Global Environmental Crises An Australian Perspective:

Global Environmental Crises Graeme Aplin, 1995 This book explores the diverse environmental problems we currently face Emphasizing problems in Australia this book is built around case studies focusing on health population land water forests the atmosphere and urbanization This new edition includes substantial new data extensive coverage of global environmental problems and new material on population water and international cooperation *The Green City* Nicholas Low, Brendon Gleeson, Ray Green, Darko Radovic, 2016-05-09 A team of city building professionals explain in straightforward terms how the idea of ecological sustainability can be embodied in the everyday life of homes communities and cities to make a better future The book considers and answers three questions What does the global agenda of sustainable development mean for the urban spaces where most Environmental Crises Tatvana Saillko, 2014-09-19 Provides students with an in depth historic and contemporary understanding of the causes magnitude and implications of the different types of environmental crises in the countries of the former Soviet Union and Eastern Europe **Geographies of Australian Heritages** Roy Jones, Brian J. Shaw, 2017-11-30 In any settler and or postcolonial society heritage is a complex and contested topic that involves indigenous imperial and other migrant components In Australia this situation is compounded by the unique characteristics of the country s natural environment the considerable diversity of its migrant intake and the demographic and technological imbalances between its indigenous and settler populations This volume brings together internationally recognized academics and emerging scholars whose expertise extends through the areas of tourism planning heritage management environmental studies and state and local government Through a representative set of case studies from across the country s states and capital cities the contributors demonstrate the range and diversity of heritage issues currently confronting Australia and consider possible ways of resolving these *The Making of International Environmental Treaties* Gerry Nagtzaam, 2009 Gerry Nagtzaam contends that in recent decades neoliberal institutionalist scholarship on global environmental regimes has burgeoned as has constructivist scholarship on the key role played by norms in international politics In this innovative volume the author sets these interest and norm based approaches against each other in order to test their ability to illustrate why and how different environmental norms take hold in some regimes and not others The book explores why some global environmental treaties seek to preserve and protect some parts of nature from human utilization some seek to conserve certain parts of nature for human development whilst others allow the reckless exploitation of nature without accounting for the consequences It tracks the fate of these three underlying environmental norms preservation conservation and exploitation using case studies on whaling mining in Antarctica and tropical timber The book illustrates how international political battles to shape environmental regimes inevitably result in clashes between these competing environmental norms This unique study will prove a fascinating read for both academics and practitioners in the fields of international environmental politics and international environmental law **Encyclopedia of Environmental**

Change John A Matthews, 2013-12-13 Accessibly written by a team of international authors the Encyclopedia of Environmental Change provides a gateway to the complex facts concepts techniques methodology and philosophy of environmental change This three volume set illustrates and examines topics within this dynamic and rapidly changing interdisciplinary field The encyclopedia includes all of the following aspects of environmental change Diverse evidence of environmental change including climate change and changes on land and in the oceans Underlying natural and anthropogenic causes and mechanisms Wide ranging local regional and global impacts from the polar regions to the tropics Responses of geo ecosystems and human environmental systems in the face of past present and future environmental change Approaches methodologies and techniques used for reconstructing dating monitoring modelling projecting and predicting change Social economic and political dimensions of environmental issues environmental conservation and management and environmental policy Over 4 000 entries explore the following key themes and more Conservation Demographic change Environmental management Environmental policy Environmental security Food security Glaciation Green Revolution Human impact on environment Industrialization Landuse change Military impacts on environment Mining and mining impacts Nuclear energy Pollution Renewable resources Solar energy Sustainability Tourism Trade Water resources Water security Wildlife conservation The comprehensive coverage of terminology includes layers of entries ranging from one line definitions to short essays making this an invaluable companion for any student of physical geography environmental geography or environmental sciences **International Environmental Law** Gerry Nagtzaam, Evan van Hook, Douglas

Guilfoyle, 2019-10-23 This book seeks to better understand how International Environmental Law regimes evolve The authors address throughout the major environmental economic and political tensions that have both shaped and constrained the evolution of international environmental policy within regimes and its expression in international legal rule and norm development Readers will gain an increased understanding of the growing role played by non state actors in global environmental governance including environmental non government organisations scientists the United Nations and corporations The authors also look ahead to the future of International Environmental Law evaluating key challenges and decisions that the discipline will face The text is clear concise and accessible It is ideally suited to students and professionals interested in International Environmental Law and individuals who are intrigued by this dynamic area of law The

^AOxford Companion to Global Change Andrew Goudie, David Cuff, 2008-11-21 The Oxford Companion to Global Change is a fresh look at the world and the compelling environmental issues of the early 21st century including global warming and its technical and regional implications as well as the prospects for current energy supplies and the promise of new technologies In one convenient volume it brings together current knowledge about the relations between technological social demographic economic and political factors as well as biological chemical and physical systems It is an essential reference work for law and policy practitioners researchers and other professionals seeking to understand any aspect of global change **Planet**

Geography Stephen Codrington, 2005 Geography for students of the International Baccalaureate Diploma New South Wales Higher School Certificate and other senior secondary geography courses with a contemporary global focus back cover

The Geopolitics of Deep Oceans John Hannigan, 2016-01-11 Long regarded as an empty and inhospitable environment the deep ocean is rapidly emerging as an ecological hot spot with a remarkable diversity of biological life Yet the worlds oceans are currently on a dangerous trajectory of decline threatened by acidification oil and gas drilling overfishing and in the long term deep sea mining bioprospecting and geo engineering In *The Geopolitics of Deep Oceans* noted environmental sociologist John Hannigan examines the past present and future of our planets final frontier The author argues that our understanding of the deep its definition boundaries value ownership health and future state depends on whether we see it first and foremost as a resource cornucopia a political chessboard a shared commons or a unique and threatened ecology He concludes by locating a new storyline that imagines the oceans as a canary in the mineshaft for gauging the impact of global climate change *The Geopolitics of Deep Oceans* is a unique introduction to the geography law politics and sociology of the sub surface ocean It will appeal to anyone seriously concerned about the present state and future fate of the largest single habitat for life on our planet

International Perspectives on Global Environmental Change Stephen Young, Steven Silvern, 2012-02-03 Environmental change is increasingly considered a critical topic for researchers across multiple disciplines as well as policy makers throughout the world Mounting evidence shows that environments in every part of the globe are undergoing tremendous human induced change Population growth urbanization and the expansion of the global economy are putting increasing pressure on ecosystems around the planet To understand the causes and consequences of environmental change the contributors to this book employ spatial and non spatial data diverse theoretical perspectives and cutting edge research tools such as GIS remote sensing and other relevant technologies *International Perspectives on Global Environmental Change* brings together research from around the world to explore the complexities of contemporary and historical environmental change As an InTech open source publication current and cutting edge research methodologies and research results are quickly published for the academic policy making communities Dimensions of environmental change explored in this volume include Climate change Historical environmental change Biological responses to environmental change Land use and land cover change Policy and management for environmental change

International Encyclopedia of Human Geography, 2019-11-29 International Encyclopedia of Human Geography Second Edition Fourteen Volume Set embraces diversity by design and captures the ways in which humans share places and view differences based on gender race nationality location and other factors in other words the things that make people and places different Questions of for example politics economics race relations and migration are introduced and discussed through a geographical lens This updated edition will assist readers in their research by providing factual information historical perspectives theoretical approaches reviews of literature and provocative topical discussions that will stimulate creative thinking Presents the most up to date and comprehensive coverage on the topic of human geography Contains extensive scope and depth of coverage Emphasizes how geographers interact with understand and contribute to problem solving in the contemporary world Places an emphasis on how geography is relevant in a social and interdisciplinary context

A Handbook of Industrial Ecology Robert U. Ayres, Leslie Ayres, 2002-01-01 The editors of this handbook have brought together 58 of the world's greatest environmental systems experts These professionals have in 46 specific topic headings divided into six major sections provided very insightful information and guidance as to what industrial ecology entails how it can be implemented and its benefits a very valuable tool This book provides essential information to mid and top level management that can enable industry to make more prudent business decisions regarding the manufacturing of its products Robert John Klancko Environmental Practice Industrial ecology is coming of age and this superb book brings together leading scholars to present a state of the art overviews of the subject

Population Studies: Key Issues and Contemporary Trends in Ghana Badasu, Delali Margaret, Kwankye, Stephen Owusu, 2014-09-01 The scope of Population Studies as a discipline has expanded beyond its traditional focus on the three components of population and their dynamics fertility mortality and migration It encompasses broader themes including reproductive health and rights gender and other social and cultural dimensions of population dynamics human development and health and climate change Population is central to development and its integration into the development planning of every country is critical This volume of the University of Ghana Readers by the Regional Institute for Population Studies RIPS provides multi disciplinary perspectives on the multi faceted nature of population studies today The volume is an essential resource on contemporary issues on population studies and offers a unique opportunity for students of population studies and others who are interested in the study of human populations to enhance their understanding of the ramifications of population dynamics on development It also has rich material on demographic research methods and provides tools for building the research capacity

of academics and technocrats who are interested in population driven interventions advocacy and policy **Artificial Intelligence and Evolutionary Algorithms in Engineering Systems** L Padma Suresh, Subhansu Sekhar Dash, Bijaya Ketan Panigrahi, 2014-11-25 The book is a collection of high quality peer reviewed research papers presented in Proceedings of International Conference on Artificial Intelligence and Evolutionary Algorithms in Engineering Systems ICAEES 2014 held at Noorul Islam Centre for Higher Education Kumaracoil India These research papers provide the latest developments in the broad area of use of artificial intelligence and evolutionary algorithms in engineering systems The book discusses wide variety of industrial engineering and scientific applications of the emerging techniques It presents invited papers from the inventors originators of new applications and advanced technologies **Australian Environmental Policy 2** Ken J. Walker, Kate Crowley, 1999 A textbook of readings that replaces Australian Environmental Policy 1992 edited by Ken Walker

Surviving the Climate Crisis Stephen M. Turton, 2022-12-29 This is the first textbook to adopt an integrated perspective of climate change in Australia drawing on research from the latest Intergovernmental Panel on Climate Change 2021 2022 Sixth Assessment Reports to make it the most up to date resource available It fills a knowledge gap in an ever increasing hot topic for the country its people economy and environment Australia has been identified by a number of respected sources as a climate change hotspot with all major sectors of the economy considered vulnerable or highly vulnerable to the anticipated adverse impacts of climate change The chief industry sectors examined in this book include energy transportation manufacturing agriculture fisheries forestry tourism and mining Other chapters focus on other key thematic areas such as protected areas and world heritage sites including their natural and cultural values coastal and island environments biosecurity biodiversity and ecosystem services human health water resources cities and settlements rural and regional areas and Indigenous communities Ideal for advanced undergraduate and graduate students with limited science backgrounds this book will inform those undertaking business management sustainability education environmental development or heritage studies and other social science programs **Nature, Temporality and Environmental Management** Lesley Head, Katarina Saltzman, Gunhild Setten, Marie Stenseke, 2016-08-05 How are different concepts of nature and time embedded into human practices of landscape and environmental management And how can temporalities that entwine past present and future help us deal with challenges on the ground In a time of uncertainty and climate change how much can we hold onto ideals of nature rooted in a pristine and stable past The Scandinavian and Australian perspectives in this book throw fresh light on these questions and explore new possibilities and challenges in uncertain and changing landscapes of the future This book presents examples from farmers gardens and Indigenous communities among others and shows that many people and communities are already actively engaging with environmental change and uncertainty The book is structured around four themes environmental futures mobile natures indigenous and colonial legacies heritage and management Part I includes important contributions towards contemporary environmental

management debates yet the chapters in this section also show how the legacy of older landscapes forms part of the active production of future ones Part II examines the challenges of living with mobile natures as it is acknowledged that environments natures and people do not stand still An important dimension of the heritage and contemporary politics of Australia Sweden and Norway is the presence of indigenous peoples As is clear in part III the legacies of the colonial past both haunt and energise contemporary land management decisions Finally part IV demonstrates how the history and heritage of landscapes including human activities in those landscapes are entwined with contemporary environmental management The rich empirical content of the chapters exposes the diversity of meanings practices and ways of being in nature that can be derived from cultural environmental research in different disciplines The everyday engagements between people nature and temporalities provide important creative resources with which to meet future challenges
