

The book cover features a painting of a steamship at sea. The ship is positioned in the middle ground, with two smokestacks emitting thick white smoke that drifts towards the left. The sea is dark and choppy, with several small whitecaps visible. The sky is a mix of pale blue and white, suggesting a hazy or overcast day. The overall style is that of a 19th-century maritime painting.

**Globalization and Egalitarian Redistribution** Pranab K. Bardhan, Samuel Bowles, Michael Wallerstein, 2006

David R. Cameron, Gustav Ranis, Annalisa Zinn, 2006-04-12 Is the nation state under siege A common answer is that globalization poses two fundamental threats to state sovereignty The first concerns the unleashing of centrifugal and centripetal forces such as increasing market integration and the activities of institutions like the IMF World Bank and WTO that imperil state sovereignty from outside the nation state The second threat emanates from self determination movements that jeopardize state sovereignty from inside Rigorously analyzing popular hypotheses on globalization s effect on state sovereignty from a broad social sciences perspective the authors use empirical evidence to suggest that globalization s multilevel threats to state sovereignty have been overestimated In most instances globalization is likely to generate pressure for increased government spending while only one form of market integration foreign direct investment by multinational enterprises appears to increase any feeling of economic insecurity This volume will be invaluable to course instructors at both graduate and undergraduate levels policy makers and members of the general public who are concerned about the effects of globalization on the nation state **Globalization and Redistribution** Samuel Bowles, 2002 A reduction of

impediments to international flows of goods capital and professional labor is thought to raise the economic costs of programs by the nation state and labor unions to redistribute income to the poor and to provide economic security But some of the more politically and economically successful examples of such policies for example Nordic social democracy and East Asian land reform have occurred in small open economies which would on the above account provide a prohibitive environment for egalitarian interventions I present a model of globalization and redistribution to answer the following question In a liberalized world economy what programs of egalitarian redistribution and social insurance are implementable by democratic nation states acting independently While in the absence of international coordination globalization indeed makes it difficult for nation states to affect the relative after tax prices of mobile goods and factors of production and for this and other reasons may limit the effectiveness of some conventional strategies of redistribution a large class of state and trade union interventions leading to substantial improvements in the wages employment prospects and economic security of workers is not ruled out by globalization Included are redistributions of assets which provide efficient solutions to incentive problems arising in principal agent relationships such as wage employment farm and residential tenancy **Indian Economy and**

**The Strains of Commitment** Keith G. Banting, Will Kymlicka, 2017 Building and sustaining solidarity is a compelling challenge especially in ethnically and religiously diverse societies Recent research has concentrated on forces that trigger backlash and exclusion The Strains of Commitment examines the politics of diversity in the opposite direction exploring the potential sources of support for an inclusive solidarity in particular political sources of solidarity The volume asks three questions Is solidarity really necessary for successful modern societies Is diversity really a threat to solidarity And what types of political communities political agents and political institutions and policies help sustain solidarity in contexts of diversity To answer these questions the volume brings together leading scholars in both normative political theory and empirical social science Drawing on in depth case studies historical and comparative research and quantitative cross national studies the research suggests that solidarity does not emerge spontaneously or naturally from economic and social processes but is inherently built or eroded through political action The politics that builds inclusive solidarity may be conflicting in the first instance but the resulting solidarity is sustained over time when it becomes incorporated into collective typically national identities and narratives when it is reinforced on a recurring basis by political agents and most importantly when it becomes embedded in

political institutions and policy regimes While some of the traditional political sources of solidarity are being challenged or weakened in an era of increased globalization and mobility the authors explore the potential for new political narratives coalitions and policy regimes to sustain inclusive solidarity Poverty and the International Economic Legal System Krista Nadakavukaren Schefer, 2013-03-21 With a focus on how trade foreign investment commercial arbitration and financial regulation rules affect impoverished individuals Poverty and the International Economic Legal System examines the relationship between the legal rules of the international economic law system and states obligations to reduce poverty The contributors include leading practitioners practice oriented scholars and legal theorists who discuss the human aspects of global economic activity without resorting to either overly dogmatic human rights approaches or technocratic economic views The essays extend beyond development discussions by encouraging further efforts to study improve and develop legal mechanisms for the benefit of the world's poor and challenging traditionally depersonified legal areas to engage with their real world impacts **Debating Immigration** Carol M. Swain, 2018-08-23 Presents twenty one essays exploring contemporary immigration and its impact on politics in the US and Europe
