Agartan, Ayşe Buğra, 2007-10-01 Using Karl Polanyi's analysis of the separation of politics and the economy the book argues that the market economy is not a spontaneous process but a political project realized through institutional change where labour land money and currently knowledge are commodities The contributions explore the impact of this commodification process **State and Federal Marketing Activities and Other Economic**

Engineering and Contracting, 1920 **Politicians' Reading of Public Opinion and its Biases** Stefaan Walgrave, Karolin Soontjens, Julie Sevenans, 2022-08-15 Examining a central assumption widely accepted as being crucial in making democracy work that politicians form a more or less accurate image of public opinion and take that perception into account when representing citizens Politicians Reading of Public Opinion and its Biases presents a paradox of representation On the one hand politicians invest enormously in reading public opinion They are committed to finding out what the people want and public opinion is a key consideration in many of their undertakings Yet on the other hand politicians' perceptions of public opinion are surprisingly inaccurate Politicians are hardly better at estimating public opinion than ordinary citizens are Their perceptions are distorted by social projection in the sense that politicians' own opinion affects their estimations and on top of that there seems to be a systematic right wing bias in these perceptions The findings imply that one of the main paths to responsive policy making is flawed Even though politicians do the best they can to learn about people's preferences skewed perceptions put them on the wrong track From a democratic perspective the central findings of the book are quite sobering The high hopes that many authors had with regard to politicians' ability to adequately consult or sense public opinion appear to be vain The book puts forward a plausible driver of the slippage between the public and politics Politicians are less responsive to people's preferences than they could be not because they do not want to be responsive but because they base themselves on erroneous public opinion perceptions
