Donald Hughes,2015-05-11 Although the organizing principle of virtually every world history text is development the editor of this volume maintains that this traditional approach fails to address the issue of sustainability By

adopting the ecological process as their major theme the authors show how the process of human interaction with the natural environment unfolded in the past and offer perspective on the ecological crises in our world at the beginning of the 21st century Topics range from broad regional studies that examine important aspects of the global environment that affect nations to a study of the widespread influence of one important individual on his nation and beyond The authors take different approaches but all share the conviction that world history must take ecological process seriously and they all recognize the ways in which the living and non living systems of the earth have influenced the course of human affairs
