Fruit and Vegetable Juice Donald Kiteley Tressler, Maynard Alexander Joslyn, 1954 **Principles and Practices of Small- and Medium-scale Fruit Juice Processing** Richard Pierce Bates, J. R. Morris, Philip G. Crandall, Food and Agriculture Organization of the United Nations, 2001-01-01 While large scale juice processing is the subject of many textbooks this publication aims at the gap in information regarding juice processing at the small and medium scale agro industry level It presents technical and economic information designed to address issues affecting medium size juice processors in developing countries *Fruit Production and Processing Technology* Gabe Carr, 2019-05-19 Fruit Production and Processing Technology is the exciting subject developed in the field and makes accessible to the reader a comprehensive and coherent coverage of the basic needs of orchard management with the principles and techniques of plant regeneration care preservation of fruit A large variety of fruits can be used to obtain by the appropriate technological process different kinds of semi finished product starting from fresh fruits just harvested from field or stored in controlled atmosphere warehouses The ripeness degree the freshness and the cleanness of the raw materials are very important to obtain a high quality juice Fruit is sometimes defined as the product of growth from an angiosperm or flowering plant From a purely botanical point of view the fruit may be only the fleshy growth that arises from the ovary of a flower and may not necessarily include any other structures From the consumer s or food processor s point of view however fruit is generally characterized as the edible product of a plant or tree that includes the seed and its envelope and can typically be described as juicy sweet and pulpy Present book has been designed to provide overall information of principles of fruit production and processing technology *Juice Processing* Victor Falguera, Albert Ibarz, 2014-04-01 The ability to provide quality juices that contain proper vitamins and nutritional components strongly depends on the processes fruits undergo during the various stages of industrial manufacturing New technologies have been developed to help ensure the production of quality juices without neglecting safety Covering both new approaches to traditional issues and innovative processes Juice Processing Quality Safety and Value Added Opportunities addresses various aspects of fruit juice processing and other issues related to the use of by products generated in this industry The book begins with a chapter highlighting the importance of the fruit juice sector and describing the general process of fruit juice manufacturing The text explores current trends in juice production reviews the main superfruits and discusses methods for using juice waste by products presenting citrus and grape juice as examples The book covers assessing juice quality and authenticity and how to evaluate fruit properties using the principles of rheology as well as examining sensory attributes It also examines alternative techniques for improving fruit juice quality including both thermal and nonthermal emerging technologies their fundamentals and their main effects on important features of fruit

juices Emphasizing product quality safety and nutrition the chapter on juice packaging summarizes the materials techniques and technologies currently used as well as novel packaging for increasing shelf life and decreasing environmental impact The authors address issues concerning spoiling microorganisms and biological and chemical hazards They also examine public and private standards and regulations which need to be reworked to keep up with today s food related concerns **Fruit Juice Processing Technology and Exportation** G. K. O. Abdul-Rasheed,1990 Production and Packaging of Non-Carbonated Fruit Juices and Fruit Beverages Philip R. Ashurst,2013-11-09 In the period of about five years since the first edition of this book appeared many changes have occurred in the fruit juice and beverage markets The growth of markets has continued blunted to some extent no doubt by the recession that has featured prominently in the economies of the major consuming nations But perhaps the most significant area that has affected juices in particular is the issue of authenticity Commercial scandals of substantial proportions have been seen on both sides of the Atlantic because of fraudulent practice Major strides have been made in the development of techniques to detect and measure adulterants in the major juices A contribution to Chapter 1 describes one of the more important scientific techniques to have been developed as a routine test method to detect the addition of carbohydrates to juices Another and perhaps more welcome development in non carbonated beverages during the past few years is the rapid growth of sports drinks Beverages based on glucose syrup have been popular for many years and in some parts of the world isotonic products have long featured in the sports arena A combination of benefits is now available from a wide range of preparations formulated and marketed as sports drinks and featuring widely in beverage markets world wide A new chapter reviews their formulation and performance characteristics Another major trend in the area of fruit containing non carbonated beverages is the highly successful marketing of ready to drink products **Handbook of Food Products Manufacturing, 2 Volume Set** Nirmal K. Sinha,2007-04-27 The Handbook of Food Products Manufacturing is a definitive master reference providing an overview of food manufacturing in general and then covering the processing and manufacturing of more than 100 of the most common food products With editors and contributors from 24 countries in North America Europe and Asia this guide provides international expertise and a truly global perspective on food manufacturing *Processing Fruits* Laszlo Somogyi,Diane M. Barrett,Y. H. Hui,1996-05-31 This Publication presents information about the latest developments in fruit processing Volume 2 covers the important processed fruit and nut commodities and discusses the process technologies applied to them The reader will find representative examples for each major fruit category including pome fruits drupe fruits grapes and other berries citrus and other tropical and subtropical fruits oil fruits and nuts The global character of the fruit industry is confirmed by the participation of contributing authors from six countries each of the authors has first hand academic research or industrial experience related to their topics We have made a concerted effort to provide the reader with comprehensive and current information on a wide variety of fruits and processes **Fruit Manufacturing** Jorge E. Lozano,2006-11-28 Emphasizing the

products rather than the processes this is the first book to encompass quality changes during processing and storage of fruit in the food industry It presents the influence on a fruit product s quality in relation to the different processing methods from freezing to high temperature techniques It also discusses the origin of deterioration kinetics of negative reactions and methods for inhibition and control of the same

Chemistry and Technology of Soft Drinks and Fruit Juices Philip R. Ashurst,2016-04-11 Soft drinks and fruit juices are produced in almost every country in the world and their availability is remarkable From the largest cities to some of the remotest villages soft drinks are available in a variety of flavours and packaging Over the last decade soft drinks and fruit juices have been the subject of criticism by the health community and there is considerable pressure on beverage manufacturers to reduce or even remove the sugar content of these products Chemistry and Technology of Soft Drinks and Fruit Juices Third Edition provides an overview of the chemistry and technology of soft drinks and fruit juices covering ingredients processing microbiology traceability and packaging as well as global market trends This fully revised edition now includes chapters on topics that have become prominent in the industry since publication of the previous edition namely water use and treatment and microbiology technologies The book is directed at graduates in food science chemistry or microbiology entering production quality control new product development or marketing in the beverage industry or in companies supplying ingredients or packaging materials to the beverage industry

Bibliography of Agriculture ,1962 Handbook of Food Processing Equipment George D. Saravacos,Athanasios E. Kostaropoulos,2012-12-06 Recent publications in food engineering concern mainly food process engineering which is related to chemical engineering and deals primarily with unit operations and unit processes as applied to the wide variety of food processing operations Relatively less attention is paid to the design and operation of food processing equipment which is necessary to carry out all of the food processes in the food plant Significant technical advances on processing equipment have been made by the manufacturers as evidenced by the efficient modern food processing plants There is a need to relate advances in process engineering to process equipment and vice versa This book is an attempt to apply the established principles of transport phenomena and unit operations to the design selection and operation of food processing equipment Since food processing equipment is still designed empirically due to the complexity of the processes and the uncertainty of food properties description of some typical industrial units is necessary to understand the operating characteristics Approximate values and data are used for illustrative purposes since there is an understandable lack of published industrial data

Fruit Processing D. Arthey,P.R. Ashurst,2012-12-06 Fruit and fruit products in all their many varieties and variations are major world commodities and part of the economic life blood of many countries particularly in the developing world The perception of the healthy nature of fruit is a major reason for its increased consumption in the developed world and many consumers today find a wider selection of fruit varieties available at all times of the year than ever before This volume however is not so much concerned with fresh fruit as those principal areas of processing to which it may be subjected Fruit processing arose as a means of utilising a short lived product and preserving its essential nutritional qualities as far as possible A chapter on the nutritional aspects of fruit is included in this work to reflect the importance of

this topic to most consumers After a general introduction the chapter on fruit storage is the only contribution which deals with a process from which fruit emerges in essentially the same physical condition Beyond that the book sets out to cover most of the major areas in which fruit may be processed into forms which bear varying semblances to the original raw material

Processing Fruits Diane M. Barrett, Laszlo Somogyi, Hosahalli S. Ramaswamy, 2004-08-30 The new edition of this highly acclaimed reference provides comprehensive and current information on a wide variety of fruits and processes Revised and updated by an international team of contributors the second edition includes the latest advances in processing technology scientific research and regulatory requirements Expanded coverage includes fresh cut fruits non thermal methods of fruit processing and more information on the effects of variety and maturity on processed product quality It presents a wide range of information on fruits and fruit products and covers traditional as well as the newest technologies
