Frontiers of Consciousness John Warren White,1985 **Frontiers of Consciousness** John White,1974 The Nature of Consciousness, the Structure of Reality Jerry Davidson Wheatley,2001 This book describes how understanding the structure of reality leads to the Theory of Everything Equation The equation unifies the forces of nature and enables the merging of relativity with quantum theory The book explains the big bang theory and everything else **The Illusion of Will, Self, and Time** Jonathan Bricklin,2015-06-01 A Seminary Co op Notable Book of 2016 William James is often considered a scientist compromised by his advocacy of mysticism and parapsychology Jonathan Bricklin argues James can also be viewed as a mystic compromised by his commitment to common sense James wanted to believe in will self and time but his deepest insights suggested otherwise Is consciousness already there waiting to be uncovered and is it a veridical revelation of reality James asked shortly before his death in 1910 A century after his death research from neuroscience physics psychology and parapsychology is making the case both theoretically and experimentally that answers James s question in the affirmative By separating what James passionately wanted to believe based on common sense from what his insights and researches led him to believe Bricklin shows how James himself laid the groundwork for this more challenging view of existence The non reality of will self and time is consistent with James s psychology of volition his epistemology of self and his belief that Newtonian objective even flowing time does not exist *Frontiers of Consciousness* John Warren White,1985 *Current Catalog* National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1971 *The Social Organization of Zen Practice* David L.
