Globalization and Autocentricity in Africa's Development in the 21st Century Kidane Mengisteab, 1996 African economies are the most dependent and the most marginalised in the global system Prevailing policies to integrate these economies more closely with the global economy are in the view of many misplaced and this work presents a series of alternative strategies that will tap the energies of the African people to develop their own potential and reduce their dependence on World Bank IMF led approaches

Globalization and the Circumpolar North Lassi Heininen, Chris Southcott, 2010-05-15 The circumpolar north has long been the subject of conflicting national aspirations and border disputes and with the end of the cold war and the coming era of potential resource scarcity its importance will only grow over the next several decades Anticipating that renewed prominence Globalization and the Circumpolar North brings together an array of scholars to explore the effects of this increased attention from the new opportunities offered by globalization to the potential damage to long isolated northern communities and peoples

Globalization and the Human Factor Joseph Mensah, 2018-01-18 Since the 1980s the world has experienced an unprecedented push towards economic political social cultural financial and technological integration This integration is a key element of the process of globalization Much of this revolves around the tensions and conflicts inherent in globalization with emphasis on political economy but at the expense of the human factor HF which places people at the centre of all discussions about globalization This volume brings the HF into the debate and examines to what extent this hitherto marginalized concept holds the key to providing a holistic understanding and contestation of globalization The volume develops a distinct concept or framework of the human factor examines the role and significance in global change from an interdisciplinary perspective analyzes the extent and significance in contemporary globalization discourse and provokes further debate about the unresolved disputes surrounding globalization The account will help readers navigate the minefields of the globalization debate

Yemen - U.S. Relations: the External and Internal Dynamics: 18th CENTURY - 2012 Dr. Moath A. Alrefaei,2024-06-22 US Yemeni relations are enveloped in mysteries that have never been fully unraveled Historically these relations have fluctuated dramatically improving momentarily before deteriorating once again The literature on Yemen US relations is riddled with inconsistencies and rarely delves deep into the dynamics at the core of this relationship often overlooking the underlying complexities This book addresses these key issues by exploring the myriad dynamics that drive bilateral relations between the two nations It asserts that Yemen US relations are governed by a complex array of factors broadly categorized as external and internal These dynamics are fluid shifting with the ever changing global environment and circumstances making each stage of the relationship distinct from the next Through a detailed analysis this book offers a new interpretation of the systematic changes in Yemen US relations and their future prospects It highlights the wide range of dynamics characterized by their plurality overlap and dual influence that contribute to the instability and oscillation defining this relationship Externally factors such as regional geo strategic considerations and the legacies of the Cold War alongside the democratization and human rights agenda in the new international order have predominantly shaped the relations Conversely the influence of internal factors was traditionally marginal due to weak mutual interests but this changed dramatically after the September 11 attacks The escalating threats to homeland security posed by terrorist groups in both nations brought a new dimension to the relationship Internal dynamics such as Yemen s conflict with al Qaeda its economic and developmental needs and the country s overall instability were significant in shaping the bilateral relations during the first decade of this century However their influence has since evolved marking a new era in the relationship between Yemen and the US This book stands out from others discussing the general state of Yemeni and American relations in two key ways First it avoids the conventional chronological approach that often becomes tedious opting instead for an analytical methodology that interprets changes in relations based on dominant factors Second it employs established scientific and methodological approaches from political science and international relations to ensure objectivity and enhance its scholarly integrity
