South Asia Rajah Rasiah, Bruce McFarlane, Sarosh Kuruvilla, 2017-10-02 Among the key debates fought in developing economies is whether globalization through liberalization is the means by which economies can industrialize and provide their labour forces with tangible improvements in the material conditions of living This book addresses this issue head on using empirical evidence from some of the fastest growing and transition economies from East and South Asia Countries such as the Philippines and Malaysia have already started to deindustrialize before enjoying industrial maturity while with the exception of China and evidence of some growth in real wages in the other economies the evidence appears compelling to

suggest that increased industrialization and integration into the capitalist economy have not succeeded in providing significant labour improvement. The evidence suggests that a proactive state focusing on enhancing the material conditions of labour is pertinent to ensuring sustainable long term industrialization and thus improving material conditions for workers. This book was originally published as a special issue of the Journal of the Asia Pacific Economy.

The Local Impact of Globalization in South and Southeast Asia Bart Lambregts, Niels Beerepoot, Robert C. Kloosterman, 2015-08-27 In the past two decades several millions of IT enabled services jobs have been relocated or offshored from the US and Europe to in particular low cost economies around the world. Most of these jobs so far have landed in South and South East Asia with India and the Philippines receiving the bulk of them. This has caused profound changes in the international division of labour and has had correspondingly wide social and economic effects. This book examines how this next wave in globalization affects people and places in South and South East Asia. It brings together twelve case studies from India, the Philippines, China, Hong Kong and Thailand and explores how and for whom services offshoring creates opportunities, triggers local economic transformations and produces challenges. This book in addition compares how different countries take part in this second global shift, investigates service sector driven economic development from a historical perspective and engages with the question whether and to what extent services offer a new promising avenue of sustained economic growth for developing countries. It argues that service led development in developing countries is not easy for all the workers involved or a guaranteed path to sustained economic development and prosperity. This volume stands out from other books in the field in its exploration of the social and economic outcomes in the cities and countries where services have been located. Based on cutting edge empirical research and original data, the volume offers a state of the art contribution to this growing debate. The book provides valuable insights for students, scholars and professionals interested in services offshoring, socio economic development and contemporary transformations in South and South East Asia.

Indias Policy of Non-Reciprocity in South Asia Christian Carbone, 2018-11-01 India is often perceived as a regional power, but a closer look reveals that it is in a disadvantageous position vis vis China in South Asia. The first reason is that Indian governments never had the political, economic and military capacities to pursue their regional power ambitions with their neighbours in the long run. South Asian countries could always play the China card in order to evade India's influence. Second, India's new South Asia policy with the focus on trade and connectivity has improved regional cooperation since 1991. But China remains an economically more attractive and politically more reliable partner for India's neighbours. South Asia, though often loosely defined, comprises small island like Maldives to India, a country of continental proportions. Its

short six or seven decades old political and independent history has witnessed the amazing functioning of the largest democracy in India to Kingdoms in Bhutan and Nepal to political upheavals through frequent coup d tats in some countries in the group as well as resurgence of democratic communism in Nepal Besides two of the major countries have nuclear capabilities that is further compounded by the already nuclear Chinese in the larger neighbourhood trying to keep their stilted balance by proxy through Pakistan Above all almost all countries have suffered and witnessed extremism and terrorism often exported from outside and across the borders though some have in the process become the havens of terrorist groups and camps as part of their unstated policy in order to serve their myopic untenable foreign policy goals and objectives The present work is compiled to analyse India s foreign policy in the context of South Asia As such the present endeavour attempts at portraying some crucial issues concerned with the diplomatic relations of India with some South Asian countries Hopefully the information gathered herein will prove useful to all those interested in the study

Fogarty, 2008-09-30 Over the past decade a virtual cottage industry has arisen to produce books and articles describing the nature origins and impact of globalization Largely and surprisingly absent from this literature however has been extensive discussion of how globalization is affecting the United States itself Indeed it is rarely even acknowledged that while the United States may be providing a crucial impetus to globalization the process of globalization once set in motion has become a force unto itself Thus globalization has its own logic and demands that are having a profound impact within the United States often in ways that are unanticipated This set offers the first in depth systematic effort at assessing the United States not as a globalizing force but as a nation being transformed by globalization Among the topics studied are globalization in the form of intensified international linkages globalization as a universalizing and or Westernizing force globalization in the form of liberalized flows of trade capital and labor and globalization as a force for the creation of transnational and superterritorial entities and allegiances These volumes examine how each of these facets of globalization affects American government law business economy society and culture
