**Global Politics as if People Mattered** Mary Ann Tétreault, Ronnie D. Lipschutz, 2009-05-16 Now in a fully updated and revised edition this concise and engaging text introduces global politics and international relations with an emphasis on the social individual Using practical examples as well as theory the authors show students how they can take charge of their lives and the politics that affect them even in the context of a vast global economy and impersonal international forces that sometimes seem out of control Filled with idealism yet firmly grounded in current realities **Global Politics as if People Mattered** is a fresh take on the proper place and potential of individuals in world politics front and center actively engaged in a way of life that is as politically personal as it is politically powerful **Gender Matters in Global Politics**, 2010

**Gender Matters in Global Politics** Laura J. Shepherd, 2014-07-17 Fully revised and updated this second edition of **Gender Matters in Global Politics** is a comprehensive textbook for advanced undergraduates studying feminism War Terrorism and political violence Land food and water International legal institutions Peacebuilding institutions and post conflict reconstruction Citizenship Art aesthetics and emotionality and New social media and global resistance This text enables students to develop a sophisticated understanding of the work that gender does in policies and practices of global politics **Stability in Postcolonial African States** Emmanuel Bueya, 2017-11-22 This book explores the instability of the African postcolonial state and demonstrates that such a fundamental crisis can be solved only through discourses and practices that are designed beyond the Westphalian model of the modern state and out of the neo patrimonialistic system of African governance The challenge of instability will not be overcome by rebuilding the African nation state undermined by social contradictions and complex emergencies rather stability will be achieved by opening a public space of agonistic democracy that is supported mainly by an overlapping consensus on justice The author argues that by reading critically the African philosophy of solidarity is contradicted by structural violence and inequality The political instrumentalization of kinship provokes the exclusion of minorities the marginalization of masses and the instability of the entire society Governance is reduced to mere conflict management The solution of legitimate violence becomes another version of the problem of institutional incapacity The author's contention is people are the ultimate and permanent agents of stability and the ground of stability must not be a strong state but the politics of reciprocity and union among people that implies a sense of justice in the power sharing and in the decision making process **The Global Politics of Science and Technology - Vol. 1** Maximilian Mayer, Mariana Carpes, Ruth Knoblich, 2014-08-20 An increasing number of scholars have begun to see science and technology as relevant issues in International Relations IR acknowledging the impact of material elements technical instruments and scientific practices on international security statehood and global governance This two volume collection brings the debate about science and technology to the center of International Relations It shows how integrating science and technology translates into novel analytical frameworks conceptual approaches and empirical puzzles and thereby offers a

state of the art review of various methodological and theoretical ways in which sciences and technologies matter for the study of international affairs and world politics The authors not only offer a set of practical examples of research frameworks for experts and students alike but also propose a conceptual space for interdisciplinary learning in order to improve our understanding of the global politics of science and technology This first volume summarizes various time tested approaches for studying the global politics of science and technology from an IR perspective It also provides empirical theoretical and conceptual interventions from geography history innovation studies and science and technology studies that indicate ways to enhance and rearticulate IR approaches In addition several interviews advance possibilities of multi disciplinary collaboration

The Information Revolution and World Politics Elizabeth C. Hanson,2008-02-04 This readable and cogent book provides a much needed overview of the information revolution in a global context First tracing the historical evolution of communications since the development of the printing press Elizabeth C Hanson then explores the profound ways that new information and communication technologies are transforming international relations More people

have access to more diverse sources of information than ever before as well as a greater capacity to influence national and international agendas More transcontinental channels of contact are available to more people in the world at far less cost than ever before in history Hanson illustrates how these dramatic changes have raised a set of key questions What is the impact of the information revolution on diplomacy foreign policymaking and the conduct of war How are these new technologies affecting the structure of the global economy and the distribution of the world's wealth How and to what extent are they affecting the nation state its centrality in the international system its sovereignty and its relationship to its citizens In answering these questions Hanson considers the controversies over the present and future impact of a radically new information and communications environment as part of larger debates over globalization and the role of technology in historical change Her carefully chosen case studies and judicious use of relevant research provide a firm basis for readers to evaluate competing arguments on this contentious issue Global Politics As If People Mattered, Second Edition ,2009

What would international relations look like if our theories and analyses began with individuals families and communities instead of executives nation states and militaries After all it is people who make up cities states and corporations and it is their beliefs and behaviors that explain why some parts of the world seem so peaceful while others appear so violent why some societies are so rich while others are so poor Now in a fully updated and revised edition this unique text on contemporary global politics begins with people treating them as social individuals with free will and human agency even as they are limited and disciplined by rules and rulers Offering a fresh approach to global politics this dynamic author team trades perspectives with each other and with such eminent social theorists as Michel Foucault and Hannah Arendt to develop their resonant theme Using practical examples as well as theory the authors show students how they can take charge of their lives and the politics that affect them even in the context of a vast global economy and impersonal international forces that sometimes seem out of control Filled with idealism yet firmly grounded in current realities *Global Politics as if People Mattered* is a fresh take on the proper place and potential of individuals in world politics front and center actively engaged in a way of life that is as politically personal as it is politically powerful This distinctive text a perfect reading for lower division poli

**Feminist International Relations Through a Technospacial Lens** Gillian Youngs, 2024-11-14. Feminist International Relations Through a Technospacial Lens is a rich, thought-provoking and wide-ranging assessment of power and empowerment in the digital age. Artificial intelligence (AI) innovations have launched a new era of policy and public engagement with the workings of digital economy and the scale of its possibilities and risks. How beneficial will its data-driven technological advances be across scientific, medical and commercial sectors and what are the dangers of its increasing capacities to replace human presence and interactions with convincing replications? These are the kinds of big new questions societies confront. Answers will need to draw on deep understanding of technospacial and technosocial dimensions of digital economy and how it has extended, deepened and transformed automation as a continuing feature of earlier industrial economy transitions.
