Social Movements for Global Democracy Jackie Smith, 2008-02-04 Honorable Mention 2010 Book Award Global Division Society for the Study of Social Problems Honorable Mention 2010 PEWS Book Award Political Economy of the World System section of the American Sociological Association This groundbreaking study sheds new light on the struggle to define the course of globalization Synthesizing extensive research on transnational activism *Social Movements for Global Democracy* shows how transnational networks of social movement activists democratic globalizers have worked to promote human rights and ecological sustainability over the predominant neoliberal system of economic integration Using case studies of recent and ongoing campaigns for global justice Jackie Smith provides valuable insight into whether and how these activists are succeeding She argues that democratic globalizers could be more effective if they presented a united front organized around a global vision that places human rights and ecological stability foremost and if they were to directly engage governments and the United Nations Illuminating the deep seated struggles between two visions of globalization Smith reveals a network of activists who have long been working to democratize the global political system [Trade Unions and Democracy](#) Mark Harcourt, Geoffrey E. Wood, 2004 This book explores the changing role of trade unions as products of

and agents for democracy Despite conventionally being portrayed as politically marginalised and in terminal decline trade unions continue to represent a significant component of society within most industrialised countries and have demonstrated a capacity for revival and renewal in the face of difficult circumstances It brings together a distinguished panel of leading and emerging scholars in the field and provides a critical assessment of the current role of trade unions in society their capacity to impact on state policies in such a manner as to ensure greater accountability and fairness and the nature and extent of internal representative democracy within the labour movement This volume will be of interest to students and academics in industrial relations critical management studies political studies and sociology [No Truck with the Chilean Junta!](#) Ann

Jones,2014-08-01 When lorry drivers in Northampton slapped stickers on their cabs declaring No truck with the Chilean Junta they were doing more than threatening to boycott They were asserting their own identity as proud unionists and proud internationalists But what did trade unionists really know of what was happening in Chile And how could someone else s oppression become a means to solidify your own identity The labour movements of Britain and Australia used Chile as an impetus for action and to give meaning to their own political expression though it was not all smooth sailing Throughout the 1970s social movements and unions alternately clashed and melded and those involved with Chile were also caught within the unhappy marriage of the cross cultural left This book draws together the events and stories of these complex times

Handbook on World Social Forum Activism Jackie Smith, Ellen Reese, Scott Byrd, Elizabeth Smythe, 2015-11-17 The World Social Forum

WSF has become the focus for a diverse array of movements advancing alternative visions of globalisation. The numerous WSFs have helped to connect activists in an increasingly dense network of advocates for radical social change. They have mobilised hundreds of thousands of people and may be one of the most important political developments of our time. The Handbook of World Social Forum Activism brings together leading scholars of the social forum process from North America and Europe. The collection contributes to the ongoing process of reflection from the WSF experience and is accessible to activists, students and scholars alike.

The Politics of Empire Alan Freeman, Boris Kagarlitsky, 2004-09-20. Bringing together nine leading writers and activists from around the world, this book explores the origins of a new age of Empire. Writers including Walden Bello, Jayati Ghosh, Kate Hudson, Boris Kagarlitsky and Alan Freeman offer a wealth of factual evidence showing that globalisation has driven apart peoples, classes and nations, shaping and reshaping key regions of the world. Challenging the idea that it is inevitable, they argue that its economic contradictions have thrown the world order that sustained it into crisis. Globalisation's opponents are shaping a new intellectual tradition. For the first time, the book brings together the critiques thrown up by resistance to globalisation, to war and to imperialism. Free from ideology and dogma, showing how the peace and anti-globalisation movements can join forces and face the coming period of world history.

Another Production Is Possible Boaventura de Sousa Santos, 2020-05-05. This is the second volume after *Democratizing Democracy* of the collection *Reinventing Social Emancipation: Towards New Manifestoes*. Here the author examines alternative models to capitalist development through case studies of collective land management cooperatives of garbage collectors and women's agricultural cooperatives. He also analyzes the changing capital-labor conflict of the past two decades and the way labor solidarity is reconstituting itself under new forms from Brazil to Mozambique and South Africa.

International Communism and Transnational Solidarity: Radical Networks, Mass Movements and Global Politics, 1919-1939, 2016-11-21. This book provides an analysis of the articulation and organisation of radical international solidarity by organisations that were either connected to or had been established by the Communist International (Comintern), such as the International Red Aid, the International Workers Relief, the League Against Imperialism, the International of Seamen and Harbour Workers, and the International Trade Union Committee of Negro Workers. The guiding light of these organisations was a radical interpretation of international solidarity, usually in combination with concepts and visions of gender, race and class, as well as anti-capitalism, anti-imperialism, anti-colonialism and anti-fascism. All of these new transnational networks form a controversial part of the contemporary history of international organisations. Like the Comintern, these international organisations had an ambiguous character that does not fit nicely into the traditional typologies of international organisations, as they were neither international governmental organisations nor international non-governmental organisations. They constituted a radical continuation of the pre-First World War Left and exemplified an attempt to implement the ideas and movements of a new type of radical international solidarity, not only in Europe but on a global scale.
