generalized hypergeometric function and other functions in infinite series of Jacobi and Chebyshev polynomials of the first kind Numerical coefficients for Chebyshev expansions of the more common functions are tabulated Other chapters contain polynomial and rational approximations for certain class of G functions the coefficients in the early polynomials of these rational approximations and the Pad approximations for many of the elementary functions and the incomplete gamma functions The remaining chapters describe the development of analytic approximations and expansions This book will prove useful to mathematicians advance mathematics students and researchers     Approximation and Function Spaces Zbigniew
