*IISSIIDIOLOGY Vol 1. Interaction of Information and Energy as the Primary Cause for origination of the Creative Activity of Self-Consciousness Focus and the Macrocosmos in whole* Oris Oris, 2014-07-01 This book presents the beginning of an overall 20 volume information series titled The Good News which consists of Iissiidiology Fundamentals Commentaries to Fundamentals and author s Song lyrics with a highly spiritual content written to popular and all loved melodies From the very beginning the author pinpoints the reader s attention upon fundamental notions of Iissiidiology starting from basic axiomatic Conceptions The book contains the newest interpretation of formation of the outer reality based on the Self Consciousness Focus Dynamics as the main functional mechanism of the Macrocosmos Creative Activity A detailed comparison of the author s hypotheses with existing scientific conceptions allows to draw parallels with the current worldviews about nature space time energy and to find the ways for their radical transformation and potential development In this volume the author introduces the conceptual foundation necessary for an adequate understanding of all other Iissiidiology books of this series Hierarchy of Self Consciousness Levels dimensional differentiation of manifestation Forms classification of elementary and other particles as structural components of the Universal Plasmic Differentiation

Emission information theory of the formation of Energy in the Macrocosmos are described in order to form necessary notions that will serve as the basis for further more complex iissiidiologic Categories Universal Cosmic Laws and their Principles Diapasons of Plasmic Forces Evolutional and Involutional Branches of development and many others The first volume of Fundamentals is the required minimum for any reader who wants to thoroughly study iissiidiologic conceptions The ^AHistory of Neuroscience in Autobiography Volume 6 Larry R Squire,2008-12-12 The sixth volume of The History of Neuroscience in Autobiography is a collection of a autobiographical essays by notable senior scientists who discuss the major events that shaped their discoveries and their influences as well as people that inspired them and help shape their careers as neuroscientists Each entry also includes a complete CV so that the interested reader may see their rise through the ranks as they achieved some of the highest honors in neuroscience *Encyclopedia of Neuroscience, Volume 1* Larry R. Squire,2009-06-12 The Encyclopedia of the Neuroscience explores all areas of the discipline in its focused entries on a wide variety of topics in neurology neurosurgery psychiatry and other related areas of neuroscience Each article is written by an expert in that specific domain and peer reviewed by the advisory board before acceptance into the encyclopedia Each article contains a glossary introduction a reference section and cross references to other related encyclopedia articles Written at a level suitable for university undergraduates the breadth and depth of coverage will appeal beyond undergraduates to professionals and academics in related fields Brain Function and Oscillations Erol Başar,2012-12-06 by W J Freeman These two volumes on Brain Oscillations appear at a most opportune time As the Decade of the Brain draws to its close brain science is coming to terms with its ultimate problem understanding the mechanisms by which the immense number of neurons in the human brain interact to produce the higher cognitive functions The ideas concepts methods interpretations and examples which are presented here in voluminous detail by a world class authority in electrophysiology summarize the intellectual equipment that will be required to construct satisfactory solutions to the problem Neuroscience is ripe for change The last revolution of ideas took place in the middle of the century now ending when the field took a sharp turn into a novel direction During the preceding five decades the prevailing view carried forward from the 19th century was that neurons are the carriers of nerve energy either in chemical or electrical forms Freeman 1995 That point of view was enormously productive in terms of coming to understand the chemical basis for synaptic transmission the electrochemistry of the action potential the ionic mechanisms of membrane currents and gates the functional neuroanatomy that underlies the hierarchy of reflexes and the neural fields and their resonances that support Gestalt phenomena No better testimony can be given of the power of the applications of this approach than to point out that it provides the scientific basis for contemporary neurology neuropsychiatry and brain imaging *The Biology of Alcoholism* Benjamin Kissin,Henri Begleiter,2012-12-06 Alcoholism is a uniquely human condition Although some forms of alcohol dependence can be induced experimentally in a variety of laboratory animals the complete spectrum of alcoholism with all of its physical psychological and social implications occurs

only in man The special quality of this relationship becomes more significant when one considers that the manifestations of most physical disease syndromes in animals and man are more similar than they are different The uniqueness of alcoholism lies in the fact that it is one of the few physical diseases which reflects at all levels the problems of individuals coping with the complexities of human society In order to present a more coherent picture of these complex relationships we have attempted to impose a logical sequence upon the material This sequence lies along a dual parameter from the physical to the social and from the theoretical to the empirical Consequently it was natural for the first volume in this series to deal with biochemistry the most basic and physical aspect of the interaction of alcohol and man It is equally natural for this the second volume to deal with physiology and behavior for these levels of phenomenology particularly the latter are already more empirical and psychological in their manifestations Finally the third volume clinical pathology describes the disease itself with all of the medical and social implications carried in the word alcoholism
