Urban Change in Iran Fatemeh Farnaz Arefian,Seyed Hossein Iradj Moeini,2015-12-18 This book based on conference excerpts investigates various aspects of contemporary Iranian urbanism The topics covered range from the impacts of political developments on the cities rapid socio economic developments to the cities troubled relationship with the country s built environment history and their frequently ill managed exposure to Western notions of development and globalisation Last but not least the country s vulnerability to natural disasters in an age of increasing urban population densification is also considered Alongside more theoretically and artistically oriented debates the book s individual contributions turn their attention to the now much higher proportion of

urban dwellers in the country's rising population. It also discusses the policies designed in response to these demographic moves including those to develop new towns, find housing for the excess population in existing cities, renovate historic buildings and create new public spaces. The practice policy oriented contributions also include those concerning the country's responses to natural disasters.

### **Strategies for Urban Development in Leipzig, Germany** Jean-Claude

Garcia-Zamor, 2013-10-18 The demographic pressure caused by migration offers a considerable challenge for urban centers today. It results in an uneven development of the community and focus of urban planners becomes how to provide decent low cost housing and transportation in order to facilitate the integration of poorer residents among the rest of the community. In large industrialized countries the challenges of urban policy makers are made even more complicated since these governments depend on state or federal legislators to obtain the massive amounts of funding required for adequately addressing these local issues that are in global cause. The book analyzes the strategies for urban development in Leipzig, Germany and shows how civic leaders were able to harmonize planning and equity. They relied heavily on two interesting approaches in that process: the promotion of culture as a key component of urban development and the reconciliation of the inevitable process of gentrification with social equity. The book also looks at the globalization aspect of urban development, reviews research in social equity in urban development in Europe and the United States and describes sustainability as an important element of urban renaissance.

### Planning World Cities

Peter Newman, Andy Thornley, 2011-06-21 This major comparative text on urban planning and the global and regional context in which it takes place examines what have been traditionally regarded as world cities: New York, London, Tokyo and also a range of other important cities in America, Europe and Asia. The authors show the role planning has played in the way cities have responded to the forces of globalization and argue for the importance of diverse rather than one size fits all planning practices. This fully revised second edition systematically brings the debates on the impact of globalization right up to date and provides integrated coverage of the latest planning theory and practice. It also contains extended analysis of the implications of the rapid growth of Chinese cities such as Shanghai, Hong Kong and Beijing. New material is included on the impact of globalization on poorer mega cities like Mumbai and Johannesburg.
