Angelides,2016-06-14 This book examines the intersection of globalisation and intercultural education by focusing on the trajectory of education policy from development to adoption and implementation The centrality of the nation state has been constrained by a wide range of new socio cultural political and economic phenomena over the past decade such as globalisation Europeanisation modernisation and global recession The main implications of these developments have only just begun to unfold and continue to be debated by policy makers academics and educators However it is widely accepted that global socio political and economic developments have allowed supranational institutions functioning across nation states rather than within them to perform many state functions with regards to education policy development and implementation Yet much remains unknown and under researched about the impact of these still nascent developments on the trajectory of intercultural education This book sets out to fill in this gap by examining the intersection of globalisation and intercultural education through macro micro integration After all for modern societies to establish social cohesion education research should examine issues of citizenship democracy and intercultural education under the lens of globalisation      **Globalization and Educational Restructuring in the Asia Pacific Region** K.
