Knowledge for Development Lata Narayanaswamy, 2016-12-08 Knowledge for development is under theorised and under researched within development studies but as a set of policy objectives it is thriving within development practice Donors and other agencies are striving to improve the flow of information within and between decision makers and so called poor and marginalized groups in order to promote economic and social development including the empowerment of women Gender Power and Knowledge for Development questions the assumptions and practice of the knowledge for development industry Using a qualitative multi site ethnographical study of a Northern based gender information service and its beneficiaries in India the book queries the utility of the knowledge paradigm itself and the underlying assumption that a knowledge deficit exists in the Global South It questions the value of practices designed to address this presumed deficit that seek to increase information without addressing the specific problems of the knowledge systems being targeted for support After reviewing the evidence the book recommends that international organisations governments and practitioners move away from the belief that information intermediaries can employ progressive correctives to tinker at the edges and thus resolve the shortcomings of on going attempts to use knowledge alone as a driver of development Gender Power and Knowledge for Development will be of great interest to researchers students in development studies gender studies and communication studies as well as INGOs donor agencies and groups engaged in information for development i4D ICT for development ICT4D
