The Ashgate Research Companion to Modern Imperial Histories John Marriott,2016-03-23 Written by leading scholars this collection provides a comprehensive and authoritative overview of modern empires Spanning the era of modern imperial history from the early sixteenth century to the present it challenges both the rather insular focuses on specific experiences and gives due attention to imperial formations outside the West including the Russian Japanese Mughal Ottoman and Chinese The companion is divided into three broad sections Part I Times surveys the three main eras of modern imperialism The first was that dominated by the settlement impulse with migrants many voluntarily and many more by force making new lives in the colonies This impulse gave way most especially in the nineteenth century to a period of busy and rapid expansion which was less likely to promote new settlement and in which colonists more frequently saw their sojourn in colonial lands as temporary and related to the business mostly of governance and trade Lastly in the twentieth century in particular empires began to fail and to fall Part II Spaces studies the principal imperial formations of the modern world Each chapter charts the experience of a specific empire while at the same time placing it within the complex patterns of wider imperial constellations The individual chapters thus survey the broad dynamics of change within the empires themselves and their relationships with other imperial formations and reflect critically on the ways in which these topics have been approached in the literature In Part III Themes scholars think critically about some of the key features of imperial expansion and decline These chapters are brief and many are provocative They reflect the current state of the field and suggest new lines of inquiry which may follow from more comparative perspectives on empire The broad range of themes captures the vitality and diversity of contemporary scholarship on questions of empire and colonialism encompassing political economic and cultural processes central to the formation and maintenance of empires as well as institutions ideologies and social categories that shaped the lives both of those implementing and those experiencing the force of empire In these pages the reader will find the slave and the criminal the merchant and the maid the

scientist and the artist alongside the structures which sustained their lives and their livelihoods Overall the companion emphasises the diversity of imperial experience and process Comprehensive in its scope it draws attention to the particularities of individual empires rather than over generalising as if all empires at all times and in all places behaved in a similar manner It is this contingent and historical specificity that enables us to explore in expansive ways precisely what constituted the modern empire Eco-Sufficiency and Global Justice Ariel Salleh,2009-01-20 As the twenty first century faces a crisis of democracy and sustainability this book brings women academics and alternative globalisation activists into conversation Through studies of global neoliberalism ecological debt climate change and the ongoing devaluation of reproductive and subsistence labour these uncompromising essays by women thinkers expose the limits of current scholarship in political economy ecological economics and sustainability science **The rise of global Islamophobia in the War on Terror** Naved Bakali,Farid Hafez,2022-09-06 The War on Terror ushered in a new era of anti Muslim bias and racism Anti Muslim racism or Islamophobia is influenced by local economies power structures and histories However the War on Terror a conflict undefined by time and place with a homogenised Muslim Other framed as a perpetual enemy has contributed towards a global Islamophobic narrative This edited international volume examines the connections between interpersonal and institutional anti Muslim racism that have contributed to the growth and emboldening of nativist and populist protest movements globally It maps out categories of Islamophobia revealing how localised histories conflicts and contemporary geopolitical realities have textured the ways that Islamophobia has manifested across the global North and South At the same time it seeks to highlight activism and resistance confronting Islamophobia **Neoliberalism and Terror** Charlotte Heath-Kelly,Christopher Baker-Beall,Lee Jarvis,2017-10-02 Terrorism and neoliberalism are connected in multiple complex and often camouflaged ways This book offers a critical exploration of some of the intersections between the two drawing on a wide range of case studies from the United States United Kingdom Brazil and the European Union Contributors to the book investigate the impact of neoliberal technologies and intellectual paradigms upon contemporary counterterrorism where the neoliberal era frames counter terrorism within an endless war against political uncertainty Others resist the notion that a separation ever existed between neoliberalism and counter terrorism These contributions explore how counterterrorism is already itself an exercise of neoliberalism which practices a form of Class War on Terror Finally other contributors investigate the representation of terrorism within contemporary cultural products such as video games in order to explore the perpetuation of neoliberal and statist agendas In doing all of this the book situates post 9 11 counter terrorism discourse and practice within much needed historical contexts including the evolution of capitalism and the state Neoliberalism and Terror will be of great interest to readers within the fields of International Relations Security Studies Terrorism Studies and beyond This book was originally published as a special issue of Critical Studies on Terrorism *Global Security and the War on Terror* Paul Rogers,2007-07-04 As the War on Terror evolves into the Long War against

Islamo fascism it demands an enduring commitment to ensuring the security of the United States and its allies This policy is based on the requirement to maintain control in a fractured and unpredictable global environment while paying little attention to the underlying issues that lead to insecurity It is an approach that is manifestly failing as the continuing problems in Afghanistan and Iraq demonstrate Moreover control implies the maintenance of a global order that focuses on power remaining in the hands of a transnational elite community principally focused on North America and Western Europe but extending worldwide This elite largely ignores socio economic divisions and environmental constraints and sees continuing stability as being best achieved by the maintenance of the status quo using force when necessary This collection of essays by Professor Paul Rogers argues that this post Cold War security paradigm is fundamentally misguided and unsustainable It concludes with two new essays on the need for a new conception of global security rooted in justice and emancipation Global Security and the War on Terror will be essential reading for students and scholars of security studies the Cold War international relations and development studies Selling the War on Terror Jack Holland,2013 Considers the principal members of Coalition of the Willing in Afghanistan Iraq the United States Britain Australia Despite significant cultural historical and political overlap the War on Terror was nevertheless rendered possible in these contexts in distinct ways drawing on different discourses narratives of foreign policy identity Globalisation Volume 2 Allan Boesak,Len Hansen,2010-09-01 In the course of three years the Globalisation Project has gathered experts from a variety of disciplines to reflect together on globalisation its origins its manifestations and consequences particularly for the Christian religion and for Christian churches today This second volume on this theme in the Beyers Naud Series also represents a selection of papers that were presented at consultations of the Joint Project in this case during those held at Stellenbosch and Emden Germany in 2009 *Global Social Problems* Victor George,Robert M. Page,2004-11-19 Suggesting ways in which global social problems could be dealt with through global social policy this work provides an introduction to a wide range of social problems and their relation to the global era such as AIDS poverty and racism **Exploring the Boundaries of International Criminal Justice** Mark Findlay,2016-04-15 This collection discusses appropriate methodologies for comparative research and applies this to the issue of trial transformation in the context of achieving justice in post conflict societies In developing arguments in relation to these problems the authors use international sentencing and the question of victims interests and expectations as a focus The conclusions reached are wide ranging and highly significant in challenging existing conceptions for appreciating and giving effect to the justice demands of victims of war and social conflict The themes developed demonstrate clearly how comparative contextual analysis facilitates our understanding of the legal and social contexts of international punishment and how this understanding can provide the basis for expanding the role of restorative international criminal justice within the context of international criminal trials *Managing Global Risks in the Urban Age* Yee-Kuang Heng,2016-03-03 The first full length exposition of what it terms a global city global risks nexus this volume

crosses disciplinary boundaries to draw upon research from Security Studies Geography Sociology and Urban Studies Innovative in its approach integrating theories about Global Cities with those positing a Global Risk Society Yee Kuang Heng positions this research in the midst of two concurrent global trends that will gain more significance in coming years The world is experiencing the consequences of not only rapid globalisation but also urbanization In 2008 the UN declared that more than half the world s population was now urban At the same time highly connected global cities like New York London Tokyo and Singapore also face rapidly spreading global risks such as pandemics and financial crises Unique in developing a typology of global risks that threaten a global city like Singapore beyond its Asian focus the book also draws out thematic and policy lessons pertinent to other global cities Global cities do not simply materialize They are dependent on a range of stakeholders at various levels that produce and re produce its command and control capabilities in the face of global risks Singapore s experiences managing global risks in the financial aviation and maritime domains are common concerns shared by many countries and cities that have or aspire to develop similar critical infrastructure **Climate Terror** Sanjay Chaturvedi,2016-01-12 Climate Terror engages with a highly differentiated geographical politics of global warming It explores how fear inducing climate change discourses could result in new forms of dependencies domination and militarised climate security
