Global Transition A General Theory Of Economic Development:

Global Transition Graeme Donald Snooks,1999-08-31 Global Transition is an innovative study that analyses the problems and prospects of the Third World by building on the theoretical contribution the dynamic strategy model made in the author s acclaimed Longrun Dynamics It formulates a general economic and political theory he calls the global strategic transition GST model The central feature of this model is the global strategic demand response mechanism involving an interaction between the world s expanding strategic core and its fringe which is facilitated through strategic inflation This model also provides the basis for a new policy approach to economic development

The Economics of Growth in Russia Ararat L. Osipian,2023-05-17 This book presents theoretical and empirical investigation of economic growth in Russia The sharp decline in the national production that Russia endured in the 1990s linked directly to the exhausting and ill planned transition from the planned economy to the market economy resulted in Russia plunging into the poverty trap The goal of this book is to determine whether and how Russia manages to overcome the poverty trap and initiate and sustain economic growth This book fills the gap between the volatile economic growth as an objective economic reality of Russia and the lack of scholarly literature on the issue This study identifies the place and role of foreign aid in economic growth in the market type post transitional Russian economy and concludes that foreign aid does not play any significant role in the national economy contrary to what would follow from the classical poverty trap theory considered reviewed applied and tested in this study Development economists should not overestimate the role of foreign aid in overcoming the poverty trap in those developing economic systems that are currently not in equilibrium and only move toward their steady state The book will be of interest to those who want to learn more about specific problems in Russia s newly built capitalism the country s perspectives and its current semi peripheral status The book will also be an excellent supplement for students in Russian studies programs as well as for investors who want to do business in Russia and try to understand the country s domestic economic conditions and processes

Ibss: Economics: 1999 Compiled by the British Library of Political and Economic Science,2000-12-07 IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences

Longrun Dynamics G. Snooks,1998-04-08 Longrun Dynamics is a ground breaking work that begins where the author s Economics without Time 1993 left off It employs the inductive method proposed by J S Mill to develop a general dynamic theory that integrates the separate disciplines of economic growth economic fluctuations and political decision making The central feature of this general theory is dynamic demand which provides both a realist form for the model and a new explanation of macroeconomics variables The general theory also provides an entirely new basis for policy and is designed to counter the influence of neo liberalism in economic theory

The 21st Century Singularity and Global Futures Andrey V. Korotayev,David J. LePoire,2020-01-02 This book introduces a Big History perspective to understand the acceleration of

social technological and economic trends towards a near term singularity marking a radical turning point in the evolution of our planet. It traces the emergence of accelerating innovation rates through global history and highlights major historical transformations throughout the evolution of life, humans and civilization. The authors pursue an interdisciplinary approach also drawing on concepts from physics and evolutionary biology to offer potential models of the underlying mechanisms driving this acceleration along with potential clues on how it might progress. The contributions gathered here are divided into five parts: the first of which studies historical mega trends in relation to a variety of aspects including technology, population, energy and information. The second part is dedicated to a variety of models that can help understand the potential mechanisms and support extrapolation. In turn, the third part explores various potential future scenarios along with the paths and decisions that are required. The fourth part presents philosophical perspectives on the potential deeper meaning and implications of the trend towards singularity while the fifth and last part discusses the implications of the Search for Extraterrestrial Intelligence (SETI). Given its scope, the book will appeal to scholars from various disciplines interested in historical trends, technological change and evolutionary processes.

Thinking History Globally Diego Olstein, 2014-11-04
The book brings together many recent trends in writing history under a common framework: thinking history globally. By thinking history globally, the book explains, applies and exemplifies the four basic strategies of analysis: the big C's: comparing, connecting, conceptualizing and contextualizing using twelve different branches of history.

Sustainable Economic Growth in Russia Ararat L. Osipian, 2023-07-25
This book presents a theoretical and empirical investigation of sustainable economic growth in Russia. The ill-planned transition in the 1990s from planned economy to market economy resulted in a sharp decline in national production; however, Russian economic growth was evident in the 2000s and 2010s. Osipian here analyses whether Russia has potential to achieve sustainable economic growth, filling a gap between the continuous presence of volatile economic growth in Russia and the lack of scholarly literature in the field. This book considers Russia's economic transition within the set of early modern classical exogenous and endogenous theories of economic growth. At the same time, this book considers the phenomenon of sustainable economic growth in the context of the post-Soviet transition. Such a contextualization allows for finding and highlighting certain features and processes within economic transition that were earlier neglected by the scholars, including primarily the possibility of not only recovering after economic and financial crises but also initiating sustainable economic growth. It identifies the place and role of human capital in economic growth within the market-type post-transitional Russian economy and concludes that human capital accumulation is key for sustainable economic growth.

The Collapse of Darwinism, Or, The Rise of a Realist Theory of Life Graeme Donald Snooks, 2003-01-01
In this provocative work, noted social and economic theorist Graeme D. Snooks exposes fatal flaws in the foundations of the Darwinian theory of evolution. Further, he develops a remarkable replacement theory of evolution. The new dynamic strategy theory views life as a strategic pursuit rather than a game of chance in which organisms adopt dynamic strategies; only one of

which is genetic change to survive and prosper This theory reveals the organism as empowered rather than as the plaything of gods genes or blind chance And it provides a powerful new basis for humanism

China's New Place in a World in Crisis Ross Garnaut,Ligang Song,Wing Thye Woo,2009-07-01 The world and China s place in it have been transformed over the past year The pressures for change have come from the most severe global financial crisis ever The crisis has accelerated China s emergence as a great power But China and its global partners have yet to think or work through the consequences of its new position for the governance of world affairs China s New Place in a World in Crisis discusses and provides in depth analysis of the following questions How have China s growth prospects been affected by the global crisis How will the crisis and China s response to it impact China s major domestic issues such as industrialisation urbanisation and the reform of the state owned sector of the economy How will the crisis and the international community s response to it affect the rapidly emerging new international order What will be China s and other major developing countries new role Can China and the world find a way of breaking the nexus between economic growth and environmental sustainability especially on the issue of climate change

The Prospect of Global History James Belich,John Darwin,Margret Frenz,Chris Wickham,2016-02-11 The Prospect of Global History takes a new approach to the study of global history seeking to apply it rather than advocate it The volume seeks perspectives on history from East Asian and Islamic sources as well as European ones and insists on depth in historical analysis The Prospect of Global History will speak to those interested in medieval and ancient history as well as modern history Chapters range from historical sociology to economic history from medieval to modern times from European expansion to constitutional history and from the United States across South Asia to China

[Navigating World History](#) P. Manning,2003-05-15 World history has expanded dramatically in recent years primarily as a teaching field and increasingly as a research field Growing numbers of teachers and Ph Ds in history are required to teach the subject They must be current on topics from human evolution to industrial development in Song dynasty China to today s disease patterns and then link these disparate topics into a coherent course Numerous textbooks in print and in preparation summarize the field of world history at an introductory level But good teaching also requires advanced training for teachers and access to a stream of new research from scholars trained as world historians In this book Patrick Manning provides the first comprehensive overview of the academic field of world history He reviews patterns of research and debate and proposes guidelines for study by teachers and by researchers in world history

The Impact of Human Capital on Economic Growth A. Osipian,2009-08-31 This book presents theoretical and empirical investigation of the impact of human capital on economic growth in Ukraine during the period of 1989 2009 It defines place and role of human capital in the process of transition from the exogenous to the endogenous forms of growth

The Economy of the Philippines Peter Krinks,2003-09-02 In the late 1950s the Filipino economy could reasonably have been described as more advanced than those of its South Asian

neighbours Ever since then however it has consistently lagged behind and only really started to grow strongly in the mid 1990s and even then it failed to achieve the growth rates of the rest of Southeast Asia ten years earlier This book critically analyses the Filipino economy and attempts to explain the problems that it has faced as well as the solutions that need to be put into practice This accessible and comprehensive book will be of great use to students academics and business professionals with an interest in the economies of Asia

The Chinese Steel Industry's Transformation Ligang Song,Haimin Liu,2012 Chinese economic reform and opening to the international economy since the late 1970s have changed the country and the world The developments in the steel industry through the reform period are central to those changes illuminative of them and of immense significance in themselves This book throws new light on these historic changes for Chinese and foreign readers alike From the foreword by Ross Garnaut University of Melbourne Australia

Geopolitics and Globalization in the Twentieth Century Brian Blouet,2001 This book looks at the struggle between the processes of globalization and geopolitical forces over the last 150 years The twentieth century witnessed a struggle between geopolitical states who wanted to close off and control earth space resources and population and globalizing ones who wished to open up the world to the free flow of ideas goods and services Brian W Blouet analyzes the tug of war between these tendencies the playing out of which determined the shape and behavior of today s world Beginning his survey in the late nineteenth century Blouet shows how the Second World War served to focus international awareness on the ramifications of global controls and how we may be facing the end of geopolitics today

Global Health Inequities Fernando De Maio,2014-05-01 Despite living in a globalized world where advances in medicine technology and science come at an ever increasing pace there exist staggering inequalities in health Even as we celebrate new pharmaceutical developments access to already existing medicines is hindered by economic and political barriers for poor people around the world Critical but accessible *Global Health Inequities* questions taken for granted assumptions showing how breakthroughs in biomedicine alone cannot address inequities in health The book s analysis of theory and empirical work elucidates key debates and highlights the most significant challenges facing global health today including the growing burden of chronic non communicable diseases and the persistent injustice of neglected tropical diseases Fernando De Maio identifies the need for sociological analysis in global health drawing together research from public health sociology anthropology and related fields in order to expand the scope of the medical gaze towards a more holistic and structural perspective of health inequity
