Global Zero Alert For Nuclear Forces:

Global Zero Alert for Nuclear Forces Bruce G. Blair, 1994 *No End in Sight* Nathan E. Busch, 2014-10-17 The global threat of nuclear weapons is one of today's key policy issues. Using a wide variety of sources including recently declassified information, Nathan E. Busch offers detailed examinations of the nuclear programs in the United States, Russia, China, Iraq, India, and Pakistan, as well as the emerging programs in Iran and North Korea. He also assesses the current debates in international relations over the risks associated with the proliferation of nuclear weapons in the post-Cold War world. Busch explores how our understanding of nuclear proliferation centers on theoretical disagreements about how best to explain and predict the behavior of states. His study bridges the gap between theory and empirical evidence by determining whether countries with nuclear weapons have adequate controls over their nuclear arsenals and fissile material stockpiles such as highly enriched uranium and plutonium. Analyzing the strengths and weaknesses of various systems of nuclear weapons regulation, Busch projects what types of controls proliferating states are likely to employ and assesses the threat posed by the possible theft of fissile materials by aspiring nuclear states or by terrorists. *No End in Sight* provides the most comprehensive and up-to-date analysis of issues at the forefront of contemporary international affairs. With the resurgence of the threat of nuclear terrorism, Busch's insights and conclusions will prove critical to understanding the implications of nuclear proliferation. *The Nuclear Challenge in Russia and the New States of Eurasia* George H. Quester, 1995 First Published in 1996 Routledge is an imprint of Taylor & Francis, an Informa company **Nuclear Weapons After the Comprehensive Test Ban** Eric H. Arnett, 1996 After more than three decades of on-off negotiations, a CTB treaty was signed in 1996. This book describes how the CTB will affect nuclear programmes and decision making in the nuclear weapon states, the threshold states, and the non-nuclear weapon states of proliferation concern. While some states will maintain their nuclear weapon arsenals and options under the CTB, and some weapon modernization may be undertaken, the CTB will foreclose a number of technologies and will probably be signed and ratified. Further, the CTB will codify a norm against nuclear modernization and strengthen the norm against nuclear proliferation in a way that reinforces other efforts to restrict nuclear activities. The book examines the significance of treaty provisions that may be intended to accommodate existing nuclear weapon stockpiles or options and how these provisions may function as modernization or proliferation loopholes. It concludes with a review of practical steps that can be taken both unilaterally and multilaterally to further strengthen these norms and reinforce the CTB regime. **The U.S. Nuclear Deterrent** United States. Congress. House. Committee on Armed Services. Strategic Forces Subcommittee, 2013 *Atomic Audit* Stephen I. Schwartz, 2011-12-01 Since 1945 the United States has manufactured and deployed more than 70,000 nuclear weapons to deter and, if necessary, fight a nuclear war. Some observers believe the absence of a third world war confirms that these weapons were a prudent and cost-effective response to the uncertainty and fear surrounding the Soviet Union's military and political ambitions during the cold war. As early as 1950, nuclear weapons

were considered relatively inexpensive providing a bigger bang for a buck and were thoroughly integrated into U S forces on that basis Yet this assumption was never validated Indeed for more than fifty years scant attention has been paid to the enormous costs of this effort more than 5 trillion thus far and its short and long term consequences for the nation Based on four years of extensive research Atomic Audit is the first book to document the comprehensive costs of U S nuclear weapons assembling for the first time anywhere the actual and estimated expenditures for the program since its creation in 1940 The authors provide a unique perspective on U S nuclear policy and nuclear weapons tracking their development from the Manhattan Project of World War II to the present day and assessing each aspect of the program including research development testing and production deployment command control communications and intelligence and defensive measures They also examine the costs of dismantling nuclear weapons the management and disposal of large quantities of toxic and radioactive wastes left over from their production compensation for persons harmed by nuclear weapons activities nuclear secrecy and the economic implications of nuclear deterrence Utilizing archival and newly declassified government documents and data this richly documented book demonstrates how a variety of factors the open ended nature of nuclear deterrence faulty assumptions about the cost effectiveness of nuclear weapons regular misrepresentation of and overreaction to the Soviet threat the desire to maintain nuclear superiority bureaucratic and often arbitrary decisions pork barrel politics and excessive secrecy all drove the acquisition of an arsenal far larger than what many contemporary civilian and military leaders deemed necessary Atomic Audit concludes with recommendations for strengthening atomic accountability and fostering greater public understanding of nuclear weapons programs and policies

Nuclear Nonproliferation Phillip Margulies, 2008 History suggests that the existence of a weapon leads to its eventual use in war as illustrated by the dropping of the atomic bomb on the Japanese cities of Hiroshima and Nagasaki in 1945 At the opening of the atomic age scientists political analysts generals and politicians were haunted by the idea that nuclear wars could not be won both sides would be virtually destroyed The stakes of the game have only continued to rise as the club of nations currently possessing nuclear arms has become less and less exclusive the United States the Soviet Union Russia England France China Israel India Pakistan and North Korea Following a detailed analysis of this timely issue Nuclear Nonproliferation explores the threat of nuclear production and the potential for solutions in four regions of the world the United States South Asia India and Pakistan the Middle East Israel Iraq and Iran and East Asia North Korea

Prisoners of the Nuclear Dream M. V. Ramana, C. Rammanohar Reddy, 2003 In This Book Some Of South Asia S Best Minds Address Questions On The Political Scientific Strategic Economic And Environmental Aspects Of India S Decision To Proceed With The Nuclear Weapons Programme The Contributors Include Kanti Bajpai Admiral L Ramdas Amartya Sen Amulya Reddy And Jean Dreze While Much Has Been Said In India In Defense Of The Nuclear Tests Of 1998 There Is Also A Strong Body Of Opinion Which Questions India S Decision To Become A Nuclear Weapon State The Essays In This Book Are Representative Of This Critique

They Have Been Written For The General Reader Concerned About The Important Issue Of The Production Of Weapons Of Mass Destruction In South Asia **Before and After the Cold War** George H. Quester,2013-10-18 The end of the Cold War came as good news for most of the world No one had predicted the collapse of Communist rule for several decades This book looks at how political scientists failed to predict such a quick resolution and ways in which the world might develop post Cold War International Control of Tritium for Nuclear Nonproliferation and Disarmament Martin B. Kalinowski,2004-03-29 Tritium is used by all nuclear weapons states to increase the explosive yield of atomic bombs and to miniaturize them However this radioactive material has not yet been put under appropriate international control comparable to the nuclear safeguards applied for plutonium and uranium It is a neglected material in efforts to control the spread and *The Dynamics of Middle East Nuclear Proliferation* Steven L. Spiegel,Jennifer Kibbe,Elizabeth G. Matthews,2001 This study examines the political process of nuclear decision making and explores attitudes toward nuclear proliferation in the Middle East and how they impact the peace process **Setting National Priorities** Robert D. Reischauer,2010-12-01 The federal policy changes that Congress and the President will have to make as we approach the 21st century will be among the most far reaching since the enactment of the New Deal The scope of legislation before policymakers as they continue their efforts to balance the budget will be vast and many of its elements very technical This new highly accessible book examines the nature of the challenges confronting policymakers the options that are available to address these challenges and the ramifications of the various options This new book which continues Brookings highly acclaimed and influential Setting National Priorities series will serve as a guide for understanding and evaluating proposals of the next Congress and the new administration It is also designed to inform the policy debate during the presidential election Edited by Robert Reischauer one of the nation s most noted budget experts the book covers such critical issues as prospects for economic growth how to reduce domestic discretionary spending how to restructure Medicare how much to lower the safety net how to reshape national security for the post Cold War world whether to transform the tax system and how to prepare for the retirement of the baby boom generation This book will be extremely useful for citizens anxious to make sense out of the campaign rhetoric journalists attempting to explain the issues at play and students of public policy public health political science and economics In addition to Reischauer the contributors include Henry J Aaron Barry Bosworth Gary Burtless David Cutler William G Gale Thomas E Mann Charles L Schultze John D Steinbruner R Kent Weaver and Joshua M Wiener *The Future of Arms Control* Michael A. Levi,Michael E. O'Hanlon,2004-12-07 Arms control for decades at the core of the foreign policy consensus today is among the more contentious issues in American politics It is pilloried and considered out of mode in many conservative quarters while being viewed as nearly sacrosanct in many liberal circles In this new book Michael Levi and Michael O Hanlon argue that neither the left nor the right has a correct view of the proper utility of arms control in the age of terror Arms control in the traditional sense lengthy treaties to limit nuclear and other military competitions among the great powers is no

longer particularly useful Nor should arms control be pursued as a means to the end of constraining the power of nations or of promoting global government It is still a critical tool though for controlling dangerous technologies particularly those that in the hands of hostile states or terrorist organizations could cause massive death and destruction Arms control and coercive action including military force must be integrated into an overall strategy for preventing proliferation now more than ever before Arms control should be used to gain earlier warning of illicit activities inside dangerous states allowing the international community to take coercive action in a timely way The authors propose three new criteria to guide future arms control efforts designed to respond to today's geopolitical realities Arms control must focus on the dangers of catastrophic technology not so much in the hands of major powers as of small states and terrorist groups Their criteria lead to a natural focus on nuclear and biological technologies Much tougher measures to prevent countries from gaining nuclear weapons technology while purportedly complying with the Nuclear Non Proliferation Treaty and procedures for controlling dangerous biological technologies will be most prominent in this framework while lower priority is given to efforts such as bilateral nuclear accords and most t

The Four Faces of Nuclear Terrorism Charles D. Ferguson, William C. Potter, 2012-08-21 The Four Faces of Nuclear Terrorism a new book from the Center for Nonproliferation Studies assesses the motivations and capabilities of terrorist organizations to acquire and use nuclear weapons to fabricate and and detonate crude nuclear explosives to strike nuclear power plants and other nuclear facilities and to build and employ radiological weapons or dirty bombs

Return to Armageddon Ronald E. Powaski, 2003-02-20 Return to Armageddon covers the extraordinary years spanning the Reagan Bush and Clinton administrations a period when the United States through its victory in the Cold War led the world away from the brink of nuclear annihilation and then slowly became aware of the increased threat of nuclear confrontation in a world more splintered than ever before and more at the mercy of fanatics and zealots

Comprehensive Security in Asia, 2000-04-27 The term comprehensive security was first used by the late Japanese prime minister Ohira but the concept as such can be traced back to Japanese thinking on security during the fifties Its meaning goes far beyond requirements of military defence against a particular enemy and stresses the need to take into account other aspects vital to national stability food energy environment communication and social security While not denying the importance of military security it explicitly encompasses a wide range of other aspects the search for environmental security for instance which requires cooperation with other countries including hypothetical enemies The concept stresses the need for confidence building methods as a requirement for its attainment and pertains to issues such as preventive diplomacy energy security second order cybernetics greater transparency of international financial markets as means to enhance overall stability It is a notion that goes beyond simplifications such as us and them Since the word has

been first coined in Japan it has caught on in other Asian countries as well It has become clear that the concept is particularly suited for a continent where large and powerful countries such as China Korea Japan and Indonesia are unlikely to enter into close cooperation along the model of the European Union In short in this volume a team of scholars from Asia Europe and the United States provide clear analyses of issues vital to Asian politics an important contribution to one of the key issues of contemporary Asian politics

Challenging the United States Symmetrically and Asymmetrically: Can America Be Defeated? Lloyd J. Matthews, *The Nuclear Turning Point* Harold A. Feiveson, 2010-12-01 Despite the ongoing drawdown of strategic forces under the terms of START both the United States and Russia maintain large arsenals of nuclear weapons poised for immediate launch Under the most optimistic current scenarios these arsenals will remain very large and launch ready for more than a decade This book by a distinguished group of coauthors critically evaluates the current policy of retaining and operating large nuclear arsenals It reviews U S nuclear doctrine and strategy and the role of nuclear weapons in deterring aggression by former Cold War adversaries and other countries with weapons of mass destruction The risks of inadvertent as well as deliberate nuclear attack are assessed The authors argue that small arsenals low hundreds on low alert satisfy all justifiable requirements for nuclear weapons They present a blueprint for making deep cuts in U S and Russian deployments and for lowering their alert level They explain the implications of shifting to small arsenals for further constraining anti ballistic missile defenses strengthening verification and capping or reducing the nuclear arsenals of China France and Britain as well as the threshold nuclear states The political challenges and opportunities both domestic and international for achieving deep reductions in the size and readiness of nuclear forces are analyzed by the authors and by distinguished experts from other countries The coauthors are Bruce Blair Jonathan Dean James Goodby Steve Fetter Hal Feiveson George Lewis Janne Nolan Theodore Postol and Frank von Hippel An appendix with international perspectives by Li Bin China Alexei Arbatov Russia Therese Delpech France Pervez Hoodbhoy Pakistan Shai Feldman Israel Harald Mueller Germany and Zia Mian and M V Ramana South Asia

Reykjavik Revisited George P. Shultz, Steven P. Andreasen, 2013-09-01 Drawn from presentations made at the Hoover Institution's October 2007 conference this collection of essays examines the practical steps necessary to address the current security challenges of nuclear weapons and to move toward the Reykjavik goal of eliminating all nuclear weapons The distinguished group of contributors includes former officials of the past six administrations Republican and Democratic along with senior scholar and scientific experts on nuclear issues
