## **Global Governance And The New Wars The Merging Of Development And Security:**

Global Governance and the New Wars Mark Duffield, 2014-02-13 In this hugely influential book originally published in 2001 but just as if not more relevant today Mark Duffield shows how war has become an integral component of development discourse Aid agencies have become increasingly involved in humanitarian assistance conflict resolution and the social reconstruction of war torn societies Duffield explores the consequences of this growing merger of development and security unravelling the nature of the new wars and the response of the international community in particular the new systems of global governance that are emerging as a result An essential work for anyone studying interested in or working in development or international security

**Global Governance and the New Wars** Mark Duffield, 2001-06 This book examines the nature of today's internal and regionalized conflicts together with the systems of global governance that have emerged in response to them The widespread commitment among donor governments and aid agencies to conflict resolution and social reconstruction indicates that war is now part of development discourse The very notion of development the author argues has been radicalized in the process and now requires the direct transformation of Third World societies This radicalization is closely associated with the redefinition of security Because conflict is understood as stemming from a developmental malaise underdevelopment itself is now seen as a source of instability The author argues however that transforming the social systems of developing countries is beyond the ability and legitimacy of individual governments in the North As a result governments NGOs security forces private companies and UN agencies have all become part of an emerging and complex system of global governance The aim is to secure stability on the borders of ordered society where the world encounters the violence of the new wars This book represents contribution to our understanding of modern conflict and the difficulties of effective engagement Together with practitioners and policymakers seeking a challenging interpretation of their work the book will be of direct interest to students and scholars in the fields of international security political economy political theory and development studies

the top of the international political agenda has been accompanied by added scrutiny as the international community seeks to meet the multi dimensional challenges of building a just and sustainable peace in societies ravaged by war Beyond the strictly operational dimension there is considerable ambiguity in the concepts and terminology used to discuss post conflict peacebuilding This ambiguity undermines efforts to agree on common understandings of how peace can be most effectively built thereby impeding swift coherent action Accordingly this lexicon aims to clarify and illuminate the multiple facets of post conflict peacebuilding by presenting its major themes and trends from an analytical perspective To this end the book opens with a general introduction on the concept of post conflict peacebuilding followed by twenty six essays on its key elements including capacity building conflict transformation reconciliation recovery rule of law security sector reform and transitional justice Written by international experts from a range of disciplines including political science and international relations international law economics and sociology these essays cover the whole spectrum of post conflict peacebuilding In reflecting a diversity of perspectives the lexicon sheds light on many different challenges associated with post conflict peacebuilding For each key concept a generic definition is proposed which is then expanded through discussion of three main areas the meaning and origin of the concept its content and essential components and its means of implementation including lessons learned from past practice

**Risk, Global Governance and Security** Yee-Kuang Heng, Ken McDonagh, 2009-03-26 This book steers discussion of the war on terror away from the militaristic tinge it has acquired back to the idea that increased global cooperation and a cosmopolitan agenda would be the best solution to managing globalised risks like terrorism
