Dilley,2011-12-15 Andrew Dilley offers a major new study of financial dependence examining the connections this dependence forged between the City and political life in Edwardian Australia and Canada mediated by ideas of political economy In doing so he reconstructs the occasionally imperialistic politic of finance which pervaded the British World at this time **Transactions of the Royal Historical Society: Volume 16** Ian W. East Meets West - Banking, Commerce and Investment in the Ottoman Empire Monica Pohle Fraser, 2016-12-05 Bringing together cultural economic and social historians from across Europe and beyond this volume offers a consideration from a number of perspectives of the principal forces that further integrated the Ottoman Empire and Western Europe during the first century of industrialisation The essays not only review and analyse the commercial financial and monetary factors negative as well as positive that bore upon the region's initial stages of modern transformation but also provide a ready introduction to major aspects of the economy and society of the Ottoman Empire in the nineteenth century Beginning with two chapters providing the context to the development of Ottoman relations with Western Europe up to the second half of the nineteenth century the collection then moves on to explore more specific questions of trade links the impact of improved transportation and communications the development and changing nature of Ottoman finance and banking as well as European investment in Turkey The outcome is a broad ranging consideration of how all these issues played a fundamental role in the final decades of the Ottoman Empire and the emergence of Turkey as a modern state with links to both east and west The essays in this collection derive from the EABFH colloquium held in the Imperial Mint Istanbul in October 1999 Political Arithmetic Robert William, Enid M. Fogel, Mark Guglielmo, Nathaniel Grotte, 2024-05-31 We take for granted today that the assessments measurements and forecasts of economists are crucial to the decision making of governments and businesses alike But less than a century ago that wasn't the case economists simply didn't have the necessary information or statistical tools to understand the ever more complicated modern economy With Political Arithmetic Nobel Prize winning economist Robert Fogel and his collaborators tell the story of economist Simon Kuznets the founding of the National Bureau of Economic Research and the creation of the concept of GNP which for the first time enabled us to measure the performance of entire economies The book weaves together the many strands of political and economic thought and historical pressures that together created the demand for more detailed economic thinking Progressive era hopes for activist government the production demands of World War I Herbert Hoover's interest in business cycles as President Harding's commerce secretary and the catastrophic economic failures of the Great Depression and shows how through trial and error measurement and analysis economists such as Kuznets rose to the occasion and in the process built a discipline whose knowledge could be put to practical use in everyday decision making The product of a lifetime of studying the workings of economies and skillfully employing the tools of economics Political Arithmetic is simultaneously a history of a key

period of economic thought and a testament to the power of applied ideas **After Tamerlane** John Darwin, 2009-09-01

First published in the United Kingdom by Penguin Books Ltd in 2007 T p verso **War On Wealth, The: Fact And Fiction**

In British Finance Since 1800 Ranald Michie, 2023-03-21 This book addresses the divide that exists between the reality of finance and the image it projects A functioning financial system is an essential feature of a modern economy providing it with money credit capital and investments Conversely those who provide this essential service are neither respected nor trusted The causes and consequences of this divide is explored using the British experience from 1800 to the present drawing upon a mixture of factual evidence and contemporary fiction Nothing of this scale has been attempted before and this is the product of 50 years of research **Dividends of Development** Mary A. O'Sullivan, 2016 This book explains how U S securities

markets became central to the institutional fabric of U S capitalism It claims that the U S securities markets took a particular even peculiar form that reflected the distinctive trajectory of economic development that the United States experienced from the Civil War through World War 1 **The Cambridge Economic History of Australia** Simon Ville, Glenn

Withers, 2014-10-08 Australia s economic history is the story of the transformation of an indigenous economy and a small convict settlement into a nation of nearly 23 million people with advanced economic social and political structures It is a history of vast lands with rich exploitable resources of adversity in war and of prosperity and nation building It is also a history of human behaviour and the institutions created to harness and govern human endeavour This account provides a systematic and comprehensive treatment of the nation s economic foundations growth resilience and future in an engaging contemporary narrative It examines key themes such as the centrality of land and its usage the role of migrant human capital the tension between development and the environment and Australia s interaction with the international economy Written by a team of eminent economic historians The Cambridge Economic History of Australia is the definitive study of Australia s economic past and present **Pawned States** Didac Queralt, 2022-08-09 How foreign lending weakens emerging nations In

the nineteenth century many developing countries turned to the credit houses of Europe for sovereign loans to balance their books and weather major fiscal shocks such as war This reliance on external public finance offered emerging nations endless opportunities to overcome barriers to growth but it also enabled rulers to bypass critical stages in institution building and political development Pawned States reveals how easy access to foreign lending at early stages of state building has led to chronic fiscal instability and weakened state capacity in the developing world Drawing on a wealth of original data to document the rise of cheap overseas credit between 1816 and 1913 Didac Queralt shows how countries in the global periphery obtained these loans by agreeing to extreme conditionality which empowered international investors to take control of local revenue sources in cases of default and how foreclosure eroded a country s tax base and caused lasting fiscal disequilibrium Queralt goes on to combine quantitative analysis of tax performance between 1816 and 2005 with qualitative historical analysis in Latin America Asia Africa and the Middle East illustrating how overreliance on external capital by local

leaders distorts their incentives to expand tax capacity articulate power sharing institutions and strengthen bureaucratic apparatus Panoramic in scope Pawned States sheds needed light on how early and easy access to external finance pushes developing nations into trajectories characterized by fragile fiscal institutions and autocratic politics Gold, Finance and Imperialism in South Africa, 1887-1902 Mariusz Lukasiewicz, 2024-03-19 This book provides a unique account of the financial and political history of the South African War by analysing the organisation and operations of the Johannesburg Stock Exchange JSE the oldest existing stock exchange in the African continent Identifying the JSE as the nexus between international finance South African gold mining and British imperialism the book exposes the financial and political connections between Johannesburg Pretoria London and Paris during the final stage of the imperial scramble for southern Africa Gold mining presented the South African Republic ZAR and the whole southern African regional economy with a long term economic future and new prospects of industrialisation However this socio economic transformation was dependent on extensive capital investments and the institutionalisation of a coercive labour regime based on racial discrimination This monograph provides the first empirical examination of how international finance imperial politics and racialised industrial relations became entrenched in a key financial intermediary in colonial South Africa first in Kimberley in the Cape Colony and then in Johannesburg in the ZAR By studying the Johannesburg capital market s social microstructures the author demonstrates how colonial and international financial intermediaries underwrote and financed the largest wave of mining investments in Africa prior to the First World War Filling an important gap in literature on nineteenth century British imperialism and Anglo African Afrikaner relations this insightful book uses the JSE as a lens to carefully expose the structures and agency of global finance in the outbreak of the South African War and the making of South Africa as a unified colonial state Guilty Money Randal C Michie, 2015-09-30 This is an engaging study of the place occupied by the City of London within British cultural life during the Victorian and Edwardian periods Michie uses both literary and popular novels to examine socio economic representations during this period
