Older Workers in a Globalizing World Dirk Hofäcker, 2010-01-01 the book can be recommended to all with an interest in the issue of older workers in a globalised world Ageing and Society Early retirement has been a policy to cope with the problems of massive unemployment in many Western welfare states However it has become apparent that this strategy is costly and destroys human capital urgently needed in ageing societies This book offers a comprehensive and up to date study of late career patterns and processes of early retirement in fourteen OECD countries using both cross sectional and longitudinal data It is an important contribution to life course research and will provide the foundation for any serious discussion on pension reforms and increasing the employability of older workers Hans Jürgen Andre University of Cologne Germany This timely book investigates the growth of the early retirement trend and its varying spread among different groups of older workers in fourteen modern societies It argues for a differentiated political approach to reverse early retirement which relies on both pension and employability policies for older workers Examining the early retirement trend virtually all modern societies have been faced with since the onset of the globalization process in the 1970s and 1980s this book provides a thorough analysis of older workers late careers and their retirement transitions as well as explaining why this trend has developed differently between nations To promote an effective reversal of the early retirement trend national policymakers are advised not to concentrate their efforts exclusively on reducing the financial incentives for an early exit still present in most national pension systems In addition it is also recommended that they invest in the employability of older workers implying a thorough reconsideration of the design of education and labor market policies Dirk Hofäcker presents a unique and comprehensive synthesis of theories describing and explaining the trend towards early retirement and critically discusses their comparative advantages and shortcomings Researchers and students of sociology economics gerontology demography and comparative welfare states should not be without this book and policymakers and practitioners dealing with labor market policies will find it invaluable

Sport and Foreign Policy in a Globalizing World Steven J. Jackson, Steven Haigh, 2013-10-18 Globalization is effecting a close convergence of sport and foreign policy In order to respond to novel social political cultural and economic pressures states are increasingly turning to sport as a foreign policy instrument and they cannot ignore the corresponding influence that global sport has on their core interests This book is devoted to exploring this relationship in detail Although any examination of sport and foreign policy inevitably focuses on issues related to both politics and international relations the primary intention here is to consider the dimensions associated with foreign policy This book was previously published as a special issue of Sport in Society

Religion and Ethics in a Globalizing World L. Anceschi, J. Camilleri, R. Palapathwala, 2011-02-14 Around the world religion is an increasingly vital and pervasive force in

both personal and public life Though this trend has been widely noted its long term implications are as yet only dimly perceived Will this be a force for healing or for violence To express the question to its most dramatic yet urgent form can the world s major religious traditions respond constructively to contemporary challenges in the public sphere that are now by definition global Religion and Ethics in a Globalizing World seeks to address this question and to contribute to a greater understanding of the role of religion in the paradoxical context of a world that is increasingly unified but which remains fundamentally plural *Climate Action in a Globalizing World* Carl Cassegard,Linda Soneryd,Hakan Thorn,Asa

Wettergren,2017-05-18 The existence and urgency of global climate change is a matter of scientific consensus Yet the global politics of climate change have been anything but consensual In this context a wave of global climate activism has emerged in the last decade in response to the perceived failure of the political negotiations This book provides a unique comparative study of environmental movements in USA Japan Denmark and Sweden analyzing their interaction with the international climate institutions of the United Nations with national governments and with currents in the global climate movement It documents how and why the movement evolved between the Copenhagen Summit of 2009 and the Paris Summit of 2015 altering its strategies and tactics while attracting new actors to the issue area Further it demonstrates how the development of global environmental networks has increased contact between environmental movements in the Global North and those from the Global South resulting in the establishment of climate justice as a political cause and unifying frame for global climate activism *Localizing Knowledge in a Globalizing World* Ali Mirsepassi,Amrita Basu,Frederick Weaver,2003-01-01

The essays in this collection address the current crisis in area studies a crisis that differs from its perennial struggle with the established academic disciplines This crisis stems from the confluence of three related circumstances the end of the Cold War greater economic and cultural fluidity across political borders and contradictory intellectual trends in the academy which include on the one hand a renaissance of universalizing thinking in the social sciences and on the other hand the rise of post colonial studies and debates about modernity postmodernity and cultural hybridization Although the essays differ markedly in their focus and strategies the authors all demonstrate that local knowledge including serious study of individual cultures and proficiency in foreign languages which are vital to understanding rapidly changing global patterns and to countering universal claims by the social sciences While the authors also agree that area studies must reject their ethnocentric heritages and adopt inventive new contours they present a diversity

British Philanthropy in the Globalizing World Roshan Allpress,2024-02-16 Between 1756 and 1840 philanthropy in the British world grew from the domain of small associational committees to a vast enterprise of philanthropic and humanitarian societies with global reach British Philanthropy in the Globalizing World tells the story of this movement from its inception in small networks of mercantile and religious entrepreneurs to its signal projects and achievements in the abolition of slavery in evangelical missionary societies Bible societies and in the early indigenous rights movement It traces the lives and networks of hundreds

of philanthropists across four generations showing how their social religious economic intellectual and cultural worlds intersected to foster philanthropic innovation through organisational models transnational networks and the creation of a unique formative culture It shows how groups such as the Clapham Sect including William Wilberforce Henry Thornton Hannah More James Stephen and others emerged in an intergenerational context and how they sought to effect social and cultural change across multiple spheres For every headline achievement there were many failed experiments inner wrastlings and long running intellectual collaborations that left a wide and deep imprint on the cultural and political landscape of the English speaking world Drawing on the separate historiographies of metropolitan philanthropy associational culture anti slavery moral reform Evangelicalism colonial missions and economic thought the study unites into one analytical frame both the imaginative and organizational realities of philanthropy offering a dual focus on individual philanthropists their inner lives daily practices and participation in collaborative communities and on mapping the networks that bound philanthropic societies and projects together in metropolitan London and at the far reaches of the British world In doing so it offers a very human portrait of these entrepreneurs and evangelicals as they pursued a philanthropic global vision
