Renascence ,1984 **Whitaker's Five-year Cumulative Book List** ,1968 **The Sublime** Karl Axelsson,2007 The appeal of the sublime in the minds of British critics and poets during the eighteenth century holds a unique position in the history of aesthetics At no other time has aesthetics displayed a similar interest in the experience of the sublime This book explores the impulses behind the fascination for that experience The Greek treatise *Peri Hupsous* by Longinus constitutes the earliest source for the experience of the sublime and as such it shaped much of British eighteenth century criticism But the attraction of the sublime received stimulus from other sources as well In the effort to expand the context of the sublime the author considers the incentives provided not only by Longinus but also by the criticism of intellectual literature during the second half of the seventeenth century a body of criticism that was not primarily concerned with the sublime but which nevertheless served as an important link to its subsequent appeal *The Geography of Money* Benjamin J. Cohen,1998 The traditional assumption holds that the territory of money coincides precisely with the political frontiers of each nation state France has the franc the United Kingdom has the pound the United States has the dollar But the disparity between that simple mental landscape and the actual organization of currency spaces has grown in recent years as territorial boundaries of individual states limit currency circulation less and less Many currencies are used outside their home country for transactions either between nations or within foreign states In this book Benjamin J Cohen asks what this new geography of

money reveals about financial and political power Cohen shows how recent changes in the geography of money challenge state sovereignty He examines the role of money and the scope of cross border currency competition in today s world Drawing on new work in geography and network theory to explain the new spatial organization of monetary relations Cohen suggests that international relations political as well as economic are being dramatically reshaped by the increasing interpenetration of national monetary spaces This process he explains generates tensions and insecurities as well as opportunities for cooperation

Figures of the World Christopher Laing Hill,2020-07-15 Figures of the World The Naturalist Novel and Transnational Form overturns Eurocentric genealogies and globalizing generalizations about world literature by examining the complex contradictory history of naturalist fiction Christopher Laing Hill follows naturalism s emergence in France and circulation around the world from North and South America to East Asia His analysis shows that transnational literary studies must operate on multiple scales combine distant reading with close analysis and investigate how literary forms develop on the move The book begins by tracing the history of naturalist fiction from the 1860s into the twentieth century and the reasons it spread around the world Hill explores the development of three naturalist figures the degenerate body the self liberated woman and the social milieu through close readings of fiction from France Japan and the United States Rather than genealogies of European influence or the domination of cultural peripheries by the center novels by mile Zola Tayama Katai Frank Norris and other writers reveal conspicuous departures from metropolitan models as writers revised naturalist methods to address new social conditions Hill offers a new approach to studying culture on a large scale for readers interested in literature the arts and the history of ideas
