Global Report on Student Well-Being Alex C. Michalos, 2012-12-06 I suppose that most of the people reading this volume will have read or have access to Volume One of my Global Report on Student Well Being Therefore I will not review the background literature relevant to multiple discrepancies theory MDT the theory itself or the essential features of the international university undergraduate data set on which this whole report is based Anyone familiar with my earlier papers Michalos 1985 1987 1988 will have a good idea of MDT However one really has to have a look at the first volume of this study in order to appreciate the richness of a data set consisting of over 18 000 cases drawn from 39 countries As I indicated at the beginning of that volume the data set is available for a very modest cost to anyone who wants it and I do hope others will take advantage of it

Citation Classics from Social Indicators Research Alex C. Michalos, 2006-01-28 Social Indicators Research An International and Interdisciplinary Journal for Quality of Life Measurement was founded by Alex C Michalos and

published its first issue in March 1974. It has been the leading journal for scholarly research in its field for over thirty years. This volume is published in celebration of that record of accomplishment. The 19 articles assembled here are a selection drawn from the 34.24% most frequently cited articles in the journal's history. An introductory essay written by Michalos explains the historical and scientific importance of each article in the development of social indicators or quality of life research. It provides a rare overview of the perceived scientific problems that researchers around the world addressed in the first three decades of exploration as well as a view of some of the problems to be addressed in the future. A short essay describing the origins of the journal by its founder is also included. Anyone interested in having a single volume that contains some of the best research produced in this field will find this volume irresistible.

Essays on the Quality of Life Alex C. Michalos, 2013-04-17. Since initiating the journal *Social Indicators Research* in 1974, Alex C. Michalos has been a pioneer in social indicators and quality of life research. This collection of nineteen articles provides an overview of nearly 30 years of work including papers drawn from diverse sources and papers never published before. Topics range over quality of life investigations connected to the problems of combining social, economic, and environmental indicators; measuring the status of women in Canada; housing and migration; health and human well-being; older peoples well-being; leisure activities and health impact of public services; police services; criminal victimization; feminism and ethnic relations on the quality of life. The final paper on multiple discrepancies theory (MDT) is the author's unique contribution to an empirically testable new foundation for theories of utility, satisfaction, and happiness.

Handbook of Social Indicators and Quality of Life Research Kenneth C. Land, Alex C. Michalos, M. Joseph Sirgy, 2011-11-25. The aim of the *Handbook of Social Indicators and Quality of Life Research* is to create an overview of the field of Quality of Life (QOL) studies in the early years of the 21st century that can be updated and improved upon as the field evolves and the century unfolds. Social indicators are statistical time series used to monitor the social system, helping to identify changes and to guide intervention to alter the course of social change. Examples include unemployment rates, crime rates, estimates of life expectancy, health status indices, school enrollment rates, average achievement scores, election voting rates, and measures of subjective well-being such as satisfaction with life as a whole and with specific domains or aspects of life. This book provides a review of the historical development of the field, including the history of QOL in medicine and mental health, as well as the research related to quality of work life (QWL) programs. It discusses several of QOL's main concepts: happiness, positive psychology, and subjective wellbeing. Relations between spirituality and religiousness and QOL are examined, as are the effects of educational attainment on QOL and marketing and the associations with economic growth. The book goes on to investigate methodological approaches and issues that should be considered in measuring and analysing quality of life from a quantitative perspective. The final chapters are dedicated to research on elements of QOL in a broad range of countries and populations.
