management processes of modern nations have also played a significant role in destabilising societies In economics we still operate on principles of partial and general equilibrium whereas we urgently need to adopt the global equilibrium framework proposed here As things stand currently we face two major failings in confronting this crisis First we lack the knowledge to overcome the existential threats before us Second the forces calling for change have adopted inadequate strategies organisations and leadership compared to the well oiled machinery of the status quo What we need is to jointly develop the missing knowledge and use it to take appropriate action beginning with the creation of a new discipline Global Science to make sense of it all
