Global Economy As Political Space:

The Global Economy as Political Space Stephen J. Rosow, Naeem Inayatullah, Mark Rupert, 1994 Explores the social political philosophical and cultural dimensions of the shift from a nation state based economy to a global economy A *Critical Rewriting of Global Political Economy* V. Spike Peterson, 2004-03-01 Moving beyond a narrow definition of economics this pioneering book advances our knowledge of global political economy and how we might critically respond to it V Spike Peterson clearly shows how two key features of the global economy increasingly determine everyday lives worldwide The first is explosive growth in financial markets that shape business decision making and public policy making and the second is dramatic growth in informal and flexible work arrangements that shape income generation and family wellbeing These developments though widely recognized are rarely analyzed as inextricable and interacting dimensions of globalization Using a new theoretical model Peterson demonstrates the interdependence of reproductive productive and virtual economies and analyzes inequalities of race gender class and nation as structural features of neoliberal globalization Presenting a methodologically plural cross disciplinary and well documented account of globalization the author integrates marginalized and disparate features of globalization to provide an accessible narrative from a postcolonial feminist vantage point

Political Space Yale H. Ferguson, R. J. Barry Jones, 2012-02-01 This collection brings together an unusually distinguished and diverse group of theorists of global politics political geography and international political economy who reflect on the concept of political space Already familiar to political geographers the concept of political space has lately received increased attention arising out of the need for new ways of thinking about and describing the actors structures and processes that shape politics and patterns of governance in today's complex post Cold War world The essays explore the frontiers of the field of global politics and each deals imaginatively with some aspect of political space Although the participants may be loosely classified as realists neo realists constructivists and postinternationalists the essays are not fitted to the usual theoretical pigeonholes What they do share is a continued faith in empirical research and a collective sense of discovery

A Spatial Approach to Regionalisms in the Global Economy M. Niemann, 2016-01-26 The author challenges the traditional manner in which regionalization has been approached and suggests that the failure to come to grips with this phenomenon is the result of the modernist regulation of space to margins of analysis He advances instead a spatially orientated approach which views states as one of multiple layers of a global social space Regionalization represents the construction of new layers in an effort to search for an institutional fix to the challenges of globalization **Global Political Economy and the Modern State System** Tobias Ten Brink, 2014-04-03 In *Global Political Economy and the Modern State System* Tobias ten Brink contributes to an understanding of the modern state system its conflicts and its transformation In contrast to the political attractiveness of optimistic theoretical approaches to globalisation this book demonstrates how an analytical approach rooted in Global Political Economy GPE helps to explain both the tendencies towards integration and

towards rivalry in international relations By way of a historical reconstruction of different world order phases in the twentieth century ten Brink analyses multiple phase specific variations of socioeconomic and geopolitical conflicts that are significant for the modern capitalist world system Revised edition of Geopolitik Geschichte und Gegenwart kapitalistischer Staatenkonkurrenz Verlag Westf lisches Dampfboot M nster 2008 **The Global Political Economy of Raúl Prebisch**
