf Haustein, 2013-03-14 Science tends to generalize and generalizations mean simplifications And generalizations are also more satisfying to the mind than details Of course details and generalizations must be in proper balance Generalizations can be reached only from details while it is the generalization which gives value and interest to the detail A Szent Gyorgy Science 1964 The first edition of this book published in German as *Tabak abh ngigkeit* in 2001 was prompted by the fact that no single volume was available in Germany or elsewhere summarising the adverse repercussions of cigarette smoking on human health As far as my own research was able to ascertain the last

comprehensive work dealing with this subject was written in Germany by the Dresden internist F Lickint whose *Tabak und Organismus* was published in 1939 by the Hippokrates Verlag. All subsequent monographs in this field have tended to focus on detailed aspects and there has been no shortage of publications on subjects such as how smokers can quit smoking, healthy eating for smokers etc. Friends and colleagues abroad have urged me to prepare an English language version of *Tabakabhängigkeit*. In gladly complying with this suggestion I have intentionally prepared an updated and slightly enlarged new edition taking account of the rapidly proliferating literature on the subject up to the start of 2002. The harmful sequelae of smoking are played down by politicians in many industrialised countries including Germany. Can Tobacco Cure Smoking? United States. Congress. House. Committee on Energy and Commerce. Subcommittee on Commerce, Trade, and Consumer Protection, 2003. The title of our hearing *Can Tobacco Cure Smoking* at first blush seems counterintuitive. However, there is an increasing amount of research suggesting that some tobacco products are less harmful than others. For those smokers who can't seem to quit smoking, switching to a less hazardous product could save lives. Today we will hear from a diverse group of experts espousing a range of opinions on issues of tobacco harm reduction. We worked closely with the minority to insure a fair and balanced panel of witnesses that can speak to the science of this issue. Page 2. *Trade and Public Health* Benn McGrady, 2011-03-31. Non-communicable diseases associated with risk factors such as tobacco consumption, poor diet and alcohol use represent a growing health burden around the world. The seriousness of non-communicable diseases is reflected in the adoption of international instruments such as the WHO Framework Convention on Tobacco Control, the WHO Global Strategy on Diet, Physical Activity and Health and the WHO Global Strategy to Reduce the Harmful Use of Alcohol. In line with these instruments, states are beginning to use measures such as taxes, restrictions on marketing, product regulation and labeling measures for public health purposes. This book examines the extent to which the law of the World Trade Organization restricts domestic implementation of these types of measures. The relationship between international health instruments and the WTO Agreement is examined as are the WTO covered agreements themselves.
