

Globalization between the pre modern periods to modern period

The industrial revolution in the 19th century was one of the major periods in the history of globalization. Due to the industrial revolution, there was a significant increase in the quantity and quality of the products. This led to higher exports and better trade and business relations.

Due to better products and colonization, lots of countries across the world became the consumers of the European market. The phase of pre globalization perhaps came to an end after the First World War.

Europe A G Hopkins takes readers from the colonial era to today to show how far from diverging the United States and Western Europe followed similar trajectories throughout this long period and how America's dependency on Britain and Europe extended much later into the nineteenth century than previously understood In a sweeping narrative spanning three centuries Hopkins describes how the revolt of the mainland colonies was the product of a crisis that afflicted the imperial states of Europe generally and how the history of the American republic between 1783 and 1865 was a response not to the termination of British influence but to its continued expansion He traces how the creation of a U S industrial nation state after the Civil War paralleled developments in Western Europe fostered similar destabilizing influences and found an outlet in imperialism through the acquisition of an insular empire in the Caribbean and Pacific The period of colonial rule that followed reflected the history of the European empires in its ideological justifications economic relations and administrative principles After 1945 a profound shift in the character of globalization brought the age of the great territorial empires to an end American Empire goes beyond the myth of American exceptionalism to place the United States within the wider context of the global historical forces that shaped the Western empires and the world

British Imperialism and Globalization, C. 1650-1960 Gareth Austin, 2022 Examining the domestic politics of imperial expansion these essays question the role of the Industrial Revolution and British imperial leadership beyond the issue of hierarchy and The Great Divergence This volume brings together leading global economic historians to honour

Patrick O'Brien's contribution to the establishment of global economic history as a coherent and respected field in the academy. Inspired by O'Brien's seminal work on the British Industrial Revolution as a global phenomenon, these essays expand the role of the Industrial Revolution and British imperial leadership beyond the issue of hierarchy. The Great Divergence: The change from the protective Atlantic empire (1650–1850) to the free trade empire of the last half of the long nineteenth century is elaborated, as are the conscious efforts of the free trade empire to develop markets and market economies in Africa. British domestic politics associated with the change and the continuation to the recent politics of Brexit are fascinatingly narrated and documented, including the economic rationale for imperial expansion in the first instance. The narrative continues to the crises of globalization caused by the world wars and the Great Depression, which forced the free trade British Empire to change course. Further, the effects of the crises and the imperial reaction on the East African colonies and on New Zealand and Australia are examined. Given current concerns about the environmental impact of economic activities, it is noteworthy that this volume includes the environmental impact of globalization in India caused by the free trade policy of the British free trade empire.
