

# Face Painting: Beginner's Guide to Mixing Colours

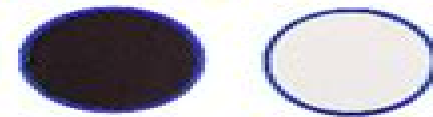

For Beginners, start out with a palette that has black, white and the primary colours- red, blue and yellow. With these colours, you can mix whatever colour you need and this will give you great practice.

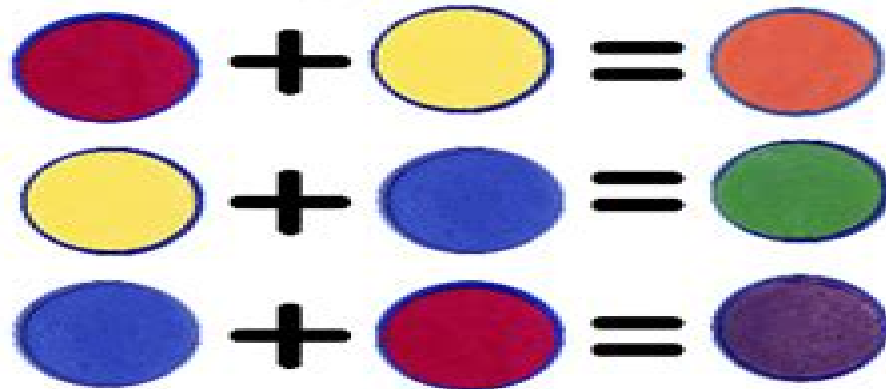

## Primary Colours

## Black & White

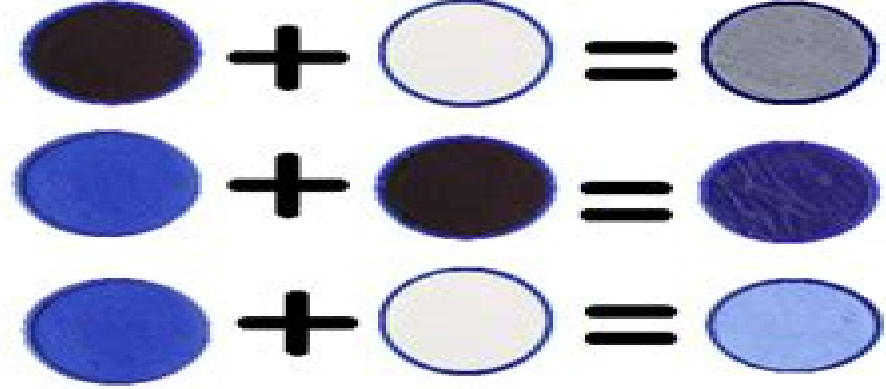

## Primary Colour Mixes

By mixing varying amounts of the 3 primary colours, you can get different shades of browns.

## Darkening & Lightening

Mix in varying amounts of black and white to get different shades of grey. To make a colour lighter, just mix in white and to make it darker, just mix in black.

Then once you have started painting quite often you'll start to notice that you'll need certain colours more so than the others and you can buy these specific colours and add it to the palette
