Global Electronic Commerce Theory And Case Studies Mit Preb:

Global Electronic Commerce J. Christopher Westland, Theodore H. K. Clark, 1999 Over the past two decades businesses in virtually every sector of the world economy have benefited from the technologies of electronic commerce the automation of commercial transactions using computer and communications technologies Electronic commerce has spurred far reaching changes in business on multiple fronts using many technologies This book provides a deep practical understanding of these technologies and their use in e commerce Unlike other books on e commerce it does not concentrate solely on the Internet Instead it suggests that the Internet is only a bridge technology attractive because of its low cost and global reach but unattractive because of its slow speed and poor user interface Each of the twelve chapters contains an overview of a current theory or practice followed by one or more business case studies A combination of academic theory and case studies provides a comprehensive picture of how businesspeople use computers to revolutionize the selling and delivery of their products and services
