

# Global Marine Environment Protection Initiative Mandates

(from G-20 Leaders' declarations)

## ***Toronto (26-27 June, 2010):***

"Following the recent oil spill in the Gulf of Mexico we recognize the need to share best practices to protect the marine environment, prevent accidents related to offshore exploration and development, as well as transportation, and deal with their consequences."

## ***Seoul (November 11-12, 2010):***

"We welcome the progress achieved by the Global Marine Environment Protection (GMEP) initiative toward the goal of sharing best practices to protect the marine environment, to prevent accidents related to offshore exploration and development, as well as marine transportation, and to deal with their consequences. We recognize the work done by the GMEP Experts Sub-Group and take note of the progress made on reviewing international regulation of offshore oil and gas exploration, production and transport with respect to marine environmental protection as a first step to implement the Toronto mandate.

Future work on the GMEP initiative should benefit from relevant findings, as they become available, from the National Commission on the BP Deepwater Horizon Oil Spill in the United States and the Montara Commission of Inquiry in Australia. We ask the GMEP Experts Sub-Group to provide a further report, with the support of the IMO, OECD, IEA, OPEC, International Regulators Forum, and International Association of Drilling Contractors and, in consultation with relevant stakeholders, to continue work on the effective sharing of best practices at the 2011 Summit in France."

## ***Cannes (November 3-4, 2011):***

«We decide to take further action to protect the marine environment, in particular to prevent accidents related to offshore oil and gas exploration and development, as well as marine transportation, and to deal with their consequences. We welcome the establishment of a mechanism to share best practices and information on legal frameworks, experiences in preventing and managing accidents and disasters relating to offshore oil and gas drilling, production and maritime transportation. We ask the Global Marine Environment Protection working group, in cooperation with the OECD, the International Regulators Forum and OPEC, to report next year on progress made and to establish this mechanism in order to disseminate these best practices by mid-2012, at which point it will be reviewed. We also commit to foster dialogue with international organisations and relevant stakeholders».

## ***Los Cabos (June 18-19, 2012):***

"We welcome the establishment of a Global Marine Environment Protection Best Practices Sharing Mechanism website, and look forward to its launch in accordance with the Cannes mandate".

## **Global Marine Environment:**

*Global Marine Environment* Herman Prager, 1993 This study focuses on the state system and the problem of ocean degradation as practiced in the West specifically the Western industrial market economies The author locates the source of the ecological problem in the allocation of power and values in a society the differing public policies in response to divergent appreciations on the nature of social challenges and appropriate responses This book is a valuable contribution to the collective efforts to educate the public about the worsening global crisis His approach combines biology chemistry and political science in its discussion of the tragic destruction of our oceans Contents The Evolution of the Contemporary State System Theoretical Aspects of the Current State System The Physical State of the Ocean and the Pollution Crisis The Contribution of Intergovernmental Organizations INGOs and Cetacean Protection Conclusions Global Marine Pollution Michael Waldichuk, M. Waldichuk, 1978 **Global Marine Assessments** Emily Corcoran, United Nations. Environment Programme, UNEP World Conservation Monitoring Centre, Intergovernmental Oceanographic Commission, 2007 **Global Marine Biological Diversity** Elliott A. Norse, 1993-07 Global Marine Biological Diversity presents the most up to date information and view on the challenge of conserving the living sea and how that challenge can be met **Global ocean protection : present status and future possibilities**, 2010 This publication provides a much needed and timely tool to assist us in our collective effort to find new and better solutions to address the various threats to our marine biological diversity and productivity It provides evidence based recommendations on improving and accelerating actions on delivering ocean protection and management through marine protected areas and facilitates the sharing of experiences and lessons learned Page 4 *International Marine Environmental Law and Policy* Daud Hassan, Saiful Karim, 2018-10-03 Several disturbing issues pose a threat to the marine environment and its wellbeing among them marine environmental pollution and degradation of marine biodiversity Most troubling is that these issues are overwhelmingly caused by human activities which are sometimes transboundary and their consequences will become more severe and complicated if not properly curbed Thus these activities require comprehensive policies laws and principles to manage them effectively Linked to these solutions is the need for responsibilities cooperation and commitments at local national regional and international levels Contemporary Marine Environmental Law and Policy presents a thorough appraisal of the main issues actors and institutions engaged in the legal aspects of marine environmental conservation With contributions from an international range of authors the book provides a concise account of the legal and policy framework underlying international marine environmental issues and of the fundamental concepts and strategies that are important to the protection of the marine environment Some of the topics explored include the prevention of marine pollution caused by land based activities ships and offshore hydrocarbon and mineral resources exploration the conservation and management of marine living resources the marine environment in the polar regions and the settlement of marine environmental disputes This book provides a solid foundation for anyone studying

International Environmental Law and the Law of the Sea It will also appeal to anyone seeking to gain a deeper understanding of this hugely important subject **The IMLI Treatise On Global Ocean Governance** David Joseph Attard, David M Ong, Dino Kritsiotis, 2018-07-04 The 1982 United Nations Convention on the Law of the Sea UNCLOS remains the cornerstone of global ocean governance However it lacks effective provisions or mechanisms to ensure that all ocean space and related problems are dealt with holistically With seemingly no opportunity for revision due to the Conventions burdensome amendment provisions complementary mechanisms dealing with such aspects of global ocean governance including maritime transport fisheries and marine environmental sustainability have been developed under the aegis of the United Nations and other relevant international organizations This approach is inherently fragmented and unable to achieve sustainable global ocean governance In light of the Sustainable Development Goals SDGs particularly Goal 14 the IMLI Treatise proposes a new paradigm on the basis of integrated and cross sectoral approach in order to realise a more effective and sustainable governance regime for the oceans This volume focuses on the role of UN as the central intergovernmental organization responsible for global ocean governance It examines the ocean governance challenges and how the present legal policy and institutional frameworks of the UN have addressed these challenges It identifies the strengths and weaknesses of UN legal structures and offers tangible proposals to realize the ambition of a global ocean governance system **Research Handbook on International Marine Environmental Law** Rosemary Rayfuse, Aline Jaeckel, Natalie Klein, 2023-01-20 This wholly new edition of the Handbook provides an authoritative examination of international law relating to the protection of the marine environment Chapters critically engage with current legal issues surrounding activities that harm the marine environment including marine pollution seabed activities exploitation of marine biodiversity and climate change and with the different legal tools and mechanisms including environmental impact assessments and compliance and dispute settlement mechanisms used to protect the marine environment New chapters also address legal issues relating to the role of technology and marine scientific research as well as the application of principles such as public participation This title contains one or more Open Access chapters **Global marine pollution** Michael Waldichuk, 1978 **Global Ocean Science Report** Intergovernmental Oceanographic Commission, UNESCO, 2020-12-14 The world ocean is a life supporting system for humanity yet it remains largely unknown Based on data collected from around the world the Global Ocean Science Report 2020 offers a global record of how where and by whom ocean science is conducted It monitors our capacity to understand the ocean and seize new opportunities More generally the Report underlines the essential role of ocean research and international cooperation for all key issues of the 21st century **Saving the Oceans Through Law** James Harrison, 2017-10-27 The oceans cover more than seventy per cent of the surface of the planet and they provide many vital ecosystem services However the health of the world's oceans has been deteriorating over the past decades and the protection of the marine environment has emerged as one of the most pressing legal and political challenges for the

international community An effective solution depends upon the cooperation of all states towards achieving agreed objectives This book provides a critical assessment of the role that international law plays in this process by explaining and evaluating the various legal instruments that have been negotiated in this area as well as key trends in global ocean governance Starting with a detailed analysis of the United Nations Convention on the Law of the Sea the book considers the main treaties and other legal texts that seeks to prevent reduce and control damage to the marine environment caused by navigation seabed exploitation fishing dumping and land based activities as well as emerging pressures such as ocean noise and climate change The book demonstrates how international institutions have expanded their mandates to address a broader range of marine environmental issues beyond basic problems of pollution control to include the conservation of marine biological diversity and an ecosystems approach to regulation It also discusses the development of diverse regulatory tools to address anthropogenic impacts on the marine environment and the extent to which states have adopted a precautionary approach in different maritime sectors Whilst many advances have been made in these matters this book highlights the need for greater coordination between international institutions as well as the desirability of developing stronger enforcement mechanisms for international environmental rules [Global Marine Assessments](#) ,2003 [JMBA Global Marine Environment](#) Dr. Anne Pulsford,2005 *The Marine Environment and Biodiversity* Michael Kent,2022 Written primarily for 16 19 year old students this primer introduces the key features of the marine environment and explores definitions of marine biodiversity at different levels of biological organization genetic species ecosystem and functional It also discusses how changes in ocean features due to human activities are having a negative impact on marine biological diversity The primer aims to extend students knowledge and inspire them to take their school level learning further It explores topics that are familiar from the curriculum and also introduces new ideas giving students a first taste of the study of biology beyond school level and demonstrating how concepts frequently encountered at school are relevant to and applied in current research This is an ideal text to support students who are considering making the transition from studying biology at school to university Digital formats and resourcesThe book is available for students and institutions to purchase in a variety of formats and is supported by online resources The e book offers a mobile experience and convenient access along with functionality tools navigation features and links that offer extra learning support [www.oxfordtextbooks.co.uk/ebooks](http://www.oxfordtextbooks.co.uk/ebooks) Online resources include multiple choice questions for students to check their understanding and for registered adopters figures and tables from the book [Global Marine Biological Diversity](#) Elliott A. Norse,1993-07 [Global Marine Biological Diversity](#) presents the most up to date information and view on the challenge of conserving the living sea and how that challenge can be met *Routledge Handbook of Marine Governance and Global Environmental Change* Paul G. Harris,2022-06-15 This comprehensive handbook provides a detailed and unique overview of current thinking about marine governance in the context of global environmental change Many of the most profound impacts of global environmental change and climate change in particular will occur in the oceans It is vital

that we consider the role of marine governance in adapting to and mitigating these impacts This comprehensive handbook provides a thorough review of current thinking about marine environmental governance including law and policy in the context of global environmental change Initial chapters describe international law regimes and leadership in marine environmental governance in the process considering how existing regimes for climate change and the oceans should and can be coordinated This is followed by an exploration of the role of non state actors including scientists nongovernmental organisations and corporations The next section includes a collection of chapters highlighting governance schemes in a variety of marine environments and regions including coastlines islands coral reefs the open ocean and regional seas Subsequent chapters examine emerging issues in marine governance including plastic pollution maritime transport sustainable development environmental justice and human rights Providing a definitive overview the Routledge Handbook of Marine Governance and Global Environmental Change is suitable for advanced students in marine and environmental governance environmental law and policy and climate change as well as practitioners activists stakeholders and others concerned about the world s oceans and seas

**Global Marine Pollution Bibliography** Michael A. Champ,P. Kilho Park,1982-11-30 This bibliography is an attempt to honor our fellow workers for their contributions to marine pollution as a scientific field We also hope to increase the understanding and exchange of information from a global per spective For the sake of younger workers we hope that this exchange will prevent duplication of effort the sad reinvention of knowledge An ulterior motive of ours is to create a living bibliography by not only having this document available as a printed text but also as references with abstracts on word processor discs so that researchers teachers and managers can update and expand this bibliography in their own fields of interest We hope to be able to find a distributor for these discs in the near future To establish greater communication we had hoped to have an appendix with author s names and addresses however we found that we had less than half of the senior authors current addresses Therefore for subsequent editions we hope our fellow scientists will keep us informed of their work and current addresses and will bring to our attention any errors or papers that we have inadvertently missed Our aim is to produce another edition in three years Marine Policy Mark

Zacharias,2014-03-14 This textbook provides the reader with a foundation in policy development and analysis and describes how policy including legal mechanisms is applied to marine environments around the world It offers a systematic treatment of all aspects of marine policy including environmental protection fisheries transportation energy mining and climate change It starts with a biophysical overview of the structure and function of the marine environment with a particular emphasis on the challenges and opportunities of managing the marine environment An overview of the creation and function of international law is then provided with a focus on international marine law It explores the geographic and jurisdictional dimensions of marine policy as well the current and anticipated challenges facing marine systems including climate change related impacts and resource over exploitation The book should appeal to senior undergraduate and graduate students and

form a core part of the curriculum for marine affairs science and policy courses It will also provide supplementary reading for students taking a course in the law of the oceans but is not aimed at legal specialists      **UK Strengthens Protection of Global Marine Environment** ,1997      *The Contemporary State System and the Global Marine Environment* Herman J.
