Global Issues CQ Researcher, 2016-05-24 CQ Researcher's *Global Issues* offers an in depth and nuanced look at a wide range of today's most pressing issues The 2016 edition of this annual reader looks at topics such as the European migration crisis terrorism in Africa emerging infectious diseases robotic warfare and restoring ties with Cuba And because it's CQ Researcher the reports are expertly researched and written Each chapter identifies the key players explores what's at stake and offers the background and analysis necessary to understand how past and current developments impact the future of each issue **Global Issues for Global Citizens** Vinay Kumar Bhargava, 2006-01-01 Written by 27 World Bank experts this

book draws on the Bank's unique global capabilities and experience to promote an understanding of key global issues that cannot be solved by any one nation alone in an increasingly interconnected world. It describes the forces that are shaping public and private action to address these issues and highlights the Bank's own work in these areas. Covering four broad themes: global economy, global human development, global environment and global governance, this comprehensive volume provides an introduction to today's most pressing global issues from a global perspective.

Global Issues and Ethical Considerations in Human Enhancement Technologies Thompson, Steven John, 2014-04-30. With rapid advancements in human enhancement technologies, society struggles with many issues such as definition, effects, participation, regulation, and control. Current and future initiatives in these technologies may not be in the participants' best interests; therefore, it is imperative for research on humanitarian considerations to be available to those affiliated with this field. *Global Issues and Ethical Considerations in Human Enhancement Technologies* compiles prestigious research and provides a well-rounded composite of the field's role in emerging technologies. Addressing both present and future concerns, this publication serves as a valuable reference work for researchers, students, professionals, and practitioners involved in computer science and the humanities, as well as many engaged in a humanities approach to metasystems, new artificial life, and robotics.

Geographic and Global Issues Quarterly, 1990.

Genetic Engineering Susan Henneberg, 2016-12-15. As scientists continue to make genetic breakthroughs, society inches ever closer to confronting the stuff horror movies are made of. Cloning a mourned pet is simply strange, but the thought of human cloning is terrifying. Manipulating genes to reduce genetic disease is encouraging only until we consider the ethical implications of potentially creating a master race. Genetically engineering crops and animals can address many problems like disease, climate change, and world hunger, but altering the environment could have catastrophic results for Earth. Articles presenting these issues from persuasive points of view help readers understand the controversies surrounding genetic engineering today.

Beyond Borders Paula S. Rothenberg, 2006. This interdisciplinary collection of 82 articles is designed to bring today's most pressing issues into the classroom and help prepare college students to assume their roles as members of an increasingly global community.

Technology Assessment in a Globalized World Leonhard Hennen, Julia Hahn, Miltos Ladikas, Ralf Lindner, Walter Peissl, Rinie van Est, 2023-01-06. This open access book explores the relevance of the concept of technology assessment (TA) on an international and global level. Technologies play a key role in addressing global challenges such as climate change, population aging, digitization, and health. At the same time, their use increases the need for coordinated action and governance at the global level in the field of science, technology, and innovation (STI). Featuring case studies on STI fields such as energy, biotechnology, artificial intelligence, and health technology, as well as TA activities at the national and international levels, this book reflects on the challenges and opportunities of global technology governance. It also provides an in-depth discussion of current governmental STI cultures and systems, societal expectations, and the policy priorities needed to achieve coordinated and effective STI intervention in policymaking and

public debate at the global level Lastly the book promotes the establishment of a forum for a truly global dialogue of TA practitioners fostering the articulation of their needs knowledge and perspectives

Food Biotechnology in Ethical Perspective Paul B. Thompson, 2007-05-05 Agrifood biotechnology the genetic transformation of plants and animals through recombinant means has created controversy in the food system for more than twenty years This thoroughly revised and amended edition of Paul B Thompson s path breaking study of ethical and philosophical issues raised by this technology up to date The original 1997 edition was the first book length treatment by a philosopher to focus on food and agricultural biotechnology covering ethical issues associated with risk assessment labelling animal transformation patents and the impact of biotechnology on traditional farming communities in both the developed and developing world The new edition reflects lessons from the hotly contested debates over those issues in the intervening decade and includes wholly new discussions on ethical issues associated with livestock cloning the Precautionary Principle and the transatlantic debate between United States and European perspectives on biotechnology Thompson s unique and insightful approach to addressing the risks and questions of public acceptability associated with novel technology stands as a model for anyone interested in technological innovation and social change The book should be of interest to scholars and citizens interested in the Internet or nanotechnology while it remains an essential resource for understanding the twists and turns of debate over the role of molecular genetics in the transformation of the global food system

Oral Use of English for Specific Purposes in Tunisian First-Year Preparatory Engineering Classrooms Hedia Ben

Elouidhnine,2022-02-22 Using English appropriately to communicate one's thoughts can seem like a challenging task for non-native English speaking students. This accessible guide provides the reader with an insightful approach through which to investigate such use through the analysis of the interactive conversational undertakings of a cohort of Tunisian First Year Preparatory Engineering Students. The findings here provide insights into the different types of students' interactions with their teachers and peers and shed light on their classroom exchangeable patterns, dynamics, and the main zones of their proficiencies and deficiencies. They are reflective of the overall spoken discourse that is processed in the Tunisian first year preparatory engineering classroom.
