Economic Behavior & Legal Institutions

An Introductory Survey

Economic Behavior And Legal Institutions

Jin-Ying Zhang

Economic Behavior And Legal Institutions:

Economic Behavior and Legal Institutions Lars Werin, 2003 This book presents a unified picture of the full economic legal system based on results within the novel fields of new institutional economics and law and economics *Economic Behavior And Legal Institutions: An Introductory Survey* Lars Werin, 2003-04-25 Markets would not function unless supported by a legal framework That framework is no self contained exogenous structure it has evolved in response to the demands of economic activity There are laws made to modify or supplement market behavior in an attempt to produce the desired outcomes Such laws are often called forth by political ambitions to change the distribution of wealth channeled through the political process Thus economic life and law are strongly interrelated There is neither a pure economic system unaffected by law nor a legal system possible to understand without regard for its interplay with economic behavior Still such a compartmentalization has dominated the perspectives of both economics and legal studies This invaluable book presents a unified picture of the full economic legal system based on results within the novel fields of new institutional economics and law and economics It is carefully argued and written in a non technical style albeit with no attempts to avoid deep theory It is primarily aimed at students of economics just beyond their introductory course and students of law in the middle or towards the end of their studies It can also be of great use to both economists on a more advanced level and lawyers looking for a thought provoking survey of an exciting new sphere of ideas

The Oxford Handbook of Behavioral Economics and the Law Eyal Zamir, Doron Teichman, 2014-09-16 The past twenty years have witnessed a surge in behavioral studies of law and law related issues These studies have challenged the application of the rational choice model to legal analysis and introduced a more accurate and empirically grounded model of human behavior This integration of economics psychology and law is breaking exciting new ground in legal theory and the social sciences shedding a new light on age old legal questions as well as cutting edge policy issues The Oxford Handbook of Behavioral Economics and Law brings together leading scholars of law psychology and economics to provide an up to date and comprehensive analysis of this field of research including its strengths and limitations as well as a forecast of its future development Its 29 chapters organized in four parts The first part provides a general overview of behavioral economics The second part comprises four chapters introducing and criticizing the contribution of behavioral economics to legal theory The third part discusses specific behavioral phenomena their ramifications for legal policymaking and their reflection in extant law Finally the fourth part analyzes the contribution of behavioral economics to fifteen legal spheres ranging from core doctrinal areas such as contracts torts and property to areas such as taxation and antitrust policy

Environmental and Natural Resources Economics Steven Hackett, Sahan T. M. Dissanayake, 2014-12-18 Extensively revised and updated this popular text presents an accessible yet rigorous treatment of environmental and natural resources economics including climate change and the economics of sustainability Completely revised and updated the fourth edition now includes new figures and tables

definitions to assist the reader and updated policy information New advances in the science economics and policy approaches to climate change have been integrated into essentially all new chapters on incentive regulation and global climate change This innovative textbook integrates economics with science and public policy in a balanced and accessible way that will be appreciated by students from disciplines ranging from economics and natural resources management to environmental studies and energy policy **Institutional Change and Economic Behaviour** J. Kornai,L. Mátyás,G. Roland,2008-02-21

This book explores institutional change and economic behaviour by examining the transition process in the former socialist countries that joined the EU in 2004 looking at the growth occurring in China offering a historical perspective on economic underdevelopment in the Middle East and discussing the neo classical paradigm *Economic Growth And Development (Third Edition)* Hendrik Van Den Berg,2016-09-02 This textbook covers the full range of topics and issues normally included in a course on economic growth and development Both mainstream economic perspectives as well as the multi paradigmatic inter disciplinary and dynamic evolutionary perspectives from heterodox economics are detailed Economic development is viewed in terms of the long run well being of humanity social stability environmental sustainability and just distribution of economic gains not simply as the growth of GDP Furthermore this textbook explicitly recognizes the complexity of economic development by linking economic activity to our broader social and natural environments The textbook s unique feature is its focus on the natural environment Both the historical effects of economic development on the environment and the environmental constraints on future economic development are thoroughly discussed in two chapters on environmental issues and policies In fact because economic development is defined in terms of economic social and environmental sustainability the natural environment is included in discussions throughout the book The textbook is inter disciplinary knowledge from fields such as sociology psychology political science economic history and ecology is called on to enhance the economic analysis A thorough historical account of the development of the principal paradigms of economic development is also included and the important issues of institutional development and cultural change merit their own chapters Two chapters on technological change holistically focus on production technologies as well as the dynamic performance of entire economic social and ecological systems Also the important relationship between economic development and globalization is presented in three chapters on international trade international finance and investment and immigration from both orthodox and heterodox perspectives **Handbook on the Rule of Law** Christopher May,Adam Winchester,2018-08-31 The

discussion of the norm of the rule of law has broken out of the confines of jurisprudence and is of growing interest to many non legal researchers A range of issues are explored in this volume that will help non specialists with an interest in the rule of law develop a nuanced understanding of its character and political implications It is explicitly aimed at those who know the rule of law is important and while having little legal background would like to know more about the norm Usable Theory Dietrich Rueschemeyer,2009 Rueschmeyer shows how to construct theory frames use them to develop valid empirical

hypotheses in the course of empirical social political research Incentives and Economic Behaviour Rolf Hasse,Uwe Vollmer,2016-09-12 No detailed description available for Incentives and Economic Behaviour *Planning for the Unplanned* Aseem Inam,2013-11-26 How do cities plan for the unplanned Do cities plan for recovery from every possible sudden shock How does one prepare a plan for the recovery after a tragedy like the September 11 2001 terrorist attacks on New York The book discovers the systematic features that contribute to the success of planning institutions In cities filled with uncertainty and complexity planning institutions effectively tackle unexpected and sudden change by relying on the old and the familiar rather than the new and the innovative The author argues that planning programs institutions were successful because they were bureaucratic and relied on standardized routines rigorous sets of established regimes familiar programs and institutionalized hierarchies Also contrary to popular perception neither the leaders at the top of the institutions nor those workers at the grassroots level were the most important in the implementation of such routines The key actors were middle managers because they knew the institutional structures inside out what the routines were and how to use them and were successful go betweens between national governments and grassroots community groups Case studies from Mexico City Los Angeles and New York provide a deeper understanding of urban planning processes The case studies reveal that systematic institutional analysis helps us understand what works in planning and why They also demonstrate the manner in which institutional routines serve as powerful and effective tools for addressing novel situations **Economic Development and Entrepreneurship in Transition Economies** Jovo Ateljević,Jelena Trivić,2016-04-05 This book contributes to a better understanding of entrepreneurship in transition economies Current literature reflects the more traditional schools of thought on entrepreneurship which are influenced by the Western perspective and fail to fully address the scenario in transition economies There is a broad consensus among academics policy makers and practitioners that a fundamental cause of difficulties experienced by most economies in transition has been the fact that reform has not been accompanied by the creation of new private businesses and particularly SMEs This is especially evident in states created in Europe after the dissolution of the Soviet Union where many barriers which were inherited from the old system remain in place thus inhibiting entrepreneurial progress in these countries despite a favorable political and economic environment The contributions featured in this book focus on how much progress has been achieved so far with regard to these aspects as well as identify which current barriers and issues still need to be resolved Themes include innovation performance financing venture capital educational factors and entrepreneurial learning **Introduction to Comparative Law** Jaakko Husa,2023-05-18 A delightful and fresh approach to the comparative study of law Jans Smits Maastricht University the Netherlands of the first edition This textbook presents a clear and thought provoking introduction to the study of comparative law The book provides students with in depth analyses of the major global comparative methodologies and theories Written in a lively style it leads the student through debates in comparative legal scholarship both in the Western world and in the lesser studied

jurisdictions beyond Europe and North America The second edition includes a revised structure to help the student understand the subject an updated introductory chapter and new material on legal transplants and globalisation It also explores allied disciplines including linguistics history and post colonial studies giving students full context of the subject

The Architecture of Illegal Markets Jens Beckert, Matías Dewey, 2017-07-26 From illegal drugs stolen artwork and forged trademarks to fraud in financial markets the phenomenon of illegality in market exchanges is pervasive Illegal markets have great economic significance have relevant social and political consequences and shape economic and political structures Despite the importance of illegality in the economy the field of economic sociology unquestioningly accepts the premise that the institutional structures and exchanges taking place in markets are law abiding in nature This volume makes a contribution to changing this Questions that stand at the centre of the chapters are What are the interfaces between legal and illegal markets How do demand and supply in illegal markets interact What role do criminal organizations play in illegal markets What is the relationship between illegality and governments Is illegality a phenomenon central to capitalism Anchored in economic sociology this book contributes to the analysis and understanding of market exchanges in conditions of illegality from a perspective that focuses on the social organization of markets Offering both theoretical reflections and case studies the chapters assembled in the volume address the consequences of the illegal production distribution and consumption of products for the architecture of markets It also focuses on the underlying causes and the political and social concerns stemming from the infringement of the law

Economics Broadly Considered Jeff E. Research Handbook on Behavioral Law and Economics Joshua C. Teitelbaum, Kathryn Zeiler, 2018-03-30 The field of behavioral economics has contributed greatly to our understanding of human decision making by refining neoclassical assumptions and developing models that account for psychological cognitive and emotional forces The field s insights have important implications for law This Research Handbook offers a variety of perspectives from renowned experts on a wide ranging set of topics including punishment finance tort law happiness and the application of experimental literatures to law It also includes analyses of conceptual foundations cautions limitations and proposals for ways forward

Modeling Farm Decisions For Policy Analysis Kenneth H Baum, 2019-03-08 Microeconomic modeling has been an important tool for agricultural economists for several decades and promises to be

important for addressing the research problems of the 1980s as well. This volume explores the possibilities for using micromodeling to analyze how individual farm businesses react to and are affected by farm policies. Although this purpose represents only one potential use of micro modeling, effective modeling for policy analysis necessitates a broad look from several historical, analytical, and institutional perspectives. The Micromodeling Conference held November 18-20, 1981 at Airlie House, Virginia, under the auspices of the U.S. Department of Agriculture's Economic Research Service and the Farm Foundation, reflected these concerns. Trade, Interdependence, and Security Ashley J. Tellis, Michael Wills, 2006

Readings in International Agricultural Economic Development Melvin G. Blase, 1970 **The Future of the Global Financial System: Downfall or Harmony** Elena G. Popkova, 2018-11-03. This book gathers the best papers presented at the conference The Future of the Global Financial System Downfall or Harmony which took place in Limassol, Cyprus, on April 13-14, 2018. Organized by the Institute of Scientific Communications, Volgograd, Russia, the conference chiefly focused on reassessing the role and meaning of the global financial system in the modern global economy in light of the crisis that began in 2008 and can still be observed in many countries, and on developing conceptual and applied recommendations on spurring the development of the global financial system. All works underwent peer review and conform to strict criteria including a high level of originality, more than 90% elements of scientific novelty, contribution to the development of economic science, and broad possibilities for practical application. The target audience of this scientific work includes postgraduates, lecturers at higher educational establishments, and researchers studying the modern global financial system. Based on the authors' conclusions and results, readers will be equipped to pursue their own scientific research. The topics addressed include, but are not limited to, the following issues, which are interesting for modern economic science and practice: financial globalization, the role of finances in the global economy, perspectives of transition in the financial system from part of the infrastructure to a new vector of development in the global economy in the 21st century, reasons for the crisis of the modern financial system, and ways of overcoming it, problems and perspectives regarding the harmonization of the global financial system, and scenarios of development for the global financial system. The content is divided into the following parts: development of financial systems at the micro, meso, and macro levels; financial infrastructure of the modern economy; legal issues of development of the modern financial system; and management of the global financial system.
