Human Dimensions of Global Environmental Change National Research Council, Division of Behavioral and Social Sciences and Education, Policy Division, Board on Environmental Change and Society, Committee on the Human Dimensions of Global Change and Committee on Global Change Research, 1999-07-29 This publication is extracted from a much larger report Global Environmental Change Research Pathways for the Next Decade which addresses the full range of the scientific issues concerning global environmental change and offers guidance to the scientific effort on these issues in the United States This volume consists of Chapter 7 of that report Human Dimensions of Global Environmental Change which was written for the report by the Committee on the Human Dimensions of Global Change of the National Research Council NRC It provides findings and conclusions on the key scientific questions in human dimensions research the lessons that have been learned over the past decade and the research imperatives for global change research funded from the United States

Human Dimensions of Global Environmental Change National Research Council, Division of Behavioral

and Social Sciences and Education, Policy Division, Board on Environmental Change and Society, Committee on the Human Dimensions of Global Change and Committee on Global Change Research, 1999-08-29 This publication is extracted from a much larger report Global Environmental Change Research Pathways for the Next Decade which addresses the full range of the scientific issues concerning global environmental change and offers guidance to the scientific effort on these issues in the United States This volume consists of Chapter 7 of that report Human Dimensions of Global Environmental Change which was written for the report by the Committee on the Human Dimensions of Global Change of the National Research Council NRC It provides findings and conclusions on the key scientific questions in human dimensions research the lessons that have been learned over the past decade and the research imperatives for global change research funded from the United States

Global Environmental Change Committee on Global Change Research, Policy Division, Policy and Global Affairs, National Research Council, 1999-09-28 How can we understand and rise to the environmental challenges of global change One clear answer is to understand the science of global change not solely in terms of the processes that control changes in climate and the composition of the atmosphere but in how ecosystems and human society interact with these changes In the last two decades of the twentieth century a number of such research efforts supported by computer and satellite technology have been launched Yet many opportunities for integration remain unexploited and many fundamental questions remain about the earth's capacity to support a growing human population This volume encourages a renewed commitment to understanding global change and sets a direction for research in the decade ahead Through case studies the book explores what can be learned from the lessons of the past 20 years and what are the outstanding scientific questions Highlights include Research imperatives and strategies for investigators in the areas of atmospheric chemistry climate ecosystem studies and human dimensions of global change The context of climate change including lessons to be gleaned from paleoclimatology Human responses to and forcing of projected global change This book offers a comprehensive overview of global change research to date and provides a framework for answering urgent questions

Geography in America at the Dawn of the 21st Century Gary L. Gaile, Cort J. Willmott, 2005 Geography in America at the Dawn of the 21st Century surveys American geographers current research in their specialty areas and tracks trends and innovations in the many subfields of geography As such it is both a state of the discipline assessment and a topical reference It includes an introduction by the editors and 47 chapters each on a specific specialty The authors of each chapter were chosen by their specialty group of the American Association of Geographers AAG Based on a process of review and revision the chapters in this volume have become truly representative of the recent scholarship of American geographers While it focuses on work since 1990 it additionally includes related prior work and work by non American geographers The initial Geography in America was published in 1989 and has become a benchmark reference of American geographical research during the 1980s This latest volume is completely new and features a preface written by the eminent geographer Gilbert White

Human

Adaptability Emilio F. Moran, 2022-05-09 Designed to help students understand the multiple levels at which human populations respond to their surroundings this essential text offers the most complete discussion of environmental physiological behavioral and cultural adaptive strategies available Among the unique features that make Human Adaptability outstanding as both a textbook for students and a reference book for professionals are a complete discussion of the development of ecological anthropology and relevant research methods the use of an ecosystem approach with emphasis on arctic high altitude arid land grassland tropical rain forest and urban environments an extensive and updated bibliography on ecological anthropology and a comprehensive glossary of technical terms There is enhanced emphasis throughout on the role of gender in human adaptability research and on global environmental change as it affects particular ecosystems Students are guided to websites that provide access to relevant material complement the text's coverage of biomes and suggest ways to become active in environmental issues The fourth edition includes updated material on climate change and environmental policy This book is essential reading for students undertaking courses in environmental anthropology and human ecology

Human Adaptability, Student Economy Edition Emilio Moran, 2018-10-03 This book focuses on mechanisms of human adaptability It integrates findings from ecology physiology social anthropology and geography around a set of problems or constraints posed by human habitats

The Business of Greening Stephen Fineman, 2002-09-26 A unique and pertinent study of a very relevant topic this volume debates the relationship between business and the environment and the future forms that this relationship can take

Emerging Needs and Opportunities for Human Factors Research National Research Council, Division of Behavioral and Social Sciences and Education, Board on Human-Systems Integration, Committee on Human Factors, 1995-10-15 This book identifies areas that represent new needs and opportunities for human factors research in the coming decades It is forward looking problem oriented and selectively focused on national or global problems including productivity in organizations education and training employment and disabilities health care and environmental change technology issues including communications technology and telenetworking information access and usability emerging technologies automation and flexible manufacturing and advanced transportation systems and human performance including cognitive performance under stress and aiding intellectual work

Protecting the Arctic Mark Nuttall, 2005-10-05 Protecting the Arctic explores some of the ways in which indigenous peoples have taken political action regarding Arctic environmental and sustainable development issues and investigates the involvement of indigenous peoples in international environmental policy making Nuttall illustrates how indigenous peoples make claims that their own forms of resource management not only have relevance in an Arctic regional context but provide models for the inclusion of indigenous values and environmental knowledge in the design negotiation and implementation of global environmental policy

Structural Human Ecology Nadine Bratchatzek, Paul Ehrlich, Sylvia Hiller, Roger E. Kasperson, Sandra T. Marquart-Pyatt, Allan Mazur, Ortwin Renn, Dirk Scheer, 2021-09-24 The desire to understand people's influence on ecosystems has inspired

scientific studies and analyses of the stress individuals and communities place on the environment human well being and the tradeoffs between them As an emerging discipline Structural Human Ecology is devoted to unlocking the dynamic links between population environment social organization and technology The new field offers cutting edge research in risk analysis that can be used to evaluate environmental policies and thus help citizens and societies worldwide learn how to most effectively mitigate human impacts on the biosphere The essays in this volume were presented by leading international scholars at a 2011 symposium honoring the late Dr Eugene Rosa then Boeing Distinguished Professor of Environmental Sociology at WSU

The Science of Regional and Global Change National Research Council,Policy and Global Affairs,Policy Division,Committee on Global Change Research,2000-01-19 This report is intended to promote a dialogue between the scientific community and the government officials who will lead our nation in the coming years on global change research The first section of the report is a brief description of the challenges and proposed responses needed from the highest levels of the government and the second provides more detailed discussion and is directed to agency level issues and responses The last section is a detailed bibliography that lists many of the specific reports on which the views outlined here are ultimately based

Encyclopedia of Environmental Change John A Matthews,2013-12-13 Accessibly written by a team of international authors the Encyclopedia of Environmental Change provides a gateway to the complex facts concepts techniques methodology and philosophy of environmental change This three volume set illustrates and examines topics within this dynamic and rapidly changing interdisciplinary field The encyclopedia includes all of the following aspects of environmental change Diverse evidence of environmental change including climate change and changes on land and in the oceans Underlying natural and anthropogenic causes and mechanisms Wide ranging local regional and global impacts from the polar regions to the tropics Responses of geo ecosystems and human environmental systems in the face of past present and future environmental change Approaches methodologies and techniques used for reconstructing dating monitoring modelling projecting and predicting change Social economic and political dimensions of environmental issues environmental conservation and management and environmental policy Over 4 000 entries explore the following key themes and more Conservation Demographic change Environmental management Environmental policy Environmental security Food security Glaciation Green Revolution Human impact on environment Industrialization Landuse change Military impacts on environment Mining and mining impacts Nuclear energy Pollution Renewable resources Solar energy Sustainability Tourism Trade Water resources Water security Wildlife conservation The comprehensive coverage of terminology includes layers of entries ranging from one line definitions to short essays making this an invaluable companion for any student of physical geography environmental geography or environmental sciences

Fiscal Year 2000 Climate Change Budget Authorization Request United States. Congress. House. Committee on Science. Subcommittee on Energy and Environment,1999

Coping with Global Environmental Change, Disasters and Security Hans Günter Brauch,Úrsula Oswald Spring,Czeslaw Mesjasz,John

Grin, Patricia Kameri-Mbote, Béchir Chourou, Pál Dunay, Joern Birkmann, 2011-02-03 *Coping with Global Environmental Change Disasters and Security Threats Challenges Vulnerabilities and Risks* reviews conceptual debates and case studies focusing on disasters and security threats challenges vulnerabilities and risks in Europe the Mediterranean and other regions It discusses social science concepts of vulnerability and risks global regional and national security challenges global warming floods desertification and drought as environmental security challenges water and food security challenges and vulnerabilities vulnerability mapping of environmental security challenges and risks contributions of remote sensing to the recognition of security risks mainstreaming early warning of conflicts and hazards and provides conceptual and policy conclusions

Strategic Plan for the U.S. Climate Change Science Program Climate Change Science Program (U.S.), 2003

Assessing Vulnerability to Global Environmental Change Richard J. T. Klein, Anthony G. Patt, 2012-05-16 Assessing the vulnerability of human populations to global environmental change particularly climate change is now the main imperative of research and international action However much of the research into vulnerability is not designed to feed directly into decision making and policy creating a gap between the knowledge created by researchers and what is required by decision makers This book seeks to rectify this problem and bridge the gap It discusses vulnerability as the central theme and brings together many different applications from disaster studies climate change impact studies and several other fields and provides the most comprehensive synthesis of definitions theories formalization and applications to date illustrated with examples from different disciplines regions and periods and from local through to regional national and international levels Case study topics cover sea level rise vulnerability to changes in ecosystem services assessing the vulnerability of human health and double exposure to climate change and trade liberalization amongst other issues Research outcomes stress that science policy dialogues must be transparent to be effective and concentrate on a mutual understanding of the concepts used A key research finding is that the most useful information for decision makers is that which shows the separate causes and drivers of vulnerability rather than presenting vulnerability in an aggregated form The book concludes with a unifying framework for analysing integrated methodologies of vulnerability assessment and guiding how research and policy can be linked to reduce vulnerability

World Social Science Report 2013 Changing Global Environments International Social Science Council, United Nations Educational, Scientific and Cultural Organization, 2013-11-15 This book represents a comprehensive overview of the field gathering the thoughts and expertise of hundreds of social scientists from around the world This edition focuses on the transformative role of the social sciences in confronting climate and broader processes of environmental change

A Changing Environment for Human Security Linda Sygna, Karen O'Brien, Johanna Wolf, 2013-06-26 Environmental change presents a new context and new opportunities for transformational change This timely book will inspire new ways of understanding the relationship between environmental change and human security A Changing Environment for Human Security Transformative Approaches to Research Policy and Action both supports and

informs a call for new transformative approaches to research policy and action The chapters in this book include critical analyses case studies and reflections on contemporary environmental and social challenges with a strong emphasis on those related to climate change Human thoughts and actions have contributed to an environment of insecurity manifested as multiple interacting threats that now represent a serious challenge to humanity Yet humans also have the capacity to collectively transform the economic political social and cultural systems and structures that perpetuate human insecurities These fresh perspectives on global environmental change from an interdisciplinary group of international experts will inspire readers whether students researchers policy makers or practitioners to think differently about environmental issues and sustainability The contributions show that in a changing environment human security is not only a possibility but a choice
