developed and developing states pursue their national interests and maximize their goals through the exercise of state power in controlling their territories and protecting their nationals from harm posed by traffickers **Rethinking International Drug Control** Mathea Falco, 1997 The foreign interdiction and source country programs on which the United States has spent 25 billion since 1981 are intended to reduce domestic drug abuse To examine this intersection of domestic and international interests the Council on Foreign Relations convened an Independent Task Force to review U S international drug strategy and to suggest possible future directions The bipartisan Task Force chaired by Mathea Falco President of Drug Strategies and former Assistant Secretary of State for International Narcotics Matters included experts with backgrounds in diplomacy law enforcement economics development public health judicial institutions human rights and multinational business The Capacity to Govern Yehezkel Dror, 2012-12-06 The inadequacies of contemporary forms of governance are increasingly recognized the brain drain from politics distrust of governments the danger of mass media and money dominated elections and the failure of governments to find good policy options on major issues Industry civil society and non governmental organizations however important cannot compensate for government s incapacity to shape the future which only it is democratically entitled to do Radical improvements in governance are urgently needed but salient proposals are scarce This book diagnoses contemporary governments as obsolete and proposes changes in values structures staffing public understanding and political culture to equip governance for the radically novel challenges of the 21st century This is the first Report dealing with governance commissioned and approved by the Club of Rome testifying to the significance of this book

between the drug question and issues such as trade policy national security concerns the Cold War and medical considerations the reasons why the goal to eliminate drug abuse has been so hard to accomplish Border Games Peter Andreas,2000 Yet the unprecedented buildup of border policing has taken place in an era otherwise defined by the opening of the border most notably through NAFTA This contrast creates a borderless economy with a barricaded border **US Foreign Policy and the War on Drugs** Cornelius Friesendorf,2007-02-22 This book examines the geographic displacement of the illicit drug industry as a side effect of United States foreign policy To reduce the supply of cocaine and heroin from abroad the US has relied on coercion against farmers traffickers and governments but this has only exacerbated the world s drugs problems US Foreign Policy and the War on Drugs develops and applies a causal mechanism to explain the displacement analyzing US anti drug initiatives at different times and in various regions The findings clearly show that American foreign policy has been a major driving force behind the global spread of the illicit drug industry calling for urgent revision This book will be of interest to students of US foreign policy security studies and international relations in general

**Why Has West Africa Become a Nexus for the International Traffickers?** Yahya H. Affinnih,2023-02-16 This book is undoubtedly rich in different diverse sources and literature that are put together into a coherent whole instead of dispersed copious literature on the genesis of West African countries integration into the world political economy and geopolitics of the drug trade To the author s best knowledge there is no similar book that has focused on the recent West Africa drug connection The book is well researched and documented It fills the missing void in the discourse of West Africa drug trade arrangements This book is one of its kind in the annals of West Africa s drug trade history This thrust and the thesis of the book is to provide a plausible and sufficient explanation as to why West Africa has become international traffickers transshipments and transits hubs and cocaine distribution and repackage centers for cocaine en route to Europe This book is informative for a wide variety of readers such as students social analysts from different social sciences disciplines drug policy makers in West African countries and elsewhere in the world The book s subject matter is a global wide problem that concerns all modern human societies worldwide There are no human societies that are immune to the dynamics of the global drug trade industries that pose threat to human national and global security in its wake Bad Neighbor Policy Ted Galen Carpenter,2014-01-13 The domestic phase of Washington s war on drugs has received considerable criticism over the years from a variety of individuals Until recently however most critics have not stressed the damage that the international phase of the drug war has done to our Latin American neighbors That lack of attention has begun to change and Ted Carpenter chronicles our disenchantment with the hemispheric drug war Some prominent Latin American political leaders have finally dared to criticize Washington while at the same time the U S government seems determined to perpetuate if not intensify the antidrug crusade Spending on federal antidrug measures also continues to increase and the tactics employed by drug war bureaucracy both here and abroad bring the inflammatory drug war metaphor closer to reality Ending the prohibitionist

system would produce numerous benefits for both Latin American societies and the United States In a book deriving from his work at the CATO Institute Ted Carpenter paints a picture of this ongoing fiasco A History of Intoxication Kawal Deep Kour,2019-08-28 This volume unearths the emerging pattern of consumption of opium in colonial Assam and the creation of drug dependency in a social context It analyses the competing forces of the empire which played a key role in the production and distribution of opium national politics alongside international drug diplomacy and how these together shaped the discourse of opium in Assam the wider implications of opium production and consumption in the agrarian economy and the narrative of the nationalist critique of intoxication Please note Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka **Redefining Transatlantic Security Relations** Dieter Mahncke,Wyn Rees,Wayne Thompson,2004-06-19 The transatlantic security relationship has been at the heart of cooperation since the onset of the Cold War and has been the foundation on which the stability of Europe has been built But the post Cold War period has raised major challenges for transatlantic relations as well as new security threats such as terrorism organized crime and drug trafficking These are fresh concerns in the sense that they have not been previously regarded as matters for US European cooperation Recent events such as the 1999 war in Kosovo the European Union's decision to create a Rapid Reaction Force and the US policy of proceeding with a ballistic missile defence capability have all contributed to tensions in transatlantic relations The transatlantic relationship has entered a new and highly uncertain period This book looks at the three main facets of the transatlantic security relationship the defense of Europe global challenges and new security threats

**Drugs and the Limits of Liberalism** Pablo De Greiff, 2018-10-18 Society's drug problem will persist and debates over how to solve it will continue getting nowhere until we define our terms This book is an effort to do just that to parse the legal moral and philosophical underpinnings for any discussion of drug policy Does liberal political theory with its commitment to individual freedom offer any guidance in the matter of drugs particularly regarding their legal status Do the commitments that citizens of liberal democracies make commitments to ideals such as rationality equality justice and democratic forms of decision making have implications for drug policy These are the questions addressed in this volume which explores the possibilities and limitations of philosophical reflection on this pressing practical social issue The authors distinguished political and legal philosophers search out the justification of policies that manage problems of drug consumption and social disintegration but do so in keeping with the moral and political commitments of a liberal democratic society Their subjects range from the rationality or irrationality of drug consumption to the scope of liberty from the proper aims of legislation to the rhetoric of the war on drugs particularly as deployed by former Drug Czar William Bennett

**Economies of Representation, 1790?2000** Leigh Dale, 2017-11-30 Although postcolonialism has emerged as one of the most significant theoretical movements in literary and cultural studies it has paid scant attention to the importance of trade and trade relations to debates about culture Focusing on the past two centuries this volume investigates the links among trade colonialism and forms of representation posing the question What is the historical or modern relationship between economic inequality and imperial patterns of representation and reading Rather than dealing exclusively with a particular industry or type of industry the contributors take up the issue of how various economies have been represented in Aboriginal art in literature by North American Caribbean Portuguese South African First Nations Australian British and Aboriginal authors and in a diverse range of writings that includes travel diaries

missionary texts the findings of the Leprosy Investigation Commission early medical accounts and media representations of HIV AIDS Examining trade in commodities as various as illicit drugs liquor bananas tourism adventure fiction and modern Aboriginal art as well as cultural exchanges in politics medicine and literature the essays reflect the widespread origins of the contributors themselves who are based throughout the English speaking world Taken as a whole this book contests the commonplace view promoted by some modern economists that trade in and of itself has a leveling effect equalising cultures places and peoples demonstrating instead the ways in which commerce has created and exacerbated differences in power
