Ecophysiology of the Green Shore Crab *Carcinus maenas* and Related Species Mechanisms Behind the Success of a Global Invader provides an in depth perspective of this devastatingly invasive coastal species During the last 175 years *Carcinus maenas* has spread around the globe by human activities Because of its ability to flourish in a wide variety of ecosystems and outcompete native species it has been listed as one of the top 100 worst global invaders Written by international experts this book focuses on *Carcinus maenas* and discusses other brachyurans with similar physiologies as comparisons including control systems and mechanisms used This book serves as a valuable resource for researchers in marine biology and invasive biology as well as for university lecturers government or environmental agencies Gathers all information on ecological physiology of this important species into one place Discusses how this one species of crab has managed to be spread around the globe and survive in many different environments Features a chapter by First Nations members on how this species may impact indigenous fisheries and culture *In the Wrong Place - Alien Marine Crustaceans: Distribution, Biology and Impacts* Bella S. Galil, Paul F. Clark, James T. Carlton, 2011-04-01 In *The Wrong Place Alien Marine Crustaceans Distribution Biology And Impacts* provides a unique view into the remarkable story of how shrimps crabs and lobsters and their many relatives have been distributed around the world by human activity and the profound implications of this global reorganization of biodiversity for marine conservation biology Many crustaceans form the base of marine food chains and are often prominent predators and competitors acting as ecological engineers in marine ecosystems Commencing in the 1800s global commerce began to move hundreds perhaps thousands of species of marine crustaceans across oceans and between continents both intentionally and unintentionally This book tells the story of these invasions from Arctic waters to tropical shores highlighting not only the importance and impact of all prominent crustacean invasions in the world's oceans but also the commercial exploitation of invasive crabs and shrimps Topics explored for the first time in one volume include the historical roots of man's impact on crustacean biogeography the global dispersal of crabs barnacle invasions insights into the potential scale of tropical invasions the history of the world's most widely cultured shrimp the invasive history and management of red king crabs in Norway Chinese mitten crabs in England and American blue crabs in Europe the evolutionary ecology of green crabs and many other subjects as well touching upon all ocean shores Fisheries responses to invasive species in a changing

Due to the increasing pressure of a globalized economy and under the effects of a changing climate biological invasions have become a frequent feature of marine and freshwater environments Global fisheries and aquaculture are therefore required to adjust to these changes with the dual aim of reducing the negative ecological consequences caused by these species and making the most of the advantages they might bring Here capitalizing on a wide spectrum of management actions which can be implemented to control and or adapt to aquatic invasions nine measures are presented they can be grouped under environmental social or socioeconomic strategies exploring their potential main challenges and enabling factors The nine measures provided with key recommendations are 1 Develop and manage a commercial fishery 2 Promote recreational harvesting 3 Explore market opportunities 4 Implement outreach programmes 5 Foster stakeholder engagement 6 Implement spatial control 7 Implement biological control 8 Restore ecosystems 9 Do nothing These suggestions discussed among a group of international experts and presented in a synthetic form may be used as a practical resource though not an exhaustive one to aid in the evaluation and identification of appropriate fisheries management responses to aquatic invasive species in the context of climate change While it may not address all the complexities of the subject it provides a starting point for adaptation strategies recognizing the diverse legal cultural and socioeconomic conditions in different fishery contexts offering valuable insights for policymakers fisheries managers and practitioners who have to deal with aquatic invasions

Baltic Crustaceans Anna Szaniawska,2017-10-25 This book presents all Malacostracan crustaceans occurring in the Baltic Sea in water salinity from 2 to 15 psu The Baltic sea is very special due to its low salinity and characteristic fauna For each of the 58 species the systematic position the origin and distribution in European waters are given and the environmental preferences the role in the food web and human economy described The book describes the history of the Baltic sea and the occurrence of crustaceans in its history against the terms of hydrological conditions explaining why in the Baltic sea only part of all marine crustaceans occur The book is richly illustrated with photographs and beautiful pictures of animals specifically prepared for this book

Biological Globalisation Wouter van der Weijden,Rob Leewis,Pieter Bol,2017-02-13 Bioglobalisation is anything but new The exotic fungus Phytophthora has threatened European potato harvests since 1846 Since then the number of deliberate and accidental introductions of exotic species has grown rapidly Environmental factors such as climate change also play an increasing role This book is a thorough and informative overview of all aspects of bioglobalisation It describes its nature and scope as well as history drivers and mechanisms Using vivid examples the book addresses which species are likely to become invasive which bioregions are vulnerable and whether we can and should try to control bio invasions Separate chapters address the impacts of bioglobalisation on the environment and on our economy and discuss for instance how virus invasions are threatening human lives worldwide
