Globalization And The Margins:

Globalization and the Margins R. Grant, J. Short, 2002-09-06 Globalization has become one of the dominant ideas of recent times. However, the debate on globalization as global as it ought to be. In this book, Grant and Rennie Short have brought together prominent experts in the field to consider how globalization affects marginalized countries and groups. A variety of case studies provide a unique assessment of the issue of globalization and offer a new look at the relationship between the global and the local.

Globalization on the Margins (2nd Edition) Iveta Silova, Sarfaro Niyozov, 2020-01-01 Reflecting on almost three decades of postsocialist transformations, the second edition of *Globalization on the Margins* explores continuities and changes in Central Asian education development since the dissolution of the Soviet Union in 1991, with a particular focus on the developments that took place since the production of the first edition in 2011. Rather than viewing these transformations in isolation, the authors place their analyses within the global context by reflecting on the interaction between Soviet legacies and global education reform pressures in the Central Asian countries of Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan. This new edition, in addition to a revised introduction and a newly added conclusion, consists of four thematic sections, each reflecting a key theme in the educational life of the Central Asian states. These thematic sections, introduction and conclusion, collectively update our understanding of the recent developments and challenges in education of the five Central Asian states. They, however, go beyond mere information update so as to complicate, re-engage, re-form, and re-define the margins, taking up margins as a conceptual, geographic, cultural, and geopolitical construct. Notwithstanding the diversity of local and international authors' variety of theoretical perspectives, methodological approaches, and conceptual lenses, the essays reveal the complexity and uncertainty of the post-socialist education transformations. Instead of portraying the transition process as the influx of Western ideas into the region, *Globalization on the Margins* provides new lenses to critically examine education as a contested field of diverse perspectives, competing forces, and multidirectional flow of ideas, concepts, and reforms in Central Asia.

ENDORSEMENTS Hindsight famously brings clarity. And much of what happened after the fall of the Berlin Wall and the collapse of the Soviet Union has now been correctly handed over to historians. Nonetheless, we ignore that history at our peril. The contributors to this volume show that carefully textured and historically attuned education research generates deep insights into ongoing transformations and the political, cultural, social, and economic structures, relations, and practices that do the work of producing margins and centers in the first place. Noah W. Sobe, Loyola University Chicago.

Globalization on the Margins and at the epicentre of the battles of the Great Powers. Two excellent educators, Sarfaro Niyozov and Iveta Silova, compiled a timely and long-awaited scholarly work based on empirical research in societies which had similar history close to three decades ago. All the contributors are prolific educators who know the education system from within and without, who either hailed from the region or have spent a considerable amount of time to know the systems well. The book contains remarkable stories

of education through the ups and downs of historical evolution It is a must read primer for anyone interested in learning about high quality research in the field of education in Central Asia It is a huge contribution to educational research with an impact on research and teaching for years to come Duishon Shamatov Nazarbayev University Kazakhstan The challenge of moving Central Asia from the borders of the Soviet Empire to the world s center is the focus of the discussions in Globalization on the Margins The transition to the Western models of education was happening in the context of major paradigm shift which entire humanity was experiencing and which could be described as the arrival of the new post industrial civilization During this process Central Asian countries have been pushed to the margins because their contribution to the wealth of the new world know how was much less pronounced than that of their Western neighbours Therefore investment into the research that contributes to local knowledge production seems a natural solution to the problem All the contributors to this book have a vast experience in the region and many of their observations are thought provoking This is a very insightful and much needed book Elena Lenskaya Moscow School of Social and Economic Sciences Russia

Globalization and Urban Development Harry W. Richardson,Chang-Hee C. Bae,2005-07-06 Most research on globalization has focused on macroeconomic and economy wide consequences This book explores an under researched area the impacts of globalization on cities and national urban hierarchies especially but not solely in developing countries Most of the globalization urban research has concentrated on the global cities e g New York London Paris Tokyo that influence what happens in the rest of the world In contrast this research looks at the cities at the receiving end of the forces of globalization The general finding is that large cities on balance benefit from globalization although in some cases at the expense of widening spatial inequities

Globalization, Culture and Inequality in Asia Timothy J. Scrase,Todd Joseph Miles Holden,Scott Baum,2003 Contemplating globalization from a sociological perspective it is without doubt that a major site for social political economic and cultural change in the new millennium lies in the Asian region The chapters in this book seek to describe and analyze a number of key aspects of social and cultural change wrought by globalization in the Asian region The underlying theme in the book is the multi dimensional way in which globalization in the form of ideas practices and technology have introduced social inequalities in specific contexts In particular the book examines how inequality has been reproduced challenged and theorized in Asia by the advent of globalizing culture Written by experienced and established

scholars the study provides both theoretical explanation and discussion and analysis of empirical data from a range of social cultural and political economic perspectives and draws on studies from several countries in the region **Preaching in an Age of Globalization** Eunjoo Mary Kim,2010-01-01 There are many books on the market that address how culture race gender or economic status affect the way preachers preach and congregations hear sermons This is the first book to address preaching that promotes solidarity across these differences Preaching needs to be targeted to specific contexts But how can a preacher handle specific contexts when we live in a globalized world What does local context mean and who defines it Kim develops the concept of trans contextual preaching to show how preachers can respect diversity and global connections She develops a new theology of preaching examines the modes of biblical interpretation appropriate for trans contextual preaching and explores designs for sermons Sample sermons from the author provide excellent illustrations *Urban Theory* John Rennie Short,2017-08-24 This wide ranging and state of the art new edition reviews the classic contributions to understanding modern and post modern cities and is comprehensively updated to take account of the issues and concepts at stake in 21st century urban theory **Trade Investment and Development in the Contemporary Caribbean**

Bhoendradatt Tewarie,Roger Hosein,2007 Small open economies like those making up the countries of the Caribbean region share a number of fundamental problems of economic management which ultimately affect the entire development process Co authors Bhoie Tewarie and Roger Hosein use Trinidad and Tobago and the management of its energy resources as a case study to examine some of the development challenges that face countries of the region They make the point that in spite of that country s abundant energy resources which has allowed it to grow at a comparatively rapid rate Trinidad and Tobago like lesser endowed CARICOM partners has had to cope with challenges such as diversification human development managerial capacity and institutional weakness all of which contributed to seven consecutive years of decline between 1983 and 1990 Not only is the availability of resources no guarantee for economic success it also creates unique problems and in the case of Trinidad and Tobago this is manifested in uneven development in the energy sector compared to other sectors of the economy and society While the volume focuses on Trinidad and Tobago there is ample discussion of a range of issues that affect the entire region extending from trade within CARICOM to globalization open regionalism relations with the United States human capital formation and the role of education systems and educational policy in the development process Tewarie and Hosein combine their talents and research in the areas of economics culture education literature trade and investment and development generally to produce a volume that is rich in data and insights into the development process

Globalization on the Margins Iveta Silova,2010 There may only be one way traffic on the old silk road when it comes to ideas about education policy transformation this has not helped avoid a huge ideological pile up Silova s exploration reveals how oversold and oversimplified Western policy ideas collide with inertia in education systems in post Soviet Central Asia What matters is not the ideological disparities between East and West but when and how these collude to redefine the

boundaries for education exclusion and education privilege in Central Asia Globalization on the Margins helps us to better understand this collision and this convergence hitchhikers on that road will do well to take along some reading Hugh McLean Director Education Support Program Open Society Foundations London Book Jacket **Spatial Turns** Jaimey Fisher, Barbara Caroline Mennel, 2010 The phrase spatial turns signals the growing importance of space as an analytical as well as representational category for culture The volume addresses such emerging modes of inquiry by bringing together for the first time essays that engage with spatial turns spatiality and the theoretical implications of both in the context of German culture history and theory Migrating from fields like geography urban studies and architecture the new centrality of space has transformed social science fields as diverse as sociology philosophy and psychology In cultural studies productive analyses of space increasingly cut across the studies of literature film popular culture and the visual arts Spatial Turns brings together essays that apply a spatial analysis to German literature and other media and engages with specifically German theorizations of space by such figures as Siegfried Kracauer and Walter Benjamin The volume is organized in four sections Mapping Spaces addresses cartography in all forms and in its intersection with culture Spaces of the Urban takes up one of the key sites of spatial studies the city Spaces of Encounter considers how Germany has become a contact zone for multiple ethnicities and Visualized Spaces concerns the theorization of space in film and new media studies Meeting Globalization's Challenges Luís Catão, Maurice Obstfeld, 2019-11-05 In the US in Europe and throughout the world globalization in tandem with technological progress has left a massive number of people behind feeling dispossessed disenfranchised and angry Leading the charge of hyperglobalization during the second half of the last century and enforcing the Western framework of austerity in the developing world has been the International Monetary Fund Along with the World Bank and WTO many consider the IMF one of the most consequential institutions to have pushed the world economy blindly towards excessive globalization while not adequately considering its powerful negative consequences In October 2017 however the IMF convened with some of the world's most celebrated economists and experts on trade and globalization to have an honest discussion on the most pressing concerns the world faces today as a result of globalization and how to address the extensive challenges it has created Edited by chief economist Maurice Obstfeld and senior economist Luis Catao of the IMF the book brings together a team of respected senior economists with the most promising younger scholars to address five major themes how globalization affects economic growth and social welfare potential political implications of an honest discussion of globalization and that free trade may not be politically viable free trade's role in global inequality how workers adjust or not when they're dislocated by globalization and how trade policy influences the way countries develop their economies and societies The book could represent a historic milestone at which the world's top economists and policymakers have an unprecedented honest debate about the real costs and consequences of globalization **Journeys at the Margin** Jung Young Lee, 1999 Being an immigrant is both being in between two cultures that of the immigrant and that

of the dominant group and being in both of these cultures It ultimately means being in beyond the two cultures together In this book a group of prominent Asian American Christian theologians reflect in an autobiographical form on how being an Asian and a North American has shaped the way they understand the Christian story As the United States becomes increasingly multiethnic and multicultural this book offers useful suggestions on how to meet the challenge of cultural diversity in both Church and society Globalization Trends and Regional Development Roberta Capello,Tomaz Ponce Dentinho,2012-01-01 Global trends and local effects have been almost ubiquitous since the 1980s However few like this book have successfully examined the local effects of global trends and processes Each of this book s ten chapters provides an empirically based analysis that illuminates the local effects driven by global forces Roger Stough George Mason University US This timely book investigates the challenges that emerge for local economies when faced with the new globalization trends that characterize today s world economy In this instance globalization is interpreted as a process of internationalization of production and markets which can take various forms such as increasing international trade or increasing foreign direct investments all of which give rise to the growing integration and interdependency of European economies with regard to the other main world economies the expert contributors use a fresh perspective in their analysis of globalization trends emphasizing recent changes and providing an up to date picture of current developments in both foreign investments and the consequent migration of human capital Qualitative rather than quantitative trends in human capital and financial capital flows are taken into account with a particular focus on their impacts on regional growth perspectives Highlighting the European economy s strengths and weaknesses in facing the challenges of the new globalization trends this book will provide a stimulating read for a wide ranging audience encompassing scholars of regional science regional economics economic and regional geography international economics and international business *The Study of Africa Volume 2: Global and Transnational Engagements* Tiyaambe Zeleza,2006-06-15 This is the second of a two volume work taking stock of the study of Africa in the twenty first century its status research agenda and approaches and place It is divided into two parts the first entitled Globalisation Studies and African Studies and the second African Studies in Regional Contexts Topics addressed in part one include trans boundary formations and the study of Africa global economic liberalisation and development in Africa African diasporas academics and the struggle for a global epistemic presence and the problem of translation in African studies Part two considers African and area studies in France the US the UK Australia Germany and Sweden anti colonialism and Russian soviet African studies African studies in the Caribbean in historical perspective the teaching of African history and the history of Africa in Brazil African studies in India African studies and historiography in China in the twenty first century and African studies and contemporary scholarship in Japan **Global Criminal and Sovereign Free Economies and the Demise of the Western Democracies** Robert J. Bunker,Pamela Ligouri Bunker,2014-09-15 Much has been written about the many economic benefits of globalization and the triumph and spread of

democratic liberalism with the end of the Cold War following the demise of the Soviet Union This work takes issue with such wine and roses perspectives about the future of the Western democracies and their faith based views on the moral purity of a globalized marketplace It also questions many of the assumptions found in the status quo reinforcing discipline of international political economy IPE a discipline that focuses on the formal and legitimate economies and the fa ade they present that international relations and commerce is still dominated and dictated solely by the old Westphalian state centric system Having highlighted these concerns this book looks at two major themes The first theme focuses on the theoretical perception that a Dark Renaissance is taking place globally one in which the Western liberal democracies and its citizens are ill prepared to respond because it exists at the trans civilization level bridging the modern to the post modern world The second theme focuses on the actual process of state deconstruction that is taking place This process is leading to what may become the very undoing of the democracies Drawing together experts from a variety of backgrounds this work explores the increasing shift away from formal based capitalism and evaluates through case studies how different states are responding to the challenges they face This work will be of great interest to students and scholars of international political economy
