Globalization Of Crime Understanding Transitional Relationships In Context:

The Globalisation of Crime Mark Findlay, 1999-01-14 Crime is becoming as much a feature of the emergent globalized culture as other forms of consumerism The Globalization of Crime presents an integrated theory of crime and social context examining trends in criminalization crime and social development social control and the political economy of crime in order to understand the role of crime in social change This is the first book to challenge existing analyses of crime in the context of globalization and show crime is as much a force for globalization as globalization is a force for crime

Crimes of Globalization Dawn Rothe, David Friedrichs, 2014-07-11 This book addresses immensely consequential crimes in the world today that to date have been almost wholly neglected by students of crime and criminal justice crimes of globalization This term refers to the hugely harmful consequences of the policies and practices of international financial institutions principally in the global South A case is made for characterizing these policies and practices specifically as crime Although there is now a substantial criminological literature on transnational crimes crimes of states and state corporate crimes crimes of globalization intersect with but are not synonymous with these crimes Identifying specific reasons why students of crime and criminal justice should have an interest in this topic this text also identifies underlying assumptions defines key terms and situates crimes of globalization within the criminological enterprise The authors also define crimes of globalization and review the literature to date on the topic review the current forms of crimes of globalization outline an integrated theory of crimes of globalization and identify the challenges of controlling the international financial institutions that perpetrate crimes of globalization including the role of an emerging Global Justice Movement The authors of this book have published widely on white collar crime crimes of states state corporate crime and related topics This book will be essential reading for academics and students of crime and criminal justice who the authors argue need to attend to emerging forms of crime that arise specifically out of the conditions of globalization in our increasingly globalized rapidly changing world

Jurisprudence for an Interconnected Globe Catherine Dauvergne, 2018-04-27 This title was first published in 2003 This book explores the interaction of globalization and the development of law The framework of the book is established by William Twining who asks how legal concepts can be generalised within a variety of legal orders This theme is taken up by a group of leading Australian scholars who produce essays on international economic law including financial regulation and human rights and citizenship migration and crime under the headings Globalization and the Laws of Money Globalization and the Laws of People Globalization Cultures and Comparisons This collection marks an important step towards the construction of a jurisprudence for a connected but still culturally diverse globe

Comparative Histories of Crime Barry Godfrey, Clive Emsley, Graeme Dunstall, 2013-01-11 This book aims to both reflect and take forward current thinking on comparative and cross national and cross cultural aspects of the history of crime Its content is wide ranging some chapters discuss the value of comparative approaches in aiding understanding of comparative history and providing research directions for the future

others address substantive issues and topics that will be of interest to those with interests in both history and criminology Overall the book aims to broaden the focus of the historical context of crime and policing to take fuller account of cross national and cross cultural factors **Organised Crime and the Challenge to Democracy** Feli Allum,2004 Evolution

places cross border cross national and international crime and crime control within its wider context It examines theory from a range of disciplines and introduces students to the frequently neglected area of the world order and world politics in an effort to direct attention to the links between events power ideas institutions policies actions and counter actions at the international and domestic level In an increasingly interconnected and interdependent world the various dimensions of globalisation play a pivotal role in issues of crime and criminal justice in the 21st century This interdisciplinary textbook offers a critical treatment of the development and recent acceleration of national regional and international efforts at cross border crime control and law enforcement The book not only places cross national and international efforts by police courts regional and international agencies within their historical context but also focuses on elucidating leading theoretical perspectives from within globalisation literature criminology and international relations to shed light upon both sides of this phenomenon Areas covered include cross border crime and security state crime and corruption international responses to genocide terrorism and counter terrorism organised crime This book will be perfect reading for modules in transnational crime and justice and will be of interest to students in criminology policing public policy and international relations

Globalization Jan-Erik Lane,2017-07-05 Efforts at coordination between nations are at the heart of the challenges of globalization Despite steadily growing interdependencies individual nations still have specific interests that present obstacles to globalization While some challenges inspired by the need to coordinate are viewed as inevitable by many they are less optimistic about prospects for success Jan Erik Lane argues that one should focus objectively upon the possibility of failures Lane analyzes four kinds of challenges to interdependency all of which are growing in geopolitical relevance First countries need to diminish their dependency on fossil fuel and shift to a reliable supply of energy because fossil fuels are diminishing

Second environmental degradation must be addressed because it is accelerating under the strain of earth's population Lane advocates an ecological footprint approach Third a single global market economy and its complexities must be addressed as national economies are increasingly opened Finally as traditional state sovereignty weakens foreign military intervention in both international and intra state conflicts increases Governments are attempting to address these interdependencies or reply to the challenges they pose mainly through international organizations and regionalism These efforts are discussed at length In addition problems with international law are reviewed as Lane warns against the utopian hopes of global constitutionalism Globalization also examines the potential consequences of failing to address the need for coordination in efforts to address shared global challenges *Reconstructing Law and Justice in a Postcolony* Nonso Okafo,2016-04-08

Drawing on data from a cross section of postcolonial nations across the world and on a detailed case study of Nigeria this book examines the experience of recreating law and justice in postcolonial societies The author's definition of postcolonial societies includes countries that have emerged from external colonial rule such as Nigeria and India as well as societies that have overcome internal dominations such as Afghanistan and Iraq Suggesting that restructuring a system of law and justice must involve a consideration of the traditions customs and native laws of a society as well as the official often foreign rules this volume examines how ethnically complex nations resolve disputes whether criminal or civil through a combination of formal and informal social control systems This book is unique in its concern with how the average citizens of a postcolonial society can play more active parts in their nation's law and justice and how modern and increasingly urban societies can learn from indigenous peoples and institutions which are more informal in their approaches to problem solving The concluding chapter looks at the possibility of an increased role for civil as opposed to criminal response in the social control system of a postcolonial society **Routledge Handbook of Transnational Organized Crime** Felia Allum,Stan

Gilmour,2012-03-15 Transnational organized crime crosses borders challenges States exploits individuals pursues profit wrecks economies destroys civil society and ultimately weakens global democracy It is a phenomenon that is all too often misunderstood and misrepresented This handbook attempts to redress the balance by providing a fresh and interdisciplinary overview of the problems which transnational organized crime represents The innovative aspect of this handbook is not only its interdisciplinary nature but also the dialogue between international academics and practitioners that it presents The handbook seeks to provide the definitive overview of transnational organized crime including contributions from leading international scholars as well as emerging researchers The work starts by examining the origins concepts contagion and evolution of transnational organized crime and then moves on to discuss the impact governance and reactions of governments and their agencies before looking to the future of transnational organized crime and how the State will seek to respond Providing a cutting edge survey of the discipline this work will be essential reading for all those with an interest in this dangerous phenomenon **World Police Encyclopedia: L-Z, index** Dilip K. Das,Michael Palmiotto,2006 The World

Police Encyclopedia is the only existing reference work to systematically survey all the police systems in all the countries of the world the 189 UN member states plus Switzerland Each article describes police history police education and training structure of the force s in relation to the country s form of government and criminal justice system police responsibilities and duties most common crimes structure and role of the courts correction structure organization and function of the police force s use of firearms local and central interactions community relations and current issues and challenges This unique resource will be of interest to scholars of history foreign policy and politics as well as government agencies NGOs and others involved in working internationally to control international and domestic crime
