**The World Encyclopedia of Wine** Stuart Walton, 1999      **A Guide to the Elite Estates of the Mosel-Saar-Ruwer Wine Region** Rudi Wiest, 1983      **The SAGE Encyclopedia of Alcohol** Scott C. Martin, 2014-12-16 Alcohol consumption goes to the very roots of nearly all human societies. Different countries and regions have become associated with different sorts of alcohol: for instance, the beer culture of Germany, the wine culture of France, Japan and sake, Russia and vodka, the Caribbean and rum, or the moonshine culture of Appalachia. Wine is used in religious rituals and toasts are used to seal business deals or to celebrate marriages and state dinners. However, our relation with alcohol is one of love/hate. We also regulate it and tax it; we pass laws about when and where it's appropriate; we crack down severely on drunk driving; and the United States and other countries tried the failed Noble Experiment of Prohibition. While there are many encyclopedias on alcohol, nearly all approach it as a substance of abuse, taking a clinical/medical perspective on alcohol, alcoholism and treatment. The SAGE Encyclopedia of Alcohol examines the history of alcohol worldwide and goes beyond the historical lens to examine alcohol as a cultural and social phenomenon, as well, both for good and for ill, from the earliest days of humankind.

**The University Wine Course** Marian W. Baldy, Ph.D., 1997-05-01      **Concise Encyclopedia of Science and Technology of Wine** V. K. Joshi, 2021-07-21 When asking the question "what is wine?" there are various ways to answer. Wine is extolled as a food, a social lubricant, an antimicrobial and antioxidant, and a product of immense economic significance. But there is more to it than that. When did humans first start producing wine, and what are its different varieties? Are wines nutritious or have any therapeutic values? Do they have any role in health, or are they simply intoxicating beverages? How are their qualities determined or marketed, and how are these associated with tourism? Concise Encyclopedia of Science and Technology of Wine attempts to answer all these questions and more. This book reveals the state of the art technology of winemaking, describing various wine regions of the world and different cultivars used in winemaking. It examines microbiology, biochemistry, and engineering in the context of wine production. The sensory qualities of wine and brandy are explored, and the composition, nutritive and therapeutic values, and toxicity are summarized. Selected references at the end of each chapter provide ample opportunity for additional study.
